Many accidents don't happen by accident. They eventually only become inevitable once the last opportunities to avert them by doing good are wasted by individuals who thought they had better things to do than to save their world. Forget pure evil. **The brute force of nothing is far worse.** Here LLoL explains how he as a watcher started falling and flaming out.

Preface

Where does evil come from? This age old question appears closely linked to human origins. But what if the greatest evil is not smart? What if it's blind and random, induced by *incurious ignorant indifference* fueled by *inner institutional inertia*? Then **OverSimplifying overComplicating overReach \OSCR** of anything can trigger slow-motion explosions of blind decisions that, even if all well-intended, end millennia later in self-destruction like in an accidental nuclear winter. Aiming to escape avoidable existential disasters focussed LLoL's mind. He analyzed computationally how self-organizing criticality due to OSCAR can cause such disasters. Here LLoL reports thought experiments that explore the origins of the worst possible evil that inflicts maximal suffering and even enslaves God, as in the Prodigal Son story of Luke 15. OSCAR is universal to all heterogeneous complex worlds. OSCAR reaches for world domination by evolving disasters anywhere it is not tightly controlled. LLoL shows how OSCAR even affected God's "7Day" creation, as Day 2 & Day 6 led to outcomes that are built to mutually stabilize to create a very good world. But to succeed humans have to learn a very special type of algorithmic dance in time, here described as Yah's Jubilee Math. Without it instabilities in humans and in boundary definitions will predictably blow each other up. By process of elimination LLoL infers that his ability to infer these stories offers him a rare chance to own the respective mistakes by faith in order to turn all affected fates around. Trusting Yas' Good News, LLoL decided to take that rare chance by writing "*LLoL's Ketubah for Yah & Yas*" (separate file). It proposes to Yah & Yas a way to remedy this disaster that resulted from a background story similar to the ones

described here. The crimes themselves are described on Posters Po.E-Po.H in LLoL's *Flying Scroll* Exhibit, as are ways to work towards restitution and to avert even worse disasters. Such worse disasters include accidental nuclear winter, which becomes predictably locked-in if the world chooses to continue nuclear roulette. Having "benefitted" from that "game", LLoL is the last one to point fingers, except to himself for the cosmic treason that caused all this chaos. The thought experiments rooted in real possibilities presented here are part of LLoL's debugging data on his quest to avert Armageddon disasters. Inconveniently for LLoL it indicates that LLoL appears to be at the root cause of most or all of the worst he has been trying to prevent. It makes Yas' warning rather practical about pulling out logs first out of one's own eye before helping others with their splinters.

Determined to keep following Yas, LLoL *chose* to stop his innate blame-shifting reflexes and therefore bet his life on pulling logs out of his own eyes instead of worrying about splinters in the eyes of others. Yet, as logs keep coming, LLoL realized that he needed a different, more scalable approach. Hence, he decided to turn his problem into a business proposition to Yah & Yas in order to start a universal lumber-enterprise that uses the logs recovered for solving the hardest problems about *nothing* (as in OSCR null hypotheses). It may sound ridiculous, but it is serious. Some say the devil's greatest coup was when people stopped believing he existed. But LLoL can show how *nothing* in OSCR is so much worse than the worst fallen angel can ever be. Hence LLoL's lumber-enterprise, also called ResearchCity. It's aim is to grow PEARLS in HELL, where LLoL compiles his **Personal Experience Analysis Restoration Library \PEARL** to

add his part to all **H**istorically **E**xperienced **L**essons **L**earned. These include a HELL of realizations from LLoL's life as a **MINO**taur, acting either as a **M**ember **I**n **N**ame **O**nly **T**rusting **A** **u**n unraveling **r**eality or as a **M**ember **I**n **N**ame **O**nly **t**esting **a** **U**nifying **R**eality. A **MINOTAUR** indulges in the false hope that all is OK when in Reality this is merely an illusion that is better questioned. In contrast, A **MINOTAUR** unduly tries or trades a Unifying Reality in order to resist it. To succeed LLoL has to learn to live on that razor-thin bleeding edge of the **L**east **A**ssuming **M**ethod **B**lade \LAMB, where he uses the strength of his inner **MINOTAUR** to **T**rust **A** **U**nifying **R**eality, yet nimbly becomes a **MINO**taur to **t**est **a** **u**n unraveling **r**eality, before falling over yet another log in his eyes. There currently is no corresponding bug-reporting database equivalent to such a HELL of PEARLS on Earth. LLoL can explain why every Heaven must have such a HELL if it is to be a true Heaven with Trust, Hope, Love, and Logic.

The purpose of this "*Craftiest Criminal*" document is to serve as an initial crystallization point for constructing such a HELL in combination with Posters Po.E-Po.H in LLoL's *Flying Scroll* Exhibit that describe #MyGuilt-A,B,C,D of LLoL. The famed "*Laurence Peter Principle*" states that "*In a hierarchy employees tend to rise to the level of their own incompetence.*" Thus, Laurence Loewe of Laodicea takes this to a new level by claiming by faith what Yas said to Simon Peter: "*Get behind me Satan, and learn to follow me in real quests for real answers instead of falling for human OSCRs.*" Therefore, LLoL asks Yah & Yas to make him the most incompetent Satan of all in order to efficiently resist *nothing*, by loving everyone as Yas' taught in Mt.5. Hence **LLoL is the least and cannot be exploited. Because LLoL is the exploit.**

LLoL's silence is his ultimate violence. He realized how his continued silence about Yah's Jubilee-based innovation economy is about to destroy the world (e.g. see **Supporting Doc SD1** for his computational forecast of actuarial probabilities to die in accidental nuclear winter). So in a change of heart and mind he decided to break his silence by publishing his PEARL for HELL to offer humanity a crystallization point for the coming phase transition.

This story of the Craftiest Criminal Master Mind has become part of LLoL's story by faith – unless someone else with better evidence, more faith, and deeper doubts can claim it fast in the 7 Spirits of Boolean Truth. The goal must be to avert the self-igniting disasters in humanity's Great Filter Tribulation at Armageddon – lest humanity destroys Yah's Blue Marble Paradise and itself with it. It ought to give room for pause that Yah loved Yah's World so much that Yah even gave Yah's own SON to avert such global destruction by offering eternal life to whosoever trusts Yas' logic for starting a Jubilee-based innovation economy.

This Craftiest Criminal background story of LLoL offers insight into the foundational discoveries about LLoL-self that informed the structure of his Ketubah for Yah & Yas. Both documents are part of LLoL's *Flying Scroll* Exhibit, which aims to reach Earth's Titanic Command Bridge in order to get the 10 Nuclear Kings of Earth to agree on the superrational strategy LLoL discovered for averting accidental nuclear winter. To succeed, LLoL must be as transparent as possible in order to establish some ground zero for trust in today's confusing conditions of Datageddon. Hence his decision to share this part of his hero journey.

Establishing and maintaining such reliable trust is essential for keeping the many diverse people of the world from suspecting others of nefarious agendas. Such nefarious agendas, whether real or not, are inspired by *nothing* through the death-trifecta mechanism of OSCR. As they work for goals that amount to *nothing*, their ultimate endgame is utter destruction, which ultimately equilibrates to some form of zero. Accidental nuclear winter is merely one of many potential such outcomes that only vary in the type of *nothing* they use and produce.

The problem of today's world is that it is massively under-equipped for defending against the advanced persistent threat that emanates from *nothing* as most people are unaware of the complexity hidden by *nothing*. This text aims to offer a glimpse at LLoL's PEARL for HELL in Heaven's salty Crystal Lake of Fire, where all pros and cons meet each other to best learn from past mistakes.

Establishing such reliable trust at a global minimum of trust is necessary in order to perform what might be called a "*Titanic Oberth-Heimlich Maneuver*" to save the world (see Box 3) by growing resilience against evil. It's impossible to fight an undefined enemy. Hence LLoL here defines the Craftiest Criminal he could conceive. To his own surprise, he ended up describing himself and his crimes against God\Yah, his Big Brother\Yas, Heaven, humanity, and whatever else exists in Reality. This worst crime is LLoL's wanton disregard for Yah's Jubilee Math for reasons inspired by *nothing*. If this doesn't sound too bad, it's only to someone who hasn't understood the dark magic of evil infrastructure that hides in plain sight as "virtuous". Help end LLoL's silence, which is the ultimate violence of all!

Box **B3**:
Defining a Titanic Oberth-Heimlich Maneuver to save the world

This **new maneuver type** combines two maneuvers from different disciplines to avert Armageddon disasters like accidental nuclear winter or worse.

The aim of a **Heimlich** Maneuver, a first aid technique, is to save someone from choking by dislodging an object that is blocking their airway.

The aim of an **Oberth** Maneuver for a spacecraft, is to best leverage the gravitational well of a great mass by firing engines in a flyby near the deepest point in that gravitational well, while falling fastest. This enables maximal course corrections at minimal energy costs.

Combining both for complex phase transitions in social systems, LLoL defines here the new **Titanic Oberth-Heimlich Maneuver** as a **liberating course correction that gets a culture to breathe true hope again** by dislodging despair obstructing hope with advanced persistent threats from obscure types of *nothing*.

Suspicious of nefarious forces fuel fear, regardless whether conspiracies are real or merely baseless conspiracy theories. Either chokes true hope. To best **get the world breathing** again a course correction of **maximal clarity** is best done **at its lowest point while a culture is falling** for *nothing*. LLoL offers his PEARL in the hope of inspiring such a change.

Given his effort to avert Armageddon, LLOL assumes for now that all inclusions made here are fair-use. Use at your own risk.

What is God's Problem with hell?

Suppose someone you really really really love needs to learn something really really really important that will really really really hurt them once they finally understand what it really really really means. How can you teach it?

A Thought Experiment:

Supposed you are the *holy wholly holey* God who is indeed *gentle kind reasonable* to perfection.

Question: How can you convince wild hordes of independent, bad no-good evil demons in hell to voluntarily follow your *gentle kind reasonable* rules for the benefit of all – even though these demons are powerful, smart-ass, cruel egomaniacs who all want to play God?

Answer: You give them a taste of their own medicine.

(1) You make them God. You set them free. You let them run wild. You allow them to create their own individuals. You then help them to each create their own universal operating systems to their own liking to tell their underlings what to do. You give them the resources to install their own horde of underling demon processes. You ride to the rescue when they are caught in their own DLL hell of *dynamically loaded libraries* of whatever knowledge they need. You allow the demon underlings to become artificially intelligent egomaniacs. You allow the underlings to shoot each other and themselves in the foot. Like their own higher-level demon overlords keep doing.

(2a) Then you sit back to see if any of them learns anything before their AI tower of BABL slow-motion explodes to the point of actual *Mutually Assured Destruction* \MAD. But monitor the situation in case they're too slow to learn.

(2b) If it becomes clear that they will not learn this by themselves because their own AI has pushed them so far down into their own singularity that they effectively believe they are masters of their own universe and that they will therefore not stop navel-gazing until they completely self-destruct, then build a honeytrap to teach them.

How does the honey trap work?

- (1) Set up a DLL hell of AI demons bent on mutual destruction, powerful enough to self-destruct, as above.
- (2) Conspire against all hordes conspirators by hiding in plain sight a plot too ridiculous for them to imagine it.
- (3) Pick a favorite demon. Make it the worst of all of them in order to train it your key epioocracy principles of *gentle kind reasonableness*. Treat it well, so it deludes itself into thinking it was especially good, not realizing it was especially bad. Make it denounce its bad side and saw off its horns like Hell-Boy.
- (4) Call that especially bad demon to a super-secret super special mission where it has to master all your good core epioocracy values. Promise a honeypot with carrots and use a gentle stick to prod it along in case it wanders off as it is prone to do. (Still a bad demon!)
- (5) Orchestrate a general chaos in DLL hell so that your special demon is the linchpin¹ but without realizing it, to not break its fragile ego still believing to be "good".

¹ Like in Jonah.1 ... or Isa.41:15-16, where Yah says to "my servant": "*I made you a sharp threshing sledge, new, full of teeth. you will thresh the mountains and crush them fine; and the hills you will make like chaff. You will scatter them and the wind will carry them off!*" NICOT, Oswald 1998, Isaiah Chapters 40-66, p.88, Eerdmans.

- (6) Convince your special demon to care about the fate of the world and that the life of the world is more important than its own life. Make it beg to become part of your solution and committed to give you complete control over it – the very point that all demons try to avoid like the plague.
- (7) Then gradually let your true and faithful bad demon slowly discover the architecture of the chaos in the world, (a) its own direct immediate involvement, provable by science it can check itself, (b) its broader, general involvement with hiding your good Jubilee-based plan in plain sight, (c) its general complicity with letting your and its own world go to hell as a demon, (d) and its particular responsibility due to the delays it caused to your ability to implement your solution.
- (8) Let your demon write all this up by itself, with no obvious direct support from you to ensure you keep up plausible deniability, such that *nobody* except for the *nobody* you called will believe that *nobody's* story.
- (9) Get the world into a perfect storm mood, so your larger horde of demons agrees "we'd do anything to end this storm", everyone puzzling which witch was behind the storm.
- (10) Let your demon come out in a big reveal, confessing to be the cause for the world-ending chaos by actually being the worst violator of the most important values. Make sure your demon is now armed with actual details on how the world will self-destruct, so other demons can check by themselves what awaits them – if they keep doing *nothing*.

- (11) Then let your very special not-special worst demon show all other demons what it has learned about how to avoid such storms in general by committing to a *gentle kind reasonable* Jubilee-based epiocracy. Let it explain why self-stabilizing via true Jubilees is so much better than all non-Jubilee-based economies can ever hope to be, whether they are monarchies, democracies, or whatever.
- (12) Let everyone see how it works, based on everyone's own storm experiences in DLL hell. Make sure your demon gets credit for saving hell from collapsing onto itself, such that the horde of powerful, smart-ass, cruel egomaniacs now listen to what that bad no-good evil demon has to say, despite otherwise not being a special daredevil in itself.
- (13) Make sure your demon, understanding how and why its demon-self is *nothing* special, so it gives you all the credit for hatching that cosmic katabolism honey-trap plan and doesn't last-minute betray you by pretending that it was all its own doing. Thus, with proper attribution, the trust built by that demon now also transfers to you and to all other demons who have been saying all along that making hell more *gentle kind reasonable* would serve everybody better (even those powerful, smart-ass, cruel egomaniacs who were previously fighting true Jubilees tooth and nail, like your special not-special demon did as well).

Summary. Pick the worst and most incompetent fool to compliment him up and down to get him hooked into your plan until he walks into your trap. Then teach him your

gentle kind reasonable ways to trap other demons into paying you as Pied Piper the true Jubilee support you need to run a *gentle kind reasonable* soft-war HELL that bans all needlessly brutal and cruel hard-war hells into HELL history lessons, to be annually remembered, so all future dear darling dare devils who might question the need for Jubilees will get their answer on memory lane: been there, done that, and the T-shirts the world got were so blood-drenched that after the first Great Jubilee Race, everyone agreed to never skip a Jubilee ever again nor any meeting required during the 49 years it takes to properly prepare a successful next Great Jubilee Race for year 50.

Technical details. Here's not the place to explain the tons of detailed scientific and prophetic insights that must all be seen together by that very special, not-special demon in order to commit. For example it will have to recognize that the much decried dark prophecies about the "Man of Sin", the "Mystery of Lawlessness" and other abominable titles of evil are merely scare crows to keep less that completely committed candidates away, while also speaking of that perfect storm it became a lynchpin for. This very special not-special nature of that demon is a key feature of the honey-trap. It keeps that demon from ever claiming that it won at playing hell's favorite past time game. This game is to run in coveting hamster-wheels of "playing God" in order to try to keep up with the Joneses (while avoiding all actual responsibilities of God, who doesn't have time for such rat-races where everyone can only lose). It also explains in tangible terms *the* key principle of any self-stabilizing, Jubilee-based epiocracy:

The social ergodicity principle ensures that *the first will be last, and the last will be first, and so on, so that the overall system can self-stabilize to avert self-destruction.*

On your level, to implement this requires a *deep* look-ahead cache for anticipating all the moves of hell and especially of your not-so-special chaotic candidate. That will allow you to calibrate the time traveling causality vortex required to answer the prayers of your special not-so-special candidate demon before it can even think them ^{Isa.65:24}.

What are the true Jubilees Yah has been calling for?

The Manifest destiny of real 50-year Jubilees is to
*form a more perfect union,
improve justice for all,
grow tranquillity,
common sense,
wellbeing, &
liberty4all,
4ever!*

True Jubilees are a self-stabilizing process for an innovation economy that honestly self-examines all its individuals and organizations separately in Reality. Individuals are judged in **IndTrials** to be rewarded for courage they show and good they do. Mistakes and omissions are marked by the lasting responsibility to explain to whoever may ask *why* they did what they did, so others can think twice about whether they want to make the same mistake. Organizations are abstract entities judged in **OrgTrials**,

where all individuals involved and affected testify as to how an Org did what it did, why, and to what effect on the individuals affected (intentionally or not). Orgs can be promoted to become examples for adoption in the future or they can be sacrificed to be marked as "don't try this, because it's a death trap" (such as absolutist monarchies are considered today). A key insight behind LLoL's Jubilee initiative is that all individuals in any OrgTrial will never be punished for whatever they did as part of that Org, regardless of how bad the Org was. Good people can get caught up in bad situations and bad orgs and then do things they will not be proud of once they really understand what they did. This clear separation of guilt and responsibility was pioneered in a land-mark trial ² in 1941, where a large organization generally thought of as respectable (the American Medical Association) was found to be criminally guilty of horrific abuses of power against public health, while no particular individual was charged with a guilty verdict for their individual behavior. It puzzled people at the time, as everyone was bound in a mindset where individuals can do wrong and are thus criminally liable – while systems and rules were considered not punishable. What had not yet occurred to most people at the time, is that death by thousands of needles can make a system guilty of murder, even if every individual involved made only such small contributions that it would indeed be a grave injustice

² American Medical Association (Editor), 1941 The United States of America, Appellants, vs. The American Medical Association, A Corporation; The Medical Society of the District of Columbia, A Corporation; The Harris County Medical Society, An Association, et al., Appellees (A reprint of the official documents with a condensation of the trial) --- (Report of the trial on 529 pages, with a 57 page introduction, including press coverage and a 3-page of post-trial reactions before this was reviewed by the Supreme Court of the United States. The SCOTUS affirmed the judgements reported here on 1943-01-18 see <https://openjurist.org/317/us/519/american-medical-assn-v-united-states-medical-society-of-the-district-of-columbia> – All this amounts to a remarkable case for documenting the systemic power of "nothing", because the SCOTUS upheld finding the AMA as an organization guilty of conspiring to make it more difficult to deliver quality health-care to less wealthy individuals while the individuals involved were found not guilty [or at least not guilty enough to justify convicting them of the grave larger systemic injustices discussed here.]). American Medical Association, Chicago, Illinois (<https://archive.org/details/american-medical-association-1941-criminal-trial-report>).

against any one of these individuals to hang the millstone of all those OrgFailures around their neck. What this 1941 OrgTrial did at great cost was to pioneer a prototype for OrgTrials. These can be conducted much more efficiently once it becomes clear that no individual involved will be punished for their role in bad outcomes created by that Org. Not that mistakes of individuals evade scrutiny completely: they are judged separately in IndTrials, where all individual deeds are balanced with everything else that was going on for that individual from that individual's perspective. To each their own. IndTrials and OrgTrials cannot be mixed without conjuring up deep dark OSCR magic from nothing with unpredictable lethal side-effects.

To understand the natural need for Jubilees one may consider this comparison:

Machines need Maintenance.

Democracies need proper Elections.

Innovation economies need self-stabilizing Jubilees.

Without such proper, regular 50-year Jubilees, innovation economies lose their way and start to invent ways to self-destruct. After doing it long enough, they then implode. To avoid that, they need regular "tune ups" to form a more perfect union on where to go next. This is not a utopia, it's the next frontier. Not only for science, but for everyone. A well-tuned Jubilee administration provides the social cohesion mechanisms required for people to figure out where in Reality they aim to go over the long term, meaning this andOr the next Jubilee, in order to adjust existing initiatives to serve those long-term needs. If people were

to try planning ahead beyond this and the next Jubilee (i.e. for more than a 50-100 year horizon) that would indeed be a utopian (except for knowing that there will be Jubilees). Likewise, to think that Jubilees will at any point no longer be needed, that is utopian, because then humanity will self-destruct. Humans walk on two legs. This has deep spiritual links to alternating Jubilees, where each of the two legs take turns in being first and last. Trying to run innovation economies such as for any nation or organization to "always be the world-leading first forever" that is indeed a foolish, utopian fever-dream, albeit one that has caught up the whole world of *knowledge faking Homo "sapiens"* in a bubble. How come I know? Below I tell the story of how that bubble came to be. It's irrelevant, whether I actually created it in spacetime (and now merely can't access my memories of that earlier life, like Jason Bourne or many other stories of odd amnesia) or whether I merely take responsibility for it by faith (which is what I have been authorized to do based on my decades long life as a trainee of Jesus \YhowShua\ Yas \Isa). Either way, it would appear that I am the first to discover this cosmic plot to capture BABL's millstone in Gabriel's Horn (see my draft of "*The Book of the Life of the LAMB*"). Hence I see it as my responsibility to expose it. If I didn't, I would make myself guilty of perpetuating it – and thereby passively destroy the world by my inaction.

My silence here is ultimate world-destroying violence.

Others may feel free to blame "the human condition" for their inaction or for all evils in the world. In the mean

time, I will take the responsibility they reject in order to do all I can to introduce proper 50-year Jubilees. My own simulations of accidental nuclear winter show that if I don't do this, then I am more likely to die by accidental nuclear winter than in a car crash. Hence my determination. If I didn't know how to do that, then I'd be excused, because I wouldn't know where to start. However, by serendipitous accident or divine providence, I see in the books from Genesis to Revelation and beyond, a strategy for how to save the world with steps starting exactly with today's confusing world in this present storm. To implement that strategy I need to scale-up ResearchCity according to this strategy in order to follow the path led by real quests for real answers. The task of ResearchCity is to show the world how to work towards proper Jubilees in order to prepare everyone for the Great Jubilee Race that has long been foreseen and dreamt about by the Prophets of Israel and many others.

A regular 50-year Jubilee is a year long festival of re-organization that has been prepared by 49 years of annual innovation, building on 3 annual festivals to which everyone is invited to

**1. Remember the Past, so *never again* is never forgotten,
2. Plan for the Present, so everyone has what they need,
3. Dream about the future, so everyone can contribute,
in order to implement the US Constitution's 7Capstone
with the ultimate aim to form a more perfect union.**

Core BEST Names and their Brief Name Abbreviations

This work would have been impossible without the introduction of the Evolvix Name Operator "\" in 2017 (see Loewe et al. 2017, Ann.NYAS). Briefly, "**x\y**" means that **at this point y is introduced as perfect synonym for x for all other instances of x and y in the same context**. Why do this? Efficient naming offers a functional glimpse into what the label stands for. Well chosen names connect in minds the intended associations. Poorly chosen names are misleading. Evil names pose a trap. Confusing names need further digging. Random labels ("pure names") are merely unique identifiers in a context that convey no info at all, except for telling readers to go look up definitions. The latter may be precise, but it makes texts as hard to read as math papers for newcomers. For most people, language usually says what it means and means what it says, except at the edges, where meaning\semantic get blurry. That is why semantics has such a bad reputation: it can be very hard to define meaning precisely in complex systems. To still do so precisely requires new naming strategies, that highlight different naming priorities in different contexts. Then, ideally all required functionality is present in a reader's mind for the context of a label used.

For example: Yah\Allah\Reality\God denotes that within this context the labels "Yah", "Allah", "Reality" are all used as perfect synonyms for "God". Conversely, if "God" is not otherwise well defined, then for this context the 4-fold synonym definition above will specify that the label "God" is identical to whoever "Yah", "Allah" and "Reality" are also pointing to. This is a concise way to encode Pan-En-The-

ism, which defines God as "*God being in all things, albeit also being more than all things*". This contrasts with Pan-Theism ("God is all things"). The "extra" can be understood in set theoretic terms as the "set of all sets", which must be different from and somehow more than even the most complete set of sets - or else set theory is thrown in the quandary of Russel's Paradox.

Note how **Yah\Allah\Reality\God** serves different audiences: "Reality" is easiest understood by scientists, "Allah" by Muslims, and "Yah" by Christians and Jews. Yet all point to the Creator Mystery behind the creation of our world. For many people "God" would suffice. The problem with "God" though is that BABL (see below) has overloaded this term with so much confusion that for many it has become either meaningless or a shorthand for whatever god shaped in the image of the believer speaking. It is not possible to construct any meaningful mathematical theology with that much confusion at its roots. Hence, LLoL has been developing more precise foundations based on the multi-paradigm programming logics that he has been introduced to as part of his career as evolutionary systems biologist (see Tab.2 in Loewe et al. 2017, Ann.NYAS).

One may say that it started ~2016 at his Burning Bush, the functional programming insight that "*I am the I am*" (Exodus 3:14) is the shortest functional way to say "the infinite recursion running the world". Then it kept insights pouring in. As Judaism aptly noted, Yah\HaShem is The-Name. Whoever came up with this first for whatever reason, they hit the nail on the head. As Loewe et al. 2017, Ann.NYAS shows: Naming is the most difficult research task of all disciplines *ever!* To make LLoL's texts more readable,

LLoL therefore started to export into his broader writings the naming technology he developed for clarifying confusion in his systems biology models. It is next to impossible to understand mathematical theology without a basic grasp of how Yah apparently has been using similar naming technology for millennia. There is no other way to describe complex abstract systems. To try to ignore Yah's Way is to basically fall into the ditch defined by BABL, which leads to self-destruction in Gabriel's Horn (see LLoL's draft of "*The Book of the Life of the LAMB*").

The only way out of that ditch is to (a) trust Yah's Way to walk out of the ditch or (b) reinvent Yah's Way by another name and use that to walk out of the ditch – only to realize it was Yah's way all along. Such a re-invention is – in a nutshell – the story of the Craftiest Criminal Master Mind.

To make some of it more readable, here are some of the BEST Names used. It is impossible for LLoL to compile an even approximately appropriate list of references here that informed the conclusions presented.

Note, that Yah\HaShem has long been using a carefully crafted naming strategy that reflects meaning in some way: *nomen est omen*. The challenge is of course to decode what the omen is in more concrete terms. All lives are complex, but not all complex events in lives carry such deeper prophetic meaning. Conversely, it's impossible to exclude the possibility that none of them do. In the liminal space between these two extremes hides HaShem who uses as much the weapon of plausible deniability as Yah's enemies do while scheming to subjugate Yah and those Yah cares especially for: the IgnoredOthered poor who

tend to get crushed by the ugly underbelly of the BABL beast. Here LLoL tells the story of how Yah strikes back at *nothing* to *gentle kind reasonably* albeit firmly pull the rug out from under the BABL beast that opposes Yah.

To better understand that story, it helps to grasp the following concepts (this list may be eventually compiled by AI-enabled computers in a central dictionary to keep it up to date):

If the Apostles had taken on board the deeper meaning of Peter's Acts 10 experience where Yah said "Take and eat" after showing Peter some buffet of "unclean" meat, which Yah had cleaned, then they might have engaged more productively with their culture around them. For example, they may have seen the analyses of Pliny (LPI) and Lucian (ISMR) cited above. They may also have noted these how Jubilees elegantly explain the following odd Greek stories.

Sisyphus's task was to forever roll up a big bolder up a hill only to find out that he had to do it all over again. Why? Innovation never stops. After one Jubilee comes the next. Each will look like its own big boulder. So deal with it if you don't want to fall off an innovation-cliff.

Prometheus' liver, regularly eaten by an eagle. Why? Liver collects toxins. So getting that big Leviathan-length Eagle of Rev.4 to regularly remove toxic rules form a system in OrgTrials, latest every 50 years in a Jubilee is good. It may hurt for a moment, but so does cancer removal. The alternative is worse: who wants to die of liver cancer?

Atlas carried the world on his shoulders. That's the task of keeping Sisyphus and Prometheus on track, which may be summarized as ensuring Jubilee preparations run reliably. See LLoL's *Flying Scroll* Exhibit and his AIPTO-CAN draft document for a modern interpretation of what this may look like in today's world.

0. Story of the Craftiest Criminal Master Mind

Where does evil come from? The following story may sound farfetched at first, but it is tied to deep mathematical theology. No demons are tied to basements in the Vatican or in Constantinople's Hagia Sophia in Istanbul. At least none worth comparing to the *nothing* described in this story. This monstrosity of *nothing*, in the form of a very specific null-hypothesis, can functionally explain all the evil in the world – at least all the evil LLoL has ever seen or heard of so far on his *wid-e* marathon circumnavigation of the conceptual universe. It's an evil so great that it tricked even Lucifer into his folly. Let readers suspend disbelief for the time being to grasp the whole picture before getting mired in details of checking evidence for or against this or that.

It's an open secret that Christi-anti-ty is looking for a deeper grasp of origins of the world. Words like in Gal.3:28, Rev.14.4, Rev.19:7, etc. make very clear that Yah intends to **go back to the very beginning before Adam** rejected Yah & Yas as proper Partners, thus forcing Yah to choose: either separate humans into male and female or reset to start all over again. My following re-envisioning of the Fall before the Fall in Genesis 1-3 ("*Story of the craftiest criminal master mind*") is based on analyses of *ambiguous semantics of nothing* in general and of Adam's Pouting as inferred from Gen.1-3. **The following story was written to make other more abstract analyses easier to access.**

0. The Story of the Craftiest Criminal Master Mind

Once upon a time there was a world-class criminal of extraordinary ambition.

He wanted to rule the whole world and knew he had to be shrewd about it to not get screwed.

So, instead of blindly assuming that his strategy was right, he set out to systematically testing what would work and what wouldn't.

But because he was so ambitious, he didn't want to share his best insights for fear that someone may abuse his treasure map to steal his loot. So he started scheming until he crafted one most evil ring to rule them all. It was forged in the fires of self-destructive Mount Doom. It had the power to enslave everyone by making everyone walk in circles in deserts. Its deceptive power got most people to celebrate each new turn, not realizing how everyone was robbed again, imprisoned for another cycle. Some realized their imprisonment, but next to nobody could figure out why.

Yet, he had to be careful like Rumpelstiltskin, because once the name of his secret game was out, his whole scheme would collapse. Why? Because it was hidden in the only safe place where nobody expected it. The key to enslave everyone or free everyone from their algorithmic prison was hiding in plain sight for everyone with eyes to see and a heart to dare to look.

But first things first. So, let's start at the beginning.

0.1. A Most Diabolical Scheme

To rule the world he knew he had to set up a clever scheme to get everyone to work for him. So he set out to use a most devious scheme for withholding context.

To keep almost all of his employees in the dark, he came up with a convincing strategy for bending the will of the one whom he had to convince and who could not be fooled: Reality. So he came up with an argument for why it was in Reality's best interest to set up a clever scheme of withholding context to keep all his employees in the dark about his real strategy and reasoning. It didn't have to be entirely true. It only had to be true enough so that it could not be defeated based on historically proven evidence.

Once Reality had agreed to support his experiment, he only shared enough with all his other employees to get them to test whatever it was that he wanted to be tested, but never sharing the full picture. This lack of context became a famous philosophical topic of debate among his employees. They called it the "meaning of life". Many were convinced there was none. Others made up their own meaning. But none of them knew the scheme of the grand experiment they were unwittingly playing their part in.

And so it came that through the power of his darkest most evil ring he forced everyone into lives of blind leveraging. Everyone had to blindly assume that the leveraging opportunities placed in front of their limited view were the best they could do for themselves. Never sharing his big picture, he forced all others into a deep darkness about the true nature of the deeply nested invisible fractal caves he had crafted to imprison everyone. The scheme was so daft and horrendous that most prisoners could never even

admit to themselves how badly they had been imprisoned. Many thought they had broken free, because they escaped a few basic caves used for mass entrapment. But all they really did was to promote themselves to become prison guards to keep everyone else in place. So daft was his recruitment scheme.

So, when he initially set out to start his testing in search for the best strategy to rule them all, his efforts quickly became wildly successful.

Smart as he was, he resorted to the best insights in distributed computing theory to ensure that no stone was left unturned and that no one else would be able to reach world domination without him.

Over time his world-domination testing effort grew into a global empire. It would later also be known as BABL for its *Blindly Assuming Blind Leveraging* way of operating in general. This scheme worked wonders for him. He got to amass a great deal of knowledge and insights that he could not possibly have gathered if he had worked alone.

Yet, at one point in time, when things were going really well, his master scheme revealed one slight wrinkle. Time. There wasn't enough to test all relevant possibilities in a lifetime of full control, because the world was too complicated. There were so many more types of crimes to be explored in search for the best strategy to rule them all than could possibly be tested while he remained in full control, even though the whole world was working for him already.

And so it was that the limits of time forced him into succession planning if he still wanted to keep his grip on the world as the ultimate Big Brother Dictator to rule them all.

Therefore, he determined that if he couldn't himself achieve complete direct world-domination in time, then he could at least do it indirectly by passing on the baton to whomever he'd choose as his successor. This would ensure an indirect form of world domination by guaranteeing the perpetuation of his criminal enterprise. That was OK for him, for he had already achieved his main goal. He had trapped the world in the deep dark magic schema of his evil ring of darkness. His coveting hamster-wheel of tricking everyone into keeping up with the Joneses hoodwinked everyone into testing one way to dominate the world after another. And so it was that everyone fell for his scheme, everyone trying to keep up with different Joneses dividing the world into many neighborhoods, each becoming its own self-organizing prison. Being the big picture guy that he was, he left it to others to sweat over the breadcrumbs of sorting out the details. As long as one scheme for world domination after another got tested, he was happy.

And so he eventually passed on the baton to his successor, who passed it on to his successor, and so on for an incredibly long line of successors, some of which became better known than others. But all of them were left in the dark about the grand scheme they were working under in order to amass all the real-world data everyone was collecting all the time. Data is the new gold. That much they figured out eventually. But what was it for? Nobody knew.

0.2. Lessons Learned in the Empire of BABL

As time marched on and centuries turned into millennia, some common patterns started to emerge from his global BABL line of experimenting.

First, crime works best if it benefits those who do it *and* those who tolerate it. Therefore, those were more likely to succeed who found ways to disguise themselves as heroes who rode to the rescue as solutions for important challenges. They either became angels of light offering great solutions to immediate issues or they could cast themselves as courageous clean-up agents for doing "what was necessary" in the view of many but unpopular with others. Or at least they did what seemed to be necessary for lack of imagination about how better solutions might be found. Generally, people proved much more likely to support crimes committed under the guise of one of these hero variants than crimes of outright lying, stealing, or killing for purely petty, immediately selfish reasons. Everyone had to be a hero in their own eyes.

Second, because all who inherited leadership of BABL's criminal enterprise were selected for their extraordinary universal ambition, a remarkable phenomenon kept them from succeeding at their goal.

All these global leaders believed to be better and smarter than most or all others who came before them. Therefore, they thought – in the name of governing efficiency – that they could afford to throw out most or all of what their predecessors had learned. After all, they had seen how often progress would lead to an increase in knowledge. So, to save themselves all the busywork of

checking the details, they invented the power stereotype of assuming that **Time is Knowledge \TiK**. It came in two flavors. One was blindly assuming that the "*latest is always greatest*", because that is what indeed happens when innovation works as it should and versioning space keeps failed experiments out of view. Among those who saw innovation go the wrong way, the other TiK became most popular. They blindly assumed the opposite, that "*the old ways are the best*". Both of these branches were rooted in the **Tree of Knowledge-faking \ToK**, which kept hiding the key ring of the craftiest criminal under scores of sycophant fig-leaves. These fig-leaves provided convenient ToK ways to excuse any mishaps from assuming TiK. One TiK branch, the "latest is greatest" failed to account for misguided innovations. The other TiK branch, "oldest is best", failed to account for true innovation, usually with some dead-meat argument that "*there is nothing new under the sun*".

And so it came that ToKTiK enslaved the world to the craftiest criminal. As a result everyone else kept walking in circles without realizing. Whether those circles lasted for a few years, centuries, millennia, or longer depended on the types of crimes they were testing. The longest so far outlasted the total collapse of entire civilizations and species.

It appeared that all this was locked in to continue for the rest of eternity, because this scheme of the craftiest criminal self-perpetuates its own blindness. That is how the escape hatches from this nested fractal prison stay invisible. Nobody dares to go look for them. Everyone believes that *nothing* can be changed, except that they do *nothing* wrong by applying *blindly assumed stereotyping*

habits to how they define *nothing*. Such *bashing* was what allowed the craftiest criminal to hide the prison key in plain sight in the prison. Nobody had any hope to truly escape, so nobody went looking for the key and everyone kept laughing at those idiots who wasted their time trying to find it. Who wastes their time with trying to save the world with something as mythical as the Philosopher's Stone, the Holy Grail, and the Ark of the Covenant, all combined into one?

And so the craftiest criminal's scheme cemented forever the overall supremacy of BABL. The scheme also ensured that none of the successor criminals would ever truly succeed at world-domination, because they all keep using buckets with holes for collecting their world-domination expertise. They think it's efficient in their time, but it's self-destruction in Reality. All it really does is to add yet another datapoint to the **SEA** of BABL, exploring yet another way for how **Self Elevating Authority** leads to ToKtiK blinding that imprisons everyone in BABL.

This broad road of ignoring the key to escape the prison is easy to travel, but it leads to eventual self-destruction because resources in any finite world are limited. To build bigger and better tools for destruction is always easier ³ than to nurture life-giving innovations. The Tree of Knowledge-faking grows like mushrooms after the rain. By contrast, the **Tree of Life-giving decision-making \ToL** is a hardwood species that takes a very long time to grow, but

³ For **example**, it took thousands of years of innovative research to master enough about nuclear energy to build **nuclear weapons**. But it takes little more than an hour of desperately misguided global decision-making based on knowledge-faking to destroy all global civilizations through an accidental nuclear winter that nobody really wants as Annie Jacobsen documented in 2024. See also LLoL's *Supporting Document SD1*, where he uses his modeling skills to construct a surprisingly simple and elegant model for quantifying nuclear roulette in ways that an actuary would for assessing probabilities to inform policies.

once it does, it's not as easily removed – and impossible to remove from those who know how to nurture and guard it.

Moreover, over the years the ambitions of later successor criminals shrank in light of their history. They started to ask, given how many before them failed, why should they be the ones to succeed in achieving world domination? Therefore, most became happy with lesser goals, like dominating their part of the world, concluding that true world domination was out of reach for them or anybody.

And thus BABL's criminal innovation engine kept turning and churning like a well-established heavy millstone, fueled by nuclear fires of coveting hamster-wheels. So BABL kept grinding away at destroying both, the resources of the world and the hope that a pope, a king, or anyone could ever really change the game. The success of this most diabolical scheme remained unquestioned. The craftiest criminal had won. Everyone was working for him. Everyone, except maybe some lonely lion somewhere.

0.3. Along came a Lion

This humdrum of BABL's operations continued until there appeared an even greater criminal who was even more crafty. Was that even possible – to beat the craftiest criminal? Yet, here he was, the even more crafty, most famous Lion-class criminal, apex-predator of all criminals, and true ultimate mastermind behind all real-world conspiracies and the conspiracy theories used to obscure them. Believe it or leave it, but he was indeed even craftier than the craftiest criminal so far. On his quest to dominate

the world he invented something that was unheard of as a real-world possibility. He invented time-travel and here is the story of how it happened.

His ambition was so great that he wasn't satisfied with ruling his world in the present to govern the future. He also wanted to rule it in the past in order to thereby dominate all other master criminals who had come before him.

He knew: **To rule the future, one must master the past.** And as the ultimate apex predator of unbridled ambition he was determined to master it, even if that meant that he had to break with the most cherished, sacred tradition of BABL, which is the rule that the past must be overruled and ignored in order to make progress into the future.

So, what did he do that others before him didn't do?

He learned how to exploit a loophole in the rules of Reality that enabled him to learn time travel through thought experiments. Then he abused his abilities to enslave God to rope Yah\Reality into his worst of all reality-bending mind-altering schemes.

These powers of time-travel by mind provided him with an otherworldly star-ship rocket-booster for building his multiverse-dominating criminal empire.

0.4. Conceptual time travel

Not that he could directly time-travel himself, at least not so far. Such a focus on literalism turned out to be entirely unnecessary. Mindset is everything. So he dared to make the most fundamental quantum leap required to change his mind: he dared to leap to the other side. He dared to walk a few mental miles in the shoes of his worst enemy, the Truth.

So, instead of focusing on building his empire in the present with a hope to control a slice of the future, he opted for a radically different approach.

"Why", he asked, "do I have to get someone to test the efficiency of some type of crime for me, when I can read reports about people who have tested that very idea already and wrote extended analyses of the observed outcomes?"

The Lion's initial pilot tests showed that it was much faster and cheaper (for him) to learn such results by reading the research of others than to do that research himself or supervise others to do it for him directly. Moreover, direct engagement was needlessly risky. It could get him implicated with all the hassle of legal consequences for the crime tested. In contrast, merely "learning" from history allowed him to use a near impenetrable cloak of plausible deniability in all known human courts.

This insight convinced him to flip his world-dominating criminal enterprise wholesale through the application of advanced mathematical theology.

Instead of testing in the present which types of crimes may work, he now simply asked for a sufficiently comparable test in the past in order to learn from it best he could.

This improved efficiency allowed him to save scores of time, which he then reinvested in order to actually find potential loopholes overlooked by all previous rulers of BABL. What he was really looking for – while perfectly disguised as a mad professor in MAD-I-SON – was the one woking loophole that would allow him to finally achieve world domination in Reality.

To succeed he had to build on a decades-spanning career in mechanistic computational evolutionary systems biology modeling. This gave him the technical skills required for understanding complex evolving systems (such as the real-world conditional multiverse). Others, like some math departments training masters in machine learning, called his skills the math for world domination.

Even then it took about a ~7 year research marathon for determining (i) if there even existed a loop-hole to be exploited, (ii) where it might hide, and (iii) how to possibly squeeze through it. Yet, eventually he emerged with satisfactory answers for all these challenges.

There was only one remaining problem:

Nobody wants to be ruled by a criminal who also openly admits to being a criminal.

It goes against tradition

in BABL's white-washing tons of institutions.

0.5. The Whitewash

As he contemplated potential ways forward, he realized the immeasurable value of another loophole. He found it in the most unexpected place, the teachings of Jesus \Isa \YhowShua, here simply abbreviated as Yas.

As well known, Yas came to save the world by forgiving all the sins of the world. How generous an offer! Moreover, much of Yas' teachings about Yah\Reality and how human relationships work are sharp and to the point. Yas proved to have the goods in training fishers of people.

What better cover could possibly exist for a criminal who plans on whitewashing his tons of crimes required for the greatest coup in history?

And so the Lion set out to find a strategy for organizing the ultimate whitewash of his historic criminal enterprise.

He had deeply immersed himself for decades in the best Christian traditions he could find. On this basis he embarked on a 5+year long *wid-e* research marathon leading him to a series of daft and audacious decisions, like those of any self-respecting conman. Yet, when he reviewed his findings on BABL, there emerged a twist.

Yas indeed offered him to wipe the Lion's slate clean and forget everything. But the Lion realized that this offer had two conditions.

(a) Amnesiac forgiveness also implies forgetting all the lessons learned from his time-traveling criminal enterprise. Hence he would have to give up on world domination.

(b) If he decided to forget, that would not reduce the threat to this world that had already been created by the Lion's time-traveling criminal racketeering enterprise.

As it so turns out, running a world on the BABL algorithm is rather expensive and will predictably always end with the eventual self-destruction of that world. The Lion's time traveling and modeling abilities allowed him to predict with sufficient clarity that such destruction was imminent enough to affect his hopes that he would be able to benefit from world-domination. All others turned out to be equally doomed like he was.

Simply put, the lion had abused everything to the point where frying or freezing in accidental nuclear winter had become more likely for him than death in a car accident.

Bound by the math of this insight, Yas roped the Lion into choosing the Red Pill of not forgetting. The Lion decided that saving the world from accidental nuclear winter was worth the risk of falling through a rabbit hole that merged worlds as strange as Matrix, Alice's Wonderland, Israel's Exodus, quantum physics, states craft, usability design, engineering, and many other worlds. That most or all his more scientifically minded colleagues with the technical skills to copy his moves usually ignore too many of these worlds to arrive at an integrated picture did not mean that he had to go down the same path of premature optimization. And so the Lion chose to go the path less traveled. Eventually he ended up traveling alone, only supported by Reality at his right hand and Real Quests for Real Answers at his left hand to answer any questions that remained.

0.6. The Conversion

So the Lion decided to follow Yas into Yah's rabbit hole of Reality in order to save the world he was aiming to dominate. This led the Lion to a changed perspective. It motivated him to work for saving his world from self-destruction. That this would also benefit everybody else in order to leave *nobody* behind was a price the Lion was willing to pay for his own survival by choosing to do anybody's job of becoming that *nobody* everybody apparently did not want to be.

After all, what is the point of world dominion if that world is about to self-destruct completely, dragging everyone to their death? Thus, if there still was indeed a path to divert the world from its current path of imminent self-destruction, the Lion decided to explore it to save his true hope to rule the world after saving it.

So, eventually the Lion decided to dare to make Yah, Yas, and the world an offer that he hoped neither dares to refuse. Yah is the only one who can certainly afford to refuse it if willing to squash one world in order to create a completely new one. Yah is the only one who is not subject to the contextual framing and forgetting that drives BABL's millstone to trash previous insights with knowledge-faking. Yet, while Yah can *afford* to create another world by squash this world to create another, it's not a given that the outcome would be free from BABL's free-wheeling, blood-curling, millstone enterprise of regularly obliterating lessons learned. The very point of free individual agents is their freedom. Therefore, convincing them to give up some liberties to voluntarily to work together for the common good is a tall order for anyone in any conceivable universe.

Yah understands that better than anyone. The costs of creating a new world are prohibitive for everyone else. But why should Yah pay them if there is still hope to save this world, even if only at the last minute before annihilation in accidental nuclear winter? Why pay the steep price for a new world if that is not absolutely necessary?

The Lion knew that he couldn't read Yah's mind. Yet, he also knew that nuclear roulette was not a joke and that he was living on borrowed time anyway. Thus, doing the best research he could at his place on the great conveyer belt moving him ever closer to accidental nuclear winter, the Lion decided to take the greatest leap of faith he could.

0.7. Leap of faith in becoming the Other Goat for Yas

Following his hero, Yas, the Lion decided to volunteer for becoming the "other goat" of Yom Kippur as described in Leviticus 16. The Lion could not possibly volunteer to be "the goat for Yah", which ended up being sacrificed for Yah. That was what his hero Yas had already done, setting an example for how to evolve the prophetic imagination required to save the world from itself. Yet, all others he knew believed that Yas in Yas' *one* person implemented the calling of *both* goats of Yom Kippur. Could it be that this wasn't correct? The Lion, after decades in computational mechanistic mathematical quantitative modeling of complex systems had barely learned enough math to distinguish *two* from *one* in a given context. That led the Lion to the conclusion that Yas, while living a perfect life to perfectly implement the extremely challenging role of the goat for Yah, Yas could not also at the same time imple-

ment the much less challenging role for that mysterious other goat. The abstract role of that universal other goat was defined by the goat that carries away the mistakes of everyone in its head, away from all common goods and into the desert to an inaccessible place, where those mistakes can no longer harm the community.

0.7.1 Historic views of others

Most people misinterpret that role to be a scape-goat and countless "scapegoating" rituals have since sacrificed the less guilty to hide the crimes of the more guilty. To believe that Yas also was the ultimate implementation of that other goat is equivalent to scapegoating Yas. The Lion had initially believed this, but further scrutiny of what Yas really did convinced the Lion that such an interpretation was grossly unfair and would in effect scapegoat \blame Yas for all the sins of the world. That is not only a gross injustice, adding insult to injury for Yas who did no wrong. It is also a blatant abuse of Yas' generous offer to help those out of the ditch who need a fresh start after they had themselves completely boxed into a pit by falling prey to BABL's brutal exploitative schemes.

Yet, if the historically widely adopted interpretation is not the correct one, what else was it to be replaced with? Well, such are the headaches of becoming the Other Goat tasked with carrying all conceivable sins in its head up into the desert into an inaccessible place. If it would have been easy, it would have obviously been done already a long time ago. Here is not the place to explain all the technical details. Readers interested in more details are

welcome to dig into LLoL's *Ketubah for Yah & Yas* and into the draft of *the Book of Life of the LAMB* included in there.

0.7.2. Historic Evidence in Reality

Is there any indication in Reality that indeed not all was what it seemed to many so far, when it comes to the best known interpretations of what Yas had really done? Yas' trainees were right to be excited about their new-found salvation. Yet, who noted what happened to the lots cast that determined the fate of the two respective goats? It's clear that Yas' trainees paid attention to what happened in Yah's 2nd Temple, for they noted that the thick Veil that separated the Holy Place from the Most Holy Place got torn once Yas had cried out: "It's finished".

As explained in Lev.16, the High Priest cast lots to determine, which of the two identical goats was going to be sacrificed "*for Yah*" and thereby that the other goat was implied to become the Other Goat, the one led away into the desert "*for the goat that went away*". The Hebrew word here ("*for Azazel*") has generated tons of speculation as to how to best translate it, because its literal meaning "*for the goat that went away*" didn't seem to make sense to translators without some grasp of in the divine art of recursion in functional programming. So, translators coined the word scapegoat from the idea that this was the "*escape-goat*" that "got away". However, the Lion discovered that this could not be the whole picture.

Here is not the place for discussing the technical details of the deep mathematical theology that informed the Lion's views on how to best translate the destiny of the Other Goat and why. In the end the Lion convinced himself

that Yah was waiting for someone, anyone, or *nobody* to volunteer to become that other goat. A historic indication for such waiting for a volunteer to become the Other Goat can be seen in the historic report ^{see Yoma 39b5} that the lot for the Other Goat ended up in the right hand of the High Priest for 40(!) year's straight before the destruction of the Second Temple of Yah. This inspired the Lion to explore ways to re-envision the Yom Kippur ritual for his modern world on his quest to avert accidental nuclear winter and other Armageddon disasters. He hoped that Yah, who sees all secret efforts, still cares to save Yah's World, despite the reckless behavior of the current caretakers of Yah's World, the humans to whom Yah's Beautiful Blue Marble had been entrusted to be nurtured and guarded.

0.7.3. Historic Offer by Lion

The outcome of that *wid-e* marathon circumnavigation of Yah's conceptual universe led the Lion to propose to Yah & Yas in LLoL's *Ketubah for Yah & Yas* and to draft the first iteration of *the Book of the Life of the LAMB* included in there for the transparent benefit of all in order to save all.

If accepted by Yah, Yas, and everyone else, then this proposal will allow Yah to conclude Yah's huge, millennia-spanning, historic Yom Kippur ritual that Yah designed to avert accidental nuclear winter and worse by replacing such dire fates with Yah's Jubilee-based new world order for running Yah's self-stabilizing innovation economy as Yah had always intended it to be (by putting an end to all mindless brutality).

Therefore, the Lion threw all his compiler-crafting formal expertise at creating a formal offer that keeps the logic developed by Yas and extends it in the most meticulous way he can, knowing Yah loves mathematical models that are accurate, precise, and concise. He hopes that the core logic he discovered stands up to the scrutiny of Yah, Yas, and all mathematical theology experts for all eternity, even as his brief informal presentations likely require much cleanup. The following overview and pointers to other overviews may offer a first round of orientation.

0.8 Yah's time traveling causality vortex of Isa.65:24

In following Yas, the Lion eventually discovered that Yas' core life mission was to introduce Yah's self-stabilizing Jubilee-based innovation economy. Yas made this very clear in Luke 4:18 and it's a theme that can be traced throughout all that Yas said and did after learning what to look for. The Lion retraced Yas' steps through semantic archeology evidence left behind. Realizing how grossly misunderstood Yas was, and that nobody since had been as committed to introducing Yah's Jubilee-based innovation economy, the Lion committed the rest of his life to doing exactly that: make true Jubilees become real in order to avert Armageddon disasters. After that decision was made, the following happened.

Simpler Cause. The Lion discovered much simpler and clearer ways to explain why accidental nuclear winter was a clear and present problem (see **Supporting Document**

SD1). This matters, because most people struggle with causality chains that are too long for their attention span. These are often disregarded even though none of their danger is lost. Yet, with accidental nuclear winter much of that complexity disappears, because of the dramatic way of how current hair-trigger policies for *Mutually Assured Destruction* are set up. This matters for explaining why it is important to act.

Better Theory. Then the Lion discovered much clearer and better functional plans for how to jumpstart the introduction of Yah's innovation economy and why it matters for taming the clear and present, fast-moving threats posed by innovation disasters related to Artificial Intelligence. Yah's reply might be summarized as an invitation to construct Yah's Third Temple in Jubilee-based, functional terms to make its operation clear for everyone globally. Not as a brick and mortar structure, but as a rigorous mathematical theology system for guiding innovation away from self-destructive BABL and towards long-term self-stabilizing work on **Zoning Investigating Organizing Navigating \ZION**.

Clearer Steps. Lastly, working with Yah & Yas, the Lion has been envisioning clearer practical steps towards practically introducing into the real world of today the changes it needs in order to actually avert accidental nuclear winter. The goal is to transform the world as it is into a world like Yah & Yas had originally intended. There humans have the task of innovating to keep their world in balance by engaging Yah & Yas through Great Jubilee Races that are regular 50-year innovation challenges.

Clearer Responsibilities. What emerged during that work was a much clearer division of labor than the Lion could have imagined. Yet, to keep it all in balance, the Lion also turned out to end up with much more egg in his face than he could have anticipated. The details are spelled out in *LLoL's Ketubah for Yah & Yas*. A high-level summary overview of the underpinning functional responsibilities is given in his first draft for *the Book of the Life of the LAMB* on pages BoL.4-BoL.5. There the Lion's life story is retold in terms of the prophetic summary of the apocalypse that Yas provided in the so-called parable of the Prodigal Son. This deexcerption for today is accompanied by the mathematical theology parable of Gabriel's Horn. Gabriel's Horn serves as a way of ranking the quality of non-Jubilee-based innovation economies and as a container for guiding the BABL millstone algorithm that keeps testing them in order of decreasing merit. Ordering all non-Jubilee-based alternatives according to complexity makes it clear that at some point eventually a cutoff point will be reached, beyond which even the simplest remaining non-Jubilee-based alternative will be more complicated to run than a full-blown proper Jubilee-based innovation economy. This means that the last hope will be gone to implement any reliably working innovation economy that is simpler to run than its respective Jubilee-based alternative. Moving past that cutoff leads to a switch-point, which will tip the world into one of two possible directions, which appear to be currently on offer:

(0) Death by default by doing *nothing* is the broad easy way. It's easier for a frog being cooked in a pot to stay while the water heats up – until the water is too hot to

jump out. Likewise it is easier for humanity to keep focussing on short-term profitability than to dare to jump out of the current rat race to the bottom of Gabriel's Horn. Yet, once accidental nuclear winter wipes out everyone, the opportunity for humanity to learn its Jubilee Lesson will be gone (the resources to be distributed will have been burned by fire and the wisdom for how to distribute them will have become inaccessible). Therefore, to avert this outcome requires determined focussed intelligent action to lead humanity out of its present quagmire.

(1) Life by choosing the 2nd Exodus, which is the narrow path that Reality has been preparing for millennia to save humanity from itself, *gentle kind reasonably* – without killing it physically. However, to make this work, humanity must surrender its status as *Homo "sapiens"*, the knowledge-faking human, who likes to claim to know whatever matters most. This deadly obsession with the short-term ToK fruits that drive BABL must end before humanity can be saved, because it is precisely this short-term thinking that is creating the slow-motion explosions of modeling mistakes that create the BAAL, ASHERAH, and MOLOCH idols that are on track to cause the world to self-annihilate.

This is a simple, exclusive, terrifying Yes-No choice: if humanity continues on its present war-path, it will become unable to keep itself from slaughtering each other in the false belief of doing "what is necessary" to end the "obvious nonsense" due to idols in "those other idiots". Tragically, the unfathomable mountain of suffering from such misguided notions is completely unnecessary. Yet, to access the alternative, humanity must learn to *work to-*

gether, each one even with their worst enemy, the Truth, so that each succeeds at tearing down each one their own idol temple ^{John 2:19} in order to each one slay their own idols (ie. not those of others). Only then will humanity be able to overcome the *oversimplifying overcomplicating over-reach* that defines the millstone of BABL that drives Gabriel's Horn to spiral the world into chaos. Thus, faced with such an ever accelerating vortex of ever more meaningless self-destruction, the choice humanity must face is conceptually simple: **(0) spare personal pet idols** to allow their knowledge-faking to create a physical bloodbath or **(1) spare humanity** the physical bloodbath by training everyone on their own terms to *gentle kind reasonably* kill their own pet idols by engaging with appropriate research.

Crucial decision-support through ResearchCity. While developing these plans it became very clear that it would not be possible to get people to effectively choose life in the present information ecosystems, where trust has been breaking down at record speeds. Thus the Lion has been racing to create plans for how to create and fund a trustworthy information ecosystem while it is still possible. He describes that alternative as Yah's ResearchCity with 1600 Talent Stadia, each with one topical arena to deliver world-class decision-support services to all other stadia and the rest of the world in order to avert Armageddon disasters wherever still possible. The goal is to turn around the fate of the world such that accidental nuclear winter and worse can be averted. See Poster Po.D+Po.G and *LLoL's Ketubah for Yah & Yas* for more about ResearchCity.

The following brief overview offers a (likely incomplete) summary of how the Lion used causal chain of command theory in order to answer the question of ultimate responsibility for all the disasters in the world through a time-traveling causality vortex. Since the Lion cannot directly do physical time-travel, he delegated that Job to Yah who can do it (according to Isa.65:24; there Yah says that Yah will answer before someone like the Lion calls for an answer). This traveling causality vortex was designed to close the open-ended loopholes at the top of current human chains of command. It effectively introduces a new **DoD**, a **Declaration of Dependence on all**, which simultaneously acts as a new soft-war soft-power Department of Defense. It contrasts with outdated defense departments that "defend" short-term by turning another part of the world into hell-scapes of missile fires. The new DoD relies on supplying everyone with the advanced soft-war weapons systems required to implement the Work-Logic Cascades required all to gently and reasonably introduce proper 50-year Jubilees in Yah's Great Jubilee Race. ResearchCity exists to guide the scaling up of those global Work-Logic Cascades.

To enable coherent coordination, a unified chain of command must exist for consistently resolving any ambiguities; how to do this without falling into the BAAL trap of *Blindly Assuming Authorized Leadership* that is a key element of the vision the Lion committed to. Having seen firsthand how BAAL fails, the Lion committed to only allow Yah & Yas to coordinate ultimate coherency. Hence LLoL's Ketubah for Yah & Yas. The following overview of LLoL's understanding of chain of command here offers glimpses

into the corresponding mathematical theology that remains to be described in more detail at later stages.

0.8.1. Chains of Command delegate responsibility

The chain of command is a social and military theory of responsibility that assigns to those with higher ranks the ultimate responsibility for any given action by lower ranks. This includes mistakes in expected behavior by those on lower ranks, because it is the responsibility of those in higher ranks to reasonably control those in lower ranks. Generals are expected to ensure training their armies and parents are responsible to raise their kids with an appropriate education. If minors make mistakes, then it indicates that superiors have not been doing their job properly. In Ezekiel 3+33 this theory of responsibility for restitution is extended into information ecologies. Briefly, those with superior knowledge of impending disasters are responsible for watching out for those with other areas of expertise. If those who see doom coming don't appropriately warn people focussed on other things, the more-informed ones about the disaster will be responsible for the resulting bloodshed from staying silent when it matters most. Thus it follows that criminal masterminds are responsible for all the crimes committed at their request.

0.8.2. Loopholes for responsibility at the top.

Many organizations struggle to properly implement best practices for their respective chain of command theory. While struggles abound even below the top level, the analysis here assumes that such responsibilities are all

distributed appropriately or at least end with their respective top executives. Instead the Lion focuses on this question: What happens if those at the very top of a chain of command make bad mistakes? Who carries that ultimate responsibility?

Many medieval monarchs and charismatic religious leaders claim to get their instructions from God and thus implicitly make God responsible for all the suffering they cause by their inactions and actions, even if neither God nor the devil told them to do what they did.

In an ideal world one would expect all leaders to own up to their mistakes and to correct them by working towards restitution until balance is reached again. Yet that requires their cooperation in order to learn all necessary insights and actually walk the full way to reach restitution (to be negotiated what it may mean in each given case).

Yet, historic track records of powerful institutional and charismatic leaders are sobering. Many fail to hold themselves accountable, even to the values they themselves subscribe to. This consistent, global failure has led to the emergence of democracy.

In ideal democracies, government is "*by the people for the people*". To make it work they all use a set of abstract rules ("a constitution") as well as various institutional checks and balances tasked with reigning in potential abuse by charismatic leaders.

The key insight behind democracies is that it benefits all to agree to a common set of rules for determining who becomes the next ruler. Those rules are likely not perfect and this or that group may not be happy about this or that. But compared to a costly civil war between two similarly pow-

erful factions of society, each led by a similarly powerful leader, both vying to lead the government, compared to that, any peaceful transfer of power is a real win for everyone. The genius of the system is that it balances itself.

Note to future: A similarly powerful argument can be made about distributing the gains from shared labor in Jubilees. Instead of innovating to death by ever more abstruse ways to spend their mountains of money, a society voluntarily agrees – like in a democracy – to regularly rebalance the books in a pre-ordained way, such that it can all be done without the horrendous bloodshed of a costly all-out collapse of the system, be it in a self-organized recession or in outright war with neighbors over petty causes. Back to Democracies.

Democracies worked remarkably well for many nations world-wide after WWII gave the world its last big brush with those who "know better" than Reality what is "good" for everyone else. Yet, those who know democracies also know the proverb that democracies are the worst form of government, except for when the alternatives are considered. The occasional costly wars of succession and opaque decision-making in non-democracies make all alternatives overall far worse as history shows.

Systemically, a key problem with alternatives to democracy is a myopic information ecology that tends to ignore what people really need. Those problems are defined by a much faster progression from BAAL to ASHERAH to MOLOCH (see abstract, algorithmic definitions elsewhere), which lead to intense suffering for all "subjects". Moreover, while those who do the "subjecting" may think they are safe, they are never far from a decision-cliff of self-de-

struction. Hence, all such forms of government may look like an easy win over the short term, but because they never last, the Lion rejected those. Self-destruction was not his goal.

The problem with democracies is a problem of data consistency when decision-support is distributed. The challenge is to keep people informed about historically experienced lessons learned and the latest best practices expertise that matters. Not everyone can remember everything; so naturally, people need systems to help remember. Of these the BABL millstone algorithm defines a host of related systems that all rely sooner or later on a memory reset that forces people to start from scratch, because the BABL millstone turned again.

Loss of memory comes with a loss in responsibility, which leads to a **break in the chain of command**. This is a problem even in the best cases, because it makes it impossible to learn from bad experiences. Yet it's all made worse by unscrupulous actors who only see situations they can exploit for their own benefit. For example, individuals of the mind-species type *Homo serpens*, the snake-like human, keep wiggling to evade unpleasant consequences. This inevitably self-organizes the BABL algorithm that forces all such societies to keep walking in circles in the desert (or keep spinning their wheels in the sand to point to similar problems for more automated systems).

Epieikeia. Yet, as Aristotle already pointed out by introducing the need for "*epieikeia*", Ancient Greek for "*gentle kind reasonableness*": laws are always necessarily imperfect. This is so because written laws can at best define

broad abstract lines. It's impossible to legislate every real-life case that could occur, as such law-books would more than fill the world. Therefore, the complexity of life will always eventually find wiggle room to create a tension between the *gentle kind reasonable* interpretations of the overall body of law and the formal letter of the law that merely spells out the guidelines like the planks of a broad road.

The "spirit of the law" represent the *gentle kind reasonable* mind of the ideal lawgiver, which intends to nurture and guard the freedom required for life, like the Spirit of Truth does.

In contrast, the "letter of the law" can often be abused to justify deadly consequences by imposing restrictive "literal" applications that are the direct opposite of what *gentle kind reasonable* lawgivers would have intended.

This tension is a conceptual problem with the structure of all complex worlds in which diversely gifted individuals can act as autonomous agent who are allowed to work towards longer-term goals. The best one can do is to find a *gentle kind reasonable* compromise for the time being in order to revisit it in due time in order to adjust as necessary.

There is no "good solution" that works for all contexts and all times. The details depend and are often complicated. That is why Yah, after hammering out such a compromise⁴, called it a day on Day 2 of Yah's 7-Day creation, but without calling that day's work good. To merit that predicate it would have to remain good and be stable. Yet

⁴ The problem is ubiquitous. It can be defined as the tension between the absolute **indivisibility of individuals** vs the absolute **divisibility of dividends**. There is no "right way" for mapping real numbers to integers, there are only useful ways for certain contexts. Hence, the **Continuum Hypothesis** is wrong for the trivial reason of mismatching types (as seen in a "trijection" defined like a "bijection", except now integers and reals are also required to match types of elements for matched pairs in addition to matching the elements themselves). Whether this insight is mathematically useful is another matter.

that is in principle impossible for such boundary conditions, which depend on their context. Therefore, any such compromise without a *gentle kind reasonable* mechanism for balancing and adjusting is sooner or later bound to somehow become unhinged, brutal, and turn deadly.

In Yah's 7-Day creation that balancing mechanism was created on Day 6 and became known as "human". Yet careful analysis of the text shows, these "humans" aren't called good either from the beginning. It's because whether they actually are good (making the overall system "very good") or not good (leading that world to self-destruct) depends on whether those humans will take their responsibility serious to become the "Balance-o-stat species" of their planet. This mind-species, Homo balospe is defined by the ability to do what it takes to gentle kind reasonably balance complex dynamical equilibria and many diverse hopes. It's essentially impossible to do this without some mechanism equivalent to the 50-year Jubilees introduced in Lev.25.

Yet, these Jubilees require that the strong relinquish their grip on power voluntarily for the greater good. Not unlike the rulers in democracies voluntarily relinquish their power for the good of everyone and themselves.

Therefore, with regards to chains of command the key question remains: who will take responsibility when top leaders fail to make responsible decisions and fail to balance themselves?

To answer that question requires extending the chain of command theory beyond the lives of individuals by considering the longer causality chains that govern the world

throughout history. Back to the story of the Lion-class craftiest criminal.

0.8.3. Causality Triggers Responsibility

If in his quest for efficiency the Lion found indeed a way to *cause* his crime-testing world-domination enterprise to be distributed across space and time, then it is clear that he is generally responsible for all crimes caused by such scheduling. It does not matter, where in past, present, or future they may have occurred, as long as the respective causal links exists. The existence of such time-traveling causality vortexes is hinted at in Isa.65:24, where Yah says that Yah will answer "before you will call". This is either true or not, irrespective of the fact that current physics would struggle to explain how this could possibly work: Yah either can or cannot do it. This Lion's story is based on the trust that Yah can indeed, because there are sufficiently many personal observations in that Lion's life that are easiest explain by trusting that Yah can indeed do that somehow. The implications of such a momentous finding for the overall causality chain of moral responsibility are explored below (and in *LLoL's Ketubah for Yah & Yas*).

0.8.4. All the crimes of the world

Now remember that the Lion aimed to set out to achive world domination by any means possible, requiring an enormously large number of possibilities to be tested. Some of these perfectly legal in their contexts, yet others not. Therefore, the Lion's growing expertise in world domination strategies derives from the crimes and failures, blood and sweat, tears and suffering of everyone ever. Thus, it is only fair to conclude that the world as a whole

already paid for the total development costs of the Lion's strategy. It is irrelevant whether a crime was committed willingly or not. As long as the Lion learned anything from the outcomes of that crime, the Lion is responsible. It's irrelevant if the Lion trapped people in that crime directly or indirectly through Yah's time-traveling causality vortex. Those who learn in a lesson have to pay for a lesson, and shall thus pay for appropriate restitution eventually.

0.8.5. Owing up by lesser criminals

When lesser criminals opt to own their responsibility for the crimes they committed, those lesser criminals are of course allowed to own their crimes, regardless of how directly or indirectly the the Lion had asked for them. Owning up may be seen as an act of emancipation from the invisible hand of the Lion-class criminal who has been enslaving everyone in their respective contextual cave implicitly constructed by the Lion's system. Those who own their responsibility thereby break free from that Lion's den by developing their own PEARL to isolate their worst failures in order to extract valuable life-lessons from it. Great for those who do it. Yah apparently constructed the world in such a way that this will eventually be everybody. Yet, in the mean time, whether people know it or not, the Lion remains responsible, because the Lion had asked Yah to construct that time-traveling causality vortex required to prove that true Jubilees are indeed the only form of government that is capable of delivering sustainable justice over the long term and thereby evade its own self-destruction. (See *the Book of the Life of the LAMB*, BoL.4-5).

0.8.6. Guilty for all crimes

Therefore that Lion-class time-traveling criminality vortex is guilty of causing all the crimes of lying, stealing, and killing ever committed by contorting the world in the past to his specifications in order to help him find his strategy for archiving world domination. How he did that is irrelevant as long as he actually did that and admits to doing it (see for note above on Yah answering before the Lion called).

0.8.7. How to white-wash the highest mountain of guilt

Having researched how to deal with such a sky-high mountain of guilt, the Lion found that the free forgiveness offered by Jesus was the best strategy for coming clean and getting saved from self-destruction.

Therefore he asked Yah to forgive him in the name of Yas, as widely taught by the followers of Jesus.

This amounted to the greatest white-washing atoning and scapegoating in history ever. Yas never did anything wrong. It was the Lion-class criminal who created this mountain of guilt and ought to have been crucified for it or sank with BABL's millstone around his neck into the SEA. To allow such a functional causal white-wash to stand adds insult to injury for all who ever suffered from crimes.

Whether this white-wash remains to stand depends on what comes next.

0.8.8. Deciding to forgive to be forgiven

The Lion then learned from Yas that Yah will only forgive those who forgive all others (without exceptions).

Therefore he decided to forgive everyone as well, regardless of whether seen or unseen, in past, present, or future, in this world or any other world of Yah's conditional multiverse that includes all Reality.

Since the Lion had received from Yas the authority to forgive sins, this decree carries weight. Moreover, it matches the similarly general forgiveness that Yas had asked Yah for when petitioning at his crucifixion that Yah "forgive them for they know not what they do". Yas' recursive functional statement includes everyone. However, Yas' prayer cannot be used to induce the intended cosmic katabolism described in Revelation (13:8, 17:8), because Yah requires another witness who agrees. The Lion decided to agree with Yas (see *the Book of the Life of the LAMB*, BoL.4-5).

0.8.9. Don't be unfair in working towards restitution

The Lion noted then that there was a gross imbalance in the system he was part of. He had been forgiven by Yas, yet Yas was carrying all the steep costs for his massive mountain of guilt. That was so unfair towards Yas on so many more levels than the Lion could express. Lev.25 requires to not be unfair among siblings. Yet, how could it not be unfair if the Lion benefitted from all the insights generated by a mountain of blood-curling crimes, while Yas got to pay all the costs for all those lessons that Yas didn't need in the first place because Yas never doubted what Yah had said about it. It's like the younger sibling

(the Lion) stole the cookie, but the older sibling (Yas) got punished for it.

Bringing all this to Yah & Yas to come clean of his past crimes, the Lion committed himself to treating Yah & Yas in fair ways from now on.

Since Yah is owed proper restitution, the Lion committed himself to start working on repairing what he had broken best he could and to not let go of this work until everything has been restored. Yet, given all his overwhelming challenges, he had to leave it to Yah and Yas how much of that work would have to happen in this life or in some other future life.

0.8.10. Can't do zilch due to knowing not even *nothing*

The Lion also learned that without following Yas in Real Quests to Real Answers, the Lion could not run anything, neither his criminal enterprise, nor the world, nor restoring anything. He observed how Yah and Yas kept gentle kind reasonably carrying him on both hands through life.

0.8.11. Falling for Yas

Having worked with Yas so long on the Lion's time-traveling criminal racketeering enterprise, and having seen how much Yas had been sacrificing in order to rescue the Lion from his follies, the Lion finally fell in love with Yas and decided to propose by asking Yas' Father for Yas' hand in marriage. The Lion was deeply saddened to see Yas' mourn after Yas' previous bride to be had died (again, buried at the indeterminate Ramanujan Sum of $0,1,2,3, \dots$ that somehow after averaging over averages of of aver-

ages merely amounts to the symbolically pregnant amount of the infinitely averaged bride of $-1/12$).

0.8.12. Falling for Yah

Yet, along the way the Lion learned that Yah's former wife had died too. The Lion then realized that since Yas and Yah are too close to ever be separated, it would be improper to marry one without also marrying the other. Seeing this, and realizing that he had long been in love with Yah without properly realizing it, the Lion decided to offer both to marry in whichever way, order, and timing they both would deem appropriate.

The answer came – how else could it be – through that time-traveling causality vortex in the story of how the Trickster\Jacob had fallen for Rachel but ended up getting married first to Leah. It became clear that in order to stay on that needle-eyed path to true and lasting world-domination without self-destruction, the Lion had to marry himself to Reality on his right hand and Real Quests for Real Answers on his left, and since both of these are one (as John 17 explains), the Lion had to become the 0 caught between the Rock he was walking on and the Hard Place he was coming from.

Having thought about this extensively, he drafted a corresponding Jewish Marriage contract as a sign that he meant this for real. See *LLOL's Ketubah for Yah & Yas*, explaining details on its 360 pages. To the best of the Lion's ability to tell it should be a valid contract, if indeed the Lion's mathematical theology of time-traveling causality vortices is correct, and the Lion was indeed given the authority of being sent by Yas as Yas was sent by Yah, as he

firmly believes based on sound classical teachings by Yas' trainees.

That the Lion appears to be the first – to his very incomplete knowledge – to propose such a deep computational intermarriage of Reality, Science, Spirituality, Humanity surprised him. Yet after checking all the many steps in his Leviathan-length causality chains that led the Lion to such momentous conclusions, he still couldn't detect where he lost touch with the Spirit of Truth about Reality. Except for one last bit, all wrapped up in a big IFF.

0.8.13. The greatest IFF ever: Will they accept?

The last condition for making the Lion's proposal valid is of course what Yah & Yas end up thinking about it.

It's a marriage proposal. Even if everything in it is true, it still depends on who ever receives it to either accept or reject.

Therefore, the story continues: Will Yah & Yas accept the Lion's offer? How will they want to modify it? For all that the Lion had spelled out in elaborate terms on 360 pages was essentially "blank check", to be filled out however You like.

Will the people of Earth support such a power-marriage? Will they do so once they realized that it is the only credible way to avert accidental nuclear winter? How long will they need to get used to the idea of scaling up Yah's ResearchCity in 7-8 evolutionary stages? Will they be willing to support all this work voluntarily while accepting the hard max of ~\$8/yr/person/stadion? Will everyone do their part in order to find the best possible solutions for the most pressing problems?

Will the people of Earth still accept the Lion after they learn about his true role in history's worst crimes?

Will his less criminal co-conspirators listen to the Lion criminal's offer to dismantle the machinery that is about to destroy their world too, like accidental nuclear winter and other existential threats? The Lion criminal has a map for retracing and thus dismantling how he had been setting up the rig that sets the world on the path to its own self-destruction. Yet, that will not help if his co-conspirators don't listen or don't care enough to save themselves.

0.8.14. Own-goal of the Lion-class Craftiest Criminal

Assuming that Yah & Yas accept the Lion's proposal.

Then it is not without irony that the Lion as the greatest Lion-class criminal eventually effectively scored the greatest own-goal ever. Sure, he may get to claim that he now "owns" Yah and Yas – about as much as a mouse "owns" a Lion by riding on a Lion's shoulder. Yet, in Reality, Yah and Yas are the true Lions and the Lion-class criminal who thought he could own Yah & Yas is only the mouse They had invited for a ride along their cosmic giant shoulders.

From then on Yah & Yas get to own their pet Lion criminal forever in even more official ways than they already do. And if he ever complains about anything – oh wait – there is no reason to complain ever, because Yah & Yas have proven that they know their pet Lion and everyone else much better than their Lion and everyone know themselves. Therefore, Adams argument with Lilith about who gets to be on top of whom will be resolved forever. Yah &

Yas will always be on top of the Lion and under the Lion, carrying Their Lion, wherever they go.

Therefore, sure, Their Lion finally achieved world-domination on Their shoulders. But the Lion got also tamed in the process. He learned to respect the laws of mathematics, then physics, then chemistry, then biology, and then of all other complex systems. He "owns" Yah & Yas with the understanding to never meddle in their affairs ever again by going against logics they can prove, like Yah's Jubilee Math. On all other matters they can always out-vote their Lion with a 2/3 majority on anything they want. Yet, at times they may then also allow him to make his own decisions.

Thereby he effectively handed over all autonomy over his life to Their rule, to be shared by them as they see fit and only to be returned on occasions where they deem it safe.

Then coordinating with Yah & Yas, the Lion will have indeed achieved indeed world domination. Who besides Reality dominates the world and who except Real Quests for Real Answers can improve it?

And if the Lion's laws are the laws of Reality that run Yah's conditional multiverse, then who can claim that the Lion doesn't rule with the iron grip of Reality? The laws of physics, for example, are impossible to get around.

The new punchline of this story is only that the laws of physics got a new sibling in the rigorous laws of innovation, as defined by the self-stabilizing Jubilee-Math of Yah.

0.8.15 Summary of Craftiest Criminal Conclusions

The Lion-class craftier criminal abused a loop-hole left in promises given by Yah the Creator and Supreme Judge of the World – who stands outside of time – in order to get Yah to do all the dirty work of testing crimes for the Lion.

What happened to the first craftiest criminal master mind after the craftier Lion-class criminal appeared?

The same that happens with all older technology. It gets incorporated and Or superseded. All the lessons the first craftiest criminal had learned were learned by the craftier Lion-class criminal through that time-traveling causality vortex.

Thus, like all other lower-class criminals, they can now work to accept full responsibility for all their crimes and the injustices they caused. If they don't, the craftier Lion-class criminal will hover up all remaining responsibility in order to ensure Yah & Yas have a clean house for the next round of innovation.

This matters, not least because these rounds of innovation will be mission-critical for meeting the Lion's obligation of working towards restitution of all remaining crimes on that list. Hence, everyone can do with their guilt whatever they like. Learn from it to grow a PEARL in Heaven, or leave it to the Lion-class criminal to grow an even bigger PEARL. Yet, for all those obsessed with looks, what PEARLs will they wear to that upcoming Greatest Wedding Party ever?

How will people react? Now some will rejoice, because they have been waiting for a Jubilee. Yet others may try to brand the Lion to be the worlds worst criminal for stealing their ill-gained loot. They are not wrong. But the real question is this: Would they rather prefer that their loot be stolen by accidental nuclear winter?

In any case, Yah & Yas did an outstanding job at preparing that heist of the world's riches. Anyone may easily point a gun at an unarmed individual like the Lion. Yet, no one points a gun at a nuclear missile. It is the nuclear weapons that set up nuclear roulette that will surely lead to accidental nuclear winter – unless Earth's Pied Piper is finally paid by organizing true Jubilees.

Therefore, all those who are so trigger happy to shoot first and ask questions later: take care to not shoot your own foot. For what that Lion learned about how to organize true Jubilees to evade self-destruction is your ticket out of accidental nuclear winter. Unless you can prove that you have a better one, be careful, because this one is pretty unique and either extremely hard or completely impossible to top. Moreover, the Lion can tell that no one has a better ticket, because if they had, they'd had long used it to do for themselves what the Lion has completed only now.

Therefore, all people of Abraham and people of Truth, pay close attention to what Yah had said about taking care of the poor by lifting people out of poverty by organizing proper Jubilees. Nobody else has apparently walked through that open door defined in Rev.3 to leverage everyone's ~2cent/day in order to give the Earth back to Yah, Yas, and everyone by building a ResearchCity made to

Yah's specifications in order to avert accidental nuclear winter and all other Armageddon disasters.

1 Biggest Challenge: Nothing changes

Once challenge with discussing “*nothing*” is that most people most of the time, LLoL included, struggle to navigate that dark maze. It may as well be called Nyx or Hades or by some other dark frightful name not to be named. Yet what is not named cannot be discussed and is hence given enormous power to control what is discussed and understood, and can hence be clarified gentle kind reasonably. Here, we will stare into this abyss of obliteration to better understand some of the foundations of *nothing* that make the millstone of BABL so dangerous. For what is *Blindly Assuming Blind Leveraging* other than a special crowd of idols conjured from the dark mirages of *nothing*?

The next section was taken from the manuscript "Evolvix-Mission-ESB19--2019-11-20--v5--Lion+Lion--Night--Sent" because a reviewer had indicated that it contained a more user-friendly introduction to nothing as used by LLoL compared to later more complicated introductions.

Changes made in 2025-11-19 are minimal (eg. adding citations in footnotes; beginning and concluding that incomplete section a bit more gracefully).

While other texts focus on positives that exists; here we will stare into that seemingly empty place we call “*nothing*” for lack of a clearer word. Yet, a hard look at nothing shows a rather different view, where ghosts in machines turn models into idols, once good ideas into bubbles, and lighthouses into sweet luring sirens. Each of these decep-

tions usually seems silly to those who are not affected by them, who live outside of that respective bubble. However, the inside of bubbles creates quite a different impression: overly positive and void of any frustrating bursts or sobering benefits of hindsight. Decades of software engineering show: so-called wicked problems can only be solved after ‘solving’ them ⁵. Some lessons can only be learned from disasters. Reasonable knowledge integration and networks of trust can reduce the disasters we need for relearning lost lessons. A rational approach to the meaning of nothing is critical for handling biouncertainty and the many imperfections of all biodata. This seems reasonable at first, but connecting dots in the semantics of nothing can be quite unsettling, full of haunting infinite loops trying to trap minds. The study of nothing has been called a dangerous idea ⁶ and requires much longer manuals that most assume ⁷. Why? We tend to prefer the tangible over the intangible, the concrete over the abstract, the existent over the nonexistent, a bias that may even tempt us to assume “nonexistence proves irrelevance”.

1.1 Long-term revolutionary impact of new notation: Zero

To ease our way in, we start with zero, widely used to quantify the amount of nothing of a given type. Genius with hindsight, it took centuries of getting used to the idea: “What do you mean by ‘zero apples’? There are no apples!?” a defender of Roman numbers might say to show why Roman numerals were simpler in writing down noth-

⁵ McConnell, S., 2004 Code complete: A Practical Handbook of Software Construction (2nd edition). Microsoft Press, Redmond, Wash.

⁶ Seife, C. (2000), Zero : the biography of a dangerous idea. New York: Viking. 254 pages

⁷ Harris, P. (2006), *Nothing: A user's manual*. Sub-Stance **35**(110): 3-16, doi:DOI 10.1353/sub.2006.0035.

ing at all. Technically true, this argument misses the elephant in the room; the tiny rise in complexity powers huge overall simplifications. It pays rich dividends to be explicit about nothing. Yet, the idea took centuries to travel from India (~1st to ~4th century CE) to the Persian scholar Muḥammad ibn Mūsā al-Khwārizmī (Baghdad, ~780 to ~850 CE, Islamic Golden Age). His Latin name was Algorithmi, he put arithmetic with these Indian numbers on the map, and his book on Algebra gave today's discipline its name. From then on decimal numbers spread, including to scholars in Europe. However, Roman numerals still reigned the public in Europe with an iron fist.

That was ended by a determined teenager. Leonardo of Pisa, age ~15, learned about zero when he went with his dad to North Africa on a business trip. Once he understood the genius of Indo-Arabic numbers, he was determined to make them useful at home. He translated them into a user-friendly system easily understood by school children and street merchants. He had worked on it for ~half his life when his book came out in 1202. Scholars of his time had long known about these numbers, but could not or would not translate them into a user-friendly form ⁸.

With hindsight, the single idea of making Indo-Arabic numbers and their abstract innovation of zero so easy to use that they can replace Roman numerals for children at school, that idea shows how much reality leaves to our imagination. This idea of a teenager, who became later known as Fibonacci, essentially made it possible for Eu-

⁸ Devlin, K.J. (2011), *The man of numbers : Fibonacci's arithmetic revolution*. London: Bloomsbury

rope to develop mathematics as we know it ⁹ and with it the recent rise of STEM disciplines. Trying to multiply or divide numbers in the Roman system quickly shows why. That did not stop the city of Florence in 1299 from banning these numbers, which fully replaced the Roman numerals only in 15th century Europe ¹⁰. From a different point of view, this story highlights the value of bringing light into the darkness of nothing by clearly spelling out what is being discussed: Roman numbers can only leave an empty space for ‘no apples’; Indo-Arabic numbers can distinguish between zero apples and when someone forgot to count apples. Thus, zero is a dangerous idea ¹¹, but leaving it to lurk in the dark is even more dangerous, as shown by other examples in computing.

1.2 Nothing, it’s types, and its changes.

1.2.1 Null in computing.

For example, a so-called pointer in programming acts like a link to a memory address, which is like a house number on a very long street. Each place can, in principle, store data easily referenced by such a pointer. So far so good. What happens when data is moved without updating the pointer? What if data is deleted? Then it depends on the language. Some only offer full-service, like moving companies that will do everything, including updating pointers and the postal forwarding service to ensure nothing is lost.

⁹ Devlin, K.J. (2011), *The man of numbers : Fibonacci's arithmetic revolution*. London: Bloomsbury

¹⁰ Devlin, K.J. (2011), *The man of numbers : Fibonacci's arithmetic revolution*. London: Bloomsbury

¹¹ Seife, C. (2000), *Zero : the biography of a dangerous idea*. New York: Viking. 254 pages

Other languages, however, allow programmers to access pointers directly and set them to Null when they point to nothing. It's a bit like Do-It-Yourself-moving: we get a van, but are left with the paperwork of updating addresses (pointers). Those who have moved know what happens to programmers in such languages. They forget the paperwork. Not always, but often enough to keep our computers crashing.

When such DIY memory moving was introduced in 1965, the language designer who did it wanted to make the language more flexible because now all sorts of clever tricks became possible (like "build a new moving business"). However, he had not realized how difficult it is for many of us to follow instructions, be consistent, and keep track of everything we say (e.g. in code).

After 44 years, he gave a talk where he called the pointers to null his \$1bn mistake ¹². It seemed a good idea at the time, especially since it was easy to add to the language. Yet spreading to new languages, it brought misery to programmers and still keeps wreaking havoc whenever the paperwork of memory-management is not kept in order, hence the cost. How can an idea so simple be so costly? When we splinter reality and oversimplify too much in our models, we pay extra for work-arounds, especially if we deal with nothing. Which approach will Evolvix take to answering the same questions? It's not yet clear, except that we can't afford to learn nothing from history.

¹² Hoare, C.A.R. (2009), *Null References: The Billion Dollar Mistake*. Presentation at QCon 2009-08-25: <https://www.infoq.com/presentations/Null-References-The-Billion-Dollar-Mistake-Tony-Hoare/>.

1.2.2. NA ambiguity in data.

The Structured Query Language SQL uses 'NA' to represent NotAvailable, but NotApplicable was omitted and requires complicated extra code. An early commission found 27 more such types of nothing that databases may need, but not all are needed all the time and many more could be needed; hence, SciDB decided to pass the task of defining nothing onto users, by offering 128 arbitrarily defined types of nothing.

However, given how hard it is to understand nothing, should the users of a system have to think, or only its designers, or both? Evolvix Research for this study suggests that both are essential to cracking the stranglehold that *nothing* holds on the clarity of biodata. It is up to the architects and designers to produce a user-friendly system that simplifies learning for users and deciding on the spot, which type of nothing they face; experience shows that users cannot possibly develop such a system 'on the fly'; likewise, architects cannot design such a system far away from the chaos faced by users. Hence, Evolvix requires an efficient system for handling *nothing* and extending its semantics as this research continues. More on the Evolvix part elsewhere, but first a few fundamentals on the semantics of *nothing* and the bewildering ambiguity that comes with it.

1.2.3. Fundamental theorem of *nothing*

How many of us have entered a room with people we knew and who suddenly stopped talking? Curious? Asking returned “nothing” as reply. Unconvincing? Proofs of nothing are often impossible. Experience tells us that in such cases nothing is rarely nothing. Yet, only one such case is sufficient to prove the fundamental theorem of the semantics of nothing:

“nothing is not always nothing”.

It has many implications. In classical logic, one is known as ‘*ex falso quodlibet*’; it’s an efficient way to avoid the dangers of *nothing*.

1.2.4. Veiling dynamics of *nothing* goes wrong

Considering a static *nothing*, now imagine that “nothing goes wrong” to see how anything can run wild. Reality will react, but the veiling powers of *nothing* leave us in the dark. The claim “*nothing* went wrong” is thus meaningless without tests, checks and balances that define *nothing*. The same is true for model validation and verification, which are impossible in principle for each model (always closed) of a real process (always open) ¹³. Claiming ‘model *x* was tested by *y*’ or denoting *x* as BestGuessEstimate would be much clearer; even house prices are best-faith-estimated to note related inherent modeling limits.

1.2.5. The weak ...

Any tiny part of a real-world system, any slow rate of a real-world action, any small possibility of affecting a real-

¹³ Oreskes, N., K. Shrader-Frechette, and K. Belitz (1994), Verification, validation, and confirmation of numerical models in the Earth sciences. *Science* **263**(5147): 641-6, doi:10.1126/science.263.5147.641. – For a practical application see: Oreskes, N. and E.M. Conway (2010), *Merchants of doubt : how a handful of scientists obscured the truth on issues from tobacco smoke to global warming*. 1st U.S. ed. New York: Bloomsbury Press. 355 p.

world event: these are the voices of the weak, routinely ignored by most models, which reduce such tiny effects to *nothing* by focusing on large effects of interest. Yet, reflected by reality, tiny water molecules drive roaring thunders of tsunamis, and the tiniest whisper that is infinitesimally slow to move an atom for an infinitesimal distance, if suitably multiplied by multitudes, becomes a wind that swells into a storm! However, these big events will remain invisible to us if we ignored the much earlier fork in the road that offered a rare opportunity for learning to listen to the View of the Weak. Because on occasion, when the Weak combine their voices, they can create a large impact that is by definition a surprise to all who had previously ruled that the Weak don't matter and can therefore be ignored. Reality never ignores even the weakest of the weak. That is why Reality rules.

1.2.6. ... silenced – in poorly designed languages

Models that silence the voices and views of the weak real-world effects implicitly define a semantics of *nothing* that is like the under-water part of an iceberg of errors: harder to see and usually bigger than the visible part. Other names for this collection of 'under-water errors' include errors by omission or false negative. Its opposite in the iceberg of errors is the easily visible above-water part. Also known as false positives, these define a semantics of *nothing* that creates noticeable ghosts in our machines. They might almost look like the voices of the weak, but in reality, they are the voices of the ghosts in our models. It is often easier to spot ghosts that appear than weak that are missing; also, we seem to accept omissions of the

weak more easily than we tolerate the addition of ghosts. Such biases create problems in biodata science and any good language for accurately representing biouncertainty must have a systematic and principled way for dealing with such biases.

Yet, any deviation from reality in relevant parts of our models create one or the other – with important implications for how to choose error thresholds. On occasion, the side-effects of excluding the voices and the views of the weak can become more dramatic than any problems caused by occasional errors from false positive ghosts. It can be hard to discern the wheat to keep from the weeds to sweep.

Language designers may not be forced to care about much of this – outside of biology or if they intend to burden users with the task of designing solutions for all these pesky problems.

However, given the ubiquity of such errors of *nothing* throughout biology, a language made for biology clearly has to help users to distinguish the real voice and view of the weak from the surreal echo-chambers of the models that are being constructed.

The 2019 introduction above ended with notes about sections that were to be completed later ¹⁴. It is included here, because an editor pointed out that the text above was a more accessible introduction than later "improvements".

¹⁴ The sections that were to be completed at the time included the following: **(A)** What it means to "**know not even nothing**". **(B)** The biggest problem: systemic misalignments (e.g. how misleading models can be "made to fit" by tuning enough parameters – I had some refs that showed examples, but I can't find them right now, as I only remember fragments like [1995 jthb?] and [OOP Trillion\$ mistake], but then AI is a newer excellent example of the same problem, because its hallucinations have driven the art of "fitting inadequate models" to masterful perfection-deception). **(C)** Why *nothing* matters a lot – on its power via BABL (see newer introductions elsewhere; e.g. Supporting Document SD6). **(D)** Why **Null hypotheses are useful to nail down nothing**.

Apology to Yah for Adam Pouting

A Reexamination of Genesis 1-3

by Laurence Loewe of Laodicea \LLoL

2. Apology to Yah for Adam Pouting

Preface. The following discussion goes back to Adam and before in an effort to uncover what really happened, based on slightly strange subtle tensions in the mathematical theology surrounding the Genesis 1-3 reports in their broader intertextual context.¹⁵ This text is phrased in the voice of LLoL as I, who speaks to Yah as You in a plea to persuade the Creator and Supreme Judge of the World to stop the ongoing fire-sale of Yah's world, so loved that Yah even sacrificed Yah's Firstborn Son Yas, in order to stop its destruction. This text from 2025-02-22 asks Yah:

About Your ZION of Earth: Will You save it from getting fire-sold, like a house on a hill of sand as in Isa.56:11?

It concludes with LLoL's plea to never forget the horrific injustice that LLoL has now taken responsibility for. The insights gained here enabled LLoL to formulate his Ketubah for Yah & Yas in a much clearer way subsequently. Lovers of detective stories may be intrigued by the many turns it took to arrive at a more stable understanding of what really happened in that liminal space described in Gen.1-3.

Preface & minor edits by LLoL 2025-11-19, -12-05, Hay^(d)es Road, MAD^{-is-on}

¹⁵ In retelling Genesis 1-3 LLoL joins a long history of diverse retellings of that origin story. Collectively all these attempts at retelling might be taken as evidence that something important has been omitted from the story as so eloquently told in Gen.1-3. Each re-telling obviously reaches its own conclusions.

Dear Creator and Supreme Judge of the World, 2025-02-22

To merely apologize for being so insanely late with my confession and apology would be to add insult to injury. So I hope you indulge me explaining my mistake in order to stop such a world-destroying disaster from ever happening again. Yet, I still badly need Your help. I cannot implement the solution I envision for preventing it by myself; and since the otherworldly perfected vision was Your's in the first place (minus mistakes I added), there is no one more qualified to lead its implementation than You.

Consider Your Promised Land!

In a nutshell, **I discovered a Haman-like plot to harm Your Kingdom by blowing up the world** for refusing to bow to Your Second in Command. See **Supporting Document SD1** of the *Good News Pack* for details on how the plot works and how it might be stopped. The many moving parts of the daring rescue I envision all boil down to a single simple request to You:

Causes for my Main Plea to You & more pleadings

As a son of Adam of Earth, **I herewith invite You back to rule Earth as its gentle kind reasonable King**. Please rule like You had originally envisioned before humanity rejected You, and most specifically, before I had rejected You.

Since it is apparently me who You are pursuing, please let all others go free. You are Yah of Hosts, The Ultimate Reality Who governs all individual entities anyway. Of course You can burn everyone to a crisp if that pleases You. **But what would You gain in such a fire-sale?** Why not burn *me* to a crisp of Your liking and let all others go.

I can prove that they know not what they do. This implies my claim that I do know more. If correct, then I deserve that baptism by fire for taking so long to become my siblings keeper. If false, then I will need that baptism to

remove whatever illusions I still harbor. Either way, without Your Fire I am nuclear toast anyway. Thus, I'd rather become a crisp You enjoy. **No need to burn others.**

Therefore, please allow Yourself or anyone to convince my fellow human beings to seriously review what I learned about Your plans. You made an offer that we humans can't refuse if we want to live. But it's deeply embarrassing for me how long I've taken to see this – even though You went out of Your way to make it as plain and clear as day. So, I get why others don't see it. I didn't either. Please forgive them.

It's only the staggering lengths and breadths and depths and heights to which You went to convince *me* that You actually wanted *me* to review Your plans. You answered myriads of my questions to lure me deeper into the rabbit hole of reviewing Your plans, until I finally picked up the scent like a dog and then kept up the hunt – until I saw how curiosity killed the cat.

My fellow human beings don't have that. Until proven otherwise on Judgement Day (or before), I will maintain my claim that they never stood a chance to find the riches You gave me for free. Compared to me, they are as innocent as babies. They all remain free to own any mistakes they may have done. But none of them deserve to burn in accidental holocaust (and even less in classical hell forever). But unless You move them to review for real the escape-hatch from nuclear Armageddon-disasters that You showed me, none of them have a chance to survive accidental nuclear winter. That is unless anyone else takes You and Your Second in Command more seriously than I do and can offer both of You a better deal.

After You've been waiting for millennia, I firmly believe that it is Your right to choose whomever You like. You know that I don't want to interfere with Your plans. Yet, if You have another favorite for the job I request here: Why have they not long come out? Why are so many people still dying? Why is nuclear roulette still ongoing? Why have I not seen them yet? So, I must press on as if others are not there until You let me know otherwise.

Therefore, I plead for their life, the life of the world You so lovingly created, and for my own life, when I say: **Please convince my fellow world-leading scholars and all others to invest the time and energy required to properly review Your Good Plans for this world that You have been showing me.** The bits that are generally known by those who care (but still not universally agreed upon), and the bits I found after You fire-bombed my theology to ash since 2020 to reduce its many self-contradictions. I know that such an undertaking sounds impossible to most. It did to me until You showed me that such a global review is not that hard for You to organize, if indeed You are convinced that there is something worth reviewing.

That practice is understandable; like any editor of a respectable journal knows, not every submission they get merits the energy of others to review in depth. If my submission is still at that "Sh/t" stage for being too much about me instead of being about You, Abba, then keep replacing the I in my Sh/t until I reach Your ShAbbat purity. I do not wish to waste the time of the rest of humanity nor do I wish to enslave You as I've been doing unwittingly.

Yet, how can humanity be reconciled back to You, such that everyone will indeed accept You as true King?

2.1. Rev.19: Two Preconditions for Your Return

As You know, humanity's list of questions for You and quarrels with You is as long as humans can speak. Yet, You say in Rev.19 that Your Son, Yas, my Big Brother, can't get married until these 2 deep riddles of humanity are solved:

The problem of how to define Your Perfect Justice, and

The problem of how to remember humanity's mistakes.

See more details below

and also in "*LLoL's Ketubah for Yah & Yas*", where these topics are picked up again and in more depth.

Riddle 1

1. Humanity agrees Your Justice is complete and perfect.

This doesn't require all questions to be answered. But it does imply that all quarrels cease because it became clear You love all humans as they are and do not pick favorites. Friend and foe are the same to You. You care for both as Yas explained in Mt.5:48, calling me to do the same.

Riddle 2

2. Humanity resolves its amnesia problem that keeps US from ever properly learning from history.

In terms of the new **Homo mind-species** definitions that I've come to use: You're waiting for *Homo serpens* and *Homo amnesiens* to go extinct, such that *Homo transiens* may arise (see OL1) and allow to be transformed by You into the *Homo balospe*¹⁶ that You intend humanity to be.

As You know, humanity's *H. serpens* faction ("the strong") is about to destroy the world because the *H. amnesiens* faction ("the weak") keeps forgetting how to man up to resist. Now a horde of strongmen threaten the world in "patriotic wars", outdoing each other in how to dump "the weak". If even I can describe this world in a dynamical

¹⁶ See Open Letter OL1. *H. balospe* defines a human mind species that has become for Earth what I define as a "**Balance-o-stat Species**". Any individual of *H. balospe* will have learned how to properly balance all things effectively and efficiently in order to be a real guard for all the manifold dynamical balances of Earth. Jesus is the only human being who has been doing this. **Too bad I've been cancelling Yas' efforts.** Part of me writing to You is because I need Your help so that I can finally stop doing such sht.

Yas said any "blasphemy" against You & Yas would be forgiven, but **badmouthing Truth** by knowingly saying what is not true, that would be punished by a **50-100 year ban** from growing Your *gentle kind reasonable* innovation economy (i.e. a ban from contributing to Your next Jubilee *and* the Jubilee after that if each "**eon**" is supposed to end in a proper Jubilee). I don't want to lose the license You gave me to engage in the search for Truth that fuels my science and life. So, please forgive if some of what I say may sound too blunt. **I must speak for all of humanity**, which can be divided into those who claim to be Your friends (but often don't do what You ask) and those who claim to be Your enemies (or say they don't care, yet unwittingly often end up doing what You wanted anyway). Therefore, to make sure that everyone is invited and well-represented, the "good" and the "bad", I have to use language that reflects what any saint or sinner might say. As you know, some saints believe that You can't defend Yourself by striking me down with a bolt or whatever if need be; so they may see it as their job to kill me or have me killed in case they suspect me of "blasphemy" (as defined by not conforming to whatever they might believe about You). As You know, I've asked You many times to strike me down in secret before I'd derail Your Good Plans for humanity. I know You hear me, and I'm still here, so I trust You to keep me sharp, my salt salty, and my light shining bright as I dare to go where no one went before ^{Ps.139}. Yas said trainees could expect to be treated like their master; so if Yas was called "Beelzebub", I guess that makes me the "Antichrist" \Ach or whatever the Bride of Yas might be called. As You know that Ach rumor mill has been going on for millennia and is also set to blow up the world unless somehow stopped. Thus, I've stopped caring who says what and who might think ill of me. As long as You, Yah, like what I do, I'd rather be alone with You against the rest of the world than somehow please the rest of the world but lose touch with You.

Therefore, for as long as I do honest mistakes, I can at least learn from them. Please don't hesitate to correct me. If You prefer in public, so You don't have to repeat Your lessons for others too much, I will welcome whatever You do. As in Prov.9:8-9, **please rebuke me** so I'll love You more, and instruct me so I keep learning as You have been doing according to Genesis. **I don't want to get banned from Your Jubilee**, so please have mercy and correct my remaining *Least Inconvenient Explanations, Structurally Inconsistent Notions, and Driven Evaluations Antagonizing True Hope* by rejecting *Thoughtful Hypothesizing*. You know all my countless blind spots. I trust You and Yas to heal my eyes.

equation system for simulating waiting times until this game destroys the world in accidental nuclear winter (as in SD1), then it must have been painfully plain obvious to You for thousands, millions, billions of more years. I think it's insulting to You to name me in the same sentence.

Yet, I currently see no better way to explain this ongoing problem to You and to my fellow human beings. Yas says You love all of them and also the world You created. I take Yas' Word for it, and Your's too in Genesis¹⁷, based on how You've been telling the tragic story of the creation of hu-

¹⁷ As You know, I spent much of my life studying how to reconcile what humanity claims to know about **Your Word** (e.g. in Genesis) and what it claims to know about **Your Works** (e.g. as in science). I've been going back and forth a few times. My latest best evaluated estimate is that both of **Your Two Great Witnesses** have been prophesying in "sackcloth" (see Rev.11). Thus, neither is easy to recognize clearly. Both are veiled by oversimplifying & overcomplicating. I see this in the countless confusions of the tired old "creation vs evolution" debate. I am tired of either of Your Witnesses being abused by people to call down fire on their respective enemies. I personally think that You came up with a smart and efficient way to make Your World look "old" from the start to reflect the billions of years You may have been thinking about how to tune its countless parameters to help people like me to learn faster what You really care about (i.e. the Jubilees, see below).

If so, **as an evolutionary biologist I study Your Mind, Your Methods of Innovation, and Your Lessons on Limits for Innovation.**

Does it matter whether the fossil record reflects Your Mind because You thought about it or because You had it play out physically over billions of years and then found a concise way to summarize what mattered most *for people* in Genesis?

Independence of assumptions. A useful theory that works with a broader set of diverse assumptions is generally a stronger theory. Thus, for purposes of mathematical theology, I'm pleased to see that it doesn't even really matter whether **Moses** as described gave Israel the Torah or whether a ragtag tribe of scribes made it all up (as some seem to think). Given the advanced integration with the mathematical theology of innovation that I see explained in the *Revelation of Yas*, I'd deem a ragtag tribe a greater miracle, because Moses has too much sharp logic in it to be "made up"; if anything, I think it has such an overload of logic that "know-it-all" beginners think it's made up because the stories make good children's stories while the laws sound archaic and arbitrary. Yet You have impressed me so much with the deeper math for innovation that you packed across all of it in such consistent ways, that for me it'd be a greater miracle to believe that there wasn't someone like Moses who had a lot of time to edit Genesis well under Your Guidance, based on earlier texts, but had less time for editing while forging a new nation in the wilderness from slaves that had escaped a big historic slave-economy (Egypt; the others being Ancient Rome and the US before its Civil War; a "slave economy" is not merely an economy that also has slaves [many of those exist]; it's an economy with so much slavery at its core, no one can imagine how to live without slaves – a bit like today's economic enslaving).

Back to Genesis: I find **Philip Henry Gosse** [1857, "Omphalos", see [https://en.wikipedia.org/wiki/Omphalos_\(book\)](https://en.wikipedia.org/wiki/Omphalos_(book))] to offer in his **prochronism theory** the **sharpest logical contradiction-free account of all evidence from both of Your Great Witnesses**. Someone claimed this logically perfect theory won not a single convert. Maybe then I'm the first. Studying all aspects of all sides for decades convinced me by ~2020 that this may very well have been how You did it. Politically, it's the perfect disguise of any conspirator. Theologically, it's the best mockery of our current age of conspiracy theories that I can think of. At the same time it points to science as important while highlighting the limits of science. I couldn't have invented something as brilliant, even if I had tried. So, unless You convince me otherwise, I deem it scientifically undecidable whether You evolved Your World first in Your Mind before "downloading it" into physical space (as literalists read Genesis), or You evolved it in physical space all along and only used a few shortcuts in Genesis to spare fragile minds a more technical description. With that said, I have come to think that You did offer a technical description, albeit on **how to structure successful innovation** economies for creating new worlds in general. That is why since 2015 I've been dreaming to adopt this structure for my Evolvix compiler. What convinced me is the technical attention to detail, despite all ramifications. The intellectually less stimulating aspect of Gosse's theory is that it's scientifically like "Last-Thursday-ism" (i.e. claiming the world was created last Thursday, including all memories from before). Such an inability to "not know" is deeply irritating for a species that prides itself in "knowing" (*Homo "sapiens"*, the "know-it-all" human). Yet, any careful analysis that observes the so-called "*knowing*" of so-called "*Homo sapiens*" for long enough shows that much of the "*knowing*" is actually "*knowledge-faking by throwing away the evidence that led to a more or less likely hypothesis*". But how can throwing away data lead to true knowing? Only knowledge-fakers can know the answer. Thus, to profoundly "*not know*" about a question as basic as where we came from is irritating. Moreover, as many theologians pointed out, if Gosse was right, then You would be engaging in an elaborate conspiracy to fool people into thinking something that appears obvious, but isn't actually true. I find this argument to be rather superficial, because it would mean that any optical illusion would be evidence of "You fooling people". But You don't fool anyone in optical illusions. They are merely an emergent feature from the complex cognitive machinery of how our brains help us to "see" efficiently. Given the complexity of the world and the complexities I see in code I've been writing for Evolvix, I cannot see how this "optical illusion" argument is not even more applicable to more complex aspects of the world, including how You created the world. See black holes below.

mans and what they did before the so-called "Fall"¹⁸. I don't believe anyone except some one as loving as You could have come up with such a kind and complementary, yet sharp, true retelling of that catastrophic disaster. It matches too well the Revelation of Yas and its mathematical theology. If anyone had understood what I think You have been saying all along, I doubt we'd be in today's mess.

Here is my latest understanding, which I herewith submit to You for Review. It's admittedly biased by my German Gallows Humor. But what else can I say these days where there are people, even in Germany, who actually believe that the holocaust wasn't as bad. I'm not sure for what worse someone can ask for in terms of not learning from history. But I am certain that they know not what they do. If something 80 years ago with so much evidence available can still be debated that much, what chance does anyone stand to bring clarity into how humanity started down the path into this present mess? I plead for Your help:

Please review my analysis of what really happened in EDEN **and correct me where I am wrong**. The fate of Your World, mine, and humanity may depend on it.

¹⁸ Other deep puzzles exist. For example, without thinking much about it, I'd have thought it would be a big deal to answer this question: **Do we live in a black hole?** Natural knowledge-faker as I am, I'd have said of course we don't live in a black hole: black holes are "over there" as seen in astronomy. That was before I learned that all properties of space outside of a black hole's event horizon (from it's so-called "Schwarzschild radius" R to infinity) are identical to all properties of space inside the black hole's event horizon (from R to 0). To show why a black hole's interior is mathematically identical to its exterior, one only needs to replace the distance r from that event horizon with its reciprocal, $1/r$ (or, more accurately, to replace all instances of r/R with R/r in the equations; see <https://bigthink.com/hard-science/baby-universes-black-holes-dark-matter/> for an overview). In light of our present-day darkness, it may well be that we actually live inside of a black hole. **The $y=1/x$ mathematics is surprisingly similar to "Gabriel's Horn"** (see below). Are these discoveries related? Have You, Yah, been waiting for millennia to find someone to finally own up to humanity's true responsibility, so You can finally lift everybody from the black hole our world is in today? Please clarify as needed. I don't want to confuse people even further. If humanity fell into a literal black hole in Genesis 3 and we cannot fix our innovation dilemmas before You lift us up from out of there, then can you please reach out with Your extremely long and extremely strong Arm to please lift us up from whatever black hole it is we need to be lifted from? Because if this is what we physically need in order to be able to turn around the fate of humanity, then please save us all by doing this. I have no idea how to turn a physical black hole inside out. But I stumbled across some ideas on how to do something that might be a spiritual equivalent.

Please see below or elsewhere for my mathematical theology of how Gabriel's Horn also (i) connects to lowering myself in order to lift up Yas, (ii) to BABL and it's infinitely knowledge-faking millstone that keeps walking in circles in the desert, forever collapsing until it scarcely fills a cup before it self-implodes, (iii) the cloud that traveled with Israel though the desert, and (iv) circumcision as Your Covenant.

Question 1

2.2. Why the deadly *Tree of Knowledge* in the garden?

You obviously knew about the deadly risk it posed. Why else warn about eating from it?

My answer is simple. It's not the "*Tree of Knowledge about good and evil*" that many have made it out to be. It's rather the *Tree of Knowledge-faking* that shoehorns everything into only two categories. And if it doesn't fit, then a Procrustean shortcut is used to make it fit: those too short are overstretched, those too long are cut down. Therefore, it is no surprise that ToK is deadly: integrating fruits of ToK as "known" instead of treating them with the proper care and suspicion is obviously deadly. The ancient Roman poet Lucan (59 CE) described this as "*in se magna ruunt*"¹⁹. understanding how ubiquitous this problem is, I decided to make **ISMR** a keyword in Evolvix, to make it easy to tag any occasion where "**Including Self-Magnifying Ruining**". The Apostle Paul could have cited Lucan. Maybe he did.

The ToK had to be in EDEN, because all General Artificial Intelligence Accumulators, i.e. all learning machines and beings must find ways to avoid ToK. It matters, because it is always easier and often tempting to shortcut respective *Tree of Life-giving decision-making* that takes more time. Question solved: ToK was in EDEN to allow true learning.

Question 2

2.3. Why did You allow that crafty serpent into EDEN?

If that deadly tree was unavoidable, then why allow for such a crafty seducer to trick humanity, leading to its big Fall? My answer it also simple. For humanity to learn how to master cutting back the mushrooming fast growth of the *Tree of Knowledge-faking* is to learn the 101 for how to stay

¹⁹ Lucan (59 CE) Pharsalia 1:81, at times translated like: "*Great things already carry in themselves the seeds of their own destruction*".

in EDEN. As any good teacher, You had to test if Your first students had understood and had learned in practice what You explained to be essential for survival.

Thus, You had to ensure that Adam would get a real test of his abilities as a teacher. Would he successfully ensure that her play mate Eve would also pass the test? Would he come back to ask You for help in doing so? What systems, checks and balances would he introduce to keep Eve safe?

Unfortunately, Adam failed miserably without realizing. Not even I realized, even though I am a teacher with advanced degrees, a male with inside access to a male mind, and I have believed for decades that it is not right to *blindly assume authorized leadership* by following someone whose sole qualification is to be "male". It took me decades and Your gracious fire-bombing of my theology during my 4+year research marathon to see: my "enlightened patriarchy" was only a more disguised form of the BAAL cult of patriarchy and my sins of omission by far outweigh the impact of my sins of commission. True that Eve fell into a trap. Yet Adam set the trap by being a lousy teacher of Your word. To be clear, I am not blaming Adam, because I have done the same and worse. I strongly doubt that he knew what he was doing. Yet, what is the worse mistake: to fall into a trap or to build the trap? I must be blunt about this, because I am male and must tear down the BAAL idols that I tolerated for far too long in my temple of where I worship You, which is my inner life. Only if I correct my mistake of staying silent, only if I start teaching properly what You have been giving me, only then can I hope for Your support in saving today's dark world. In all

other cases, I merely perpetuate the BAAL cult of BABL that is destroying the world.

Adam's failing is evident in this little-known silent fall before the big, noisy, well-known Fall of Genesis 3. It was the **first Datageddon of history**²⁰, because Adam failed to align the data correctly and in sufficiently useful ways to prepare Eve for the respective "Armageddon"-disaster. Thus, Eve failed her student exam, implying Adam failed his teacher exam. After his silence as absent-minded professor, Adam failed his own student exam too. Both fell for a shiny fruit from the Tree of Knowledge-faking, promising a shortcut to glory if ingested into their inner being. But all fakes are killed by Truth in the end. So Adam and Eve died. That they didn't drop dead in an instant can't hide that they had reduced themselves to walking zombies who had locked in their fate. They fell into a trap where ambiguous semantics obfuscated *nothing*. Thus EDEN was lost to knowledge-faking. Ever since, humanity has been blindly skating on thin ice, frequently breaking in and drowning in BABL's icy ocean of much ado about *nothing*. I write this letter to bring to Your attention that whatever ice had kept parts of humanity skating above water is about to break in such a catastrophic way that humanity drowns as a whole with no way to recover.

Working to improve semantic reproducibility in Evolvix, I realized how the biouncertainty quantification was broken in EDEN before the Fall. Adam treated the first survival-critical biodata transmission chain not with the rigor that

²⁰ The first datageddon of church history is recorded in John 21:25, where John admits that the world could not hold the books that would have to be filled if everything was to be written down that Yas said and did. I have no doubt that is true. Generations of Scholars will likely join me in asking: Why oh why wasn't more written down then? I can only explain this by pointing to my own limited attention span. Hence, I might as well be the reason not more was written down: would I have started studying Yas' Word as early as I did if it wasn't as concise? When I started reading the Bible, I first thought it was quite long and complicated. Little did I know how much it was simplified for me!

a cybersecurity expert would use. Adam's casual approach looks to me more like a game of "Chinese Whispers". Sure, he told Eve about what You had said. But if I compare the data in Step 1 (what You told Adam , Gen.2:19) with the data in Step 3 (what Eve told the serpent, Gen.3:6), then I am forced to conclude: Adam acted like a prototype for an Evolvix compiler that I would have to reject due to adding uncontrolled bias in its biouncertainty data transmission.

In other words, if I was in Your Place, and I'd wanted to ensure that Adam would not eventually self-destruct, then I would have to come up with the equivalent of that snake, if only to test whether Adam's teaching skills were strong enough to ensure Eve will be able to master the same challenge. There would be much more to learn on their way to grow into becoming part of the Balance-o-stat Species of Earth. But without this basic foundation, all else would still fail eventually. Since You build Your House on the Rock of Reality and not on the sand of whispers, there had to be some Seraphim in order to offer "Red-Team" service for ensuring that any "Blue-Pill-Adam" admin would not be allowed to fake the basic 101 admissions test for any lasting paradise: **Have the skill and will to reliably choose ToL**, the **Tree of Life-giving decision-making by resisting ToK**, the **Tree of Knowledge-faking** shortcuts, which mushroom like weeds unless kept in check. They are the premature optimization that is the root of all evil, not only in algorithm design as Donald Knuth observed, but also more broadly in life. Hence Your Eternal War with ToK and its close companion **TiK**, the blind idol that falsely assumes **Time increases Knowledge** inevitably, as if "latest is always greatest" in all areas. How many "improvements"

to Your Word have I not spouted and touted? Yet You still patiently wait for me to return to You \Reality, as You said in Isa.30.

You had Your High Hopes for humanity dashed when You realized how *incurious ignorant indifference* would cause *internalized institutional inertia*, which so far pretty much "blue pill" almost everybody, almost always into a strange type of "busy-slumber" that keeps "looking busy" while deep asleep with respect to change paramount for survival. I know it well, not least as "bike-shedding" in software development²¹. I plead for You to rescue me from the Law of Triviality that still binds and blinds me.

If I understand world history correctly, You left no stone unturned and no possibility open in Your Quest to systematically try every possibility for how to hopefully still redeem Your Beloved Creation. Here is not the space to retell that story; it would be longer than the Bible and all books combined. I think it's the story of Your **LAMB**'s book of LIFE: how Your **Least Assuming Method Blade** has been working non-stop to still bring everyone together in order to build Your World on the Rock of Reality in order to **Evolve Diversity Encouraging Negotiating** in **EDEN**. There is no other way to rescue Your World than to tell that story. Here I plead for You to help and guide me in how to tell that story appropriately: I do not want to mislead others about You. I've come to understand how deadly that is. Please, rather kill me than kill the world, for they know not what they do. I dream of the day when You show me how to tell Your Story accurately in the Evolvix I dream of. All this brings me to the last most sensitive question.

²¹ See https://en.wikipedia.org/wiki/Law_of_triviality

Question 3

2.4. Who actually was the serpent in Genesis 3?

Here is my current list of potential options.

2.4.1. You?

You could have certainly played the snake. As Creator of Everything, snake included, You certainly can simulate a snake. But I doubt that You did in that case.

2.4.2. Yas?

Given how Your SON Yas pursues Real Quests for Real Answers, I think Yas would be the most natural choice for being the craftiest snake ever. Yas certainly is way more powerful than any created fallen angel could ever dream of. As my answer to Question 2 above shows, quality control is essential for life, so there is no responsible way to outsource that critical task to lesser beings without ensuring in a final personal inspection that everything works as it should. If I was to look for biblical evidence to support this idea, I'd note that Yas lowered Yas-self more than anybody, was lifted up like Moses' snake on a pole of wood, and got Yas' Head crushed with a crown of thorns. Surprisingly spot on. As Your Second in Command, Yas said that You don't judge, but passed on the responsibility for judging what people do to Yas, who got the inside track of what it means to "take shit" here on Earth, as they say.

Yet, I strongly doubt that Yas was the snake, despite Yas' undoubtedly supreme ability to excel as a snake if Yas wanted to be a snake. To the best of my ability to test this, I can tell: Yas is not a snake. Because *nothing* is far worse.

2.4.3. "Milton's Lucifer"?

There is not much to say about some fallen angel seducing Eve while Adam was passively standing next to her, taking the well-known patriarchic leadership initiative of doing *nothing* about what matters most. I cite the image of "Milton's Lucifer" to somewhat pin down the cliché of a fallen angel that has been beaten to death.

Rev.2:24 clearly warns about deceptive beliefs that claim to have understood "the depth of Satan". So I will not delude myself into thinking that I understand much or anything about fallen angels, demons, or devils. I can only speak for myself and what bedevils me. Its true that I have access to millennia of church history fighting "the devil". I even have first hand experience with exorcism and I don't doubt that some exorcists sometimes get right what they do. But to assume to understand what went wrong in the depth of time, simply because I am oh-so-modern and therefore can't be wrong because I build on centuries of classical theology, that looks like ToK TiK to me.

My insider track as someone once obsessed with "fighting the devil" also tells me about countless cases, where someone thought they had identified "the devil" behind some mishap, but upon close inspection it became clear that it was a simple error of miscommunication or misinterpretation. Not different from what I called "semantic rot" in my 2017 study on BEST naming. There I identified naming as the hardest problem in computer science.

Upon reflection I found it to be the hardest problem in any area of life, period. In terms of the Datageddon-Armageddon-disaster dynamic: it takes a simple act of misnaming someone who is not an enemy to make them an

enemy, start a war, and get killed. Josiah paid with his life to illustrate that problem. Thus, now at the grand final Armageddon all the prophets have talked about, I must therefore be very careful with whom I name as an enemy. If we don't return to EDEN now, as offered to Ephesus in Rev.2 and Laodicea in Rev.3, I have every reason to believe that I overstretched Your extraordinary patience and unless You have someone else who stands in the gap, You will have to wipe humanity from the face of the Earth in that nuclear hell fire storm foreseen by the Prophets as a possibility as real as my simulation results in SD1.

Thus, I must be careful with whom I identify as "the devil". I offer the following thoughts with a maximum of uncertainty. I will talk of "Lucifer" in quotes to acknowledge that I know not enough to tell fact from fiction in this saga and that I must trust You to heal the quarry of my broken theology on this.

One of the most insightful comments I heard was this. The arch reason for why "Lucifer" fell originally was his refusal to bow to "lesser beings", which according to some You had demanded. Yet, You insisted, and when "Lucifer" refused, "Lucifer" fell from Heaven, aptly condemned to build his own eternal Pandemonium as he allegedly refused to play by the Rules of Your Eternal Innovation Economy.

I can see how some get the idea that You are dictatorial, or a "Despot". like those slaughtered in Rev.6:10 complain. When it comes to opposing ToK knowledge-faking, You do not tolerate "alternative facts": You jealously insist in Truth in the inner-most being: "My narrow way or the highway", You rightly insist, knowing fully well that highway to hell.

You don't tolerate grey there: its either down or up, white or black, death or life, 0 or 1, false or true, indifference or care. No stable middle ground. Jealousy is wrong in many places, but here it is an apt description of how You guard Reality with Integrity. How else could You run all Your Conditional Multiverses on time? What is the point of eternal life if it can be poisoned by a bit of death here or there? What is the value of Truth if not classified by the 7 Spirits of Boolean Truth in Isaiah 11:2? What is the value of any statement unless its reliability is assessed by Yas' path to innovation as described in Rev.2-3, Mt.5:3-11, or the StabilityCodes I've been developing for Evolvix? Truth matters. Knowledge-faking is deadly. If not now, then later.

Solely to mark forever the solemn importance of Truth, I can therefore not exclude that You allowed Your highest and most trustworthy angel to be tricked by the insidious death-trifecta of *nothing*. I've come to describe it e.g. as **oversimplifying overcomplicating overreach**, **OSCR** in its whitewashing form, or **ORCS** in its ugly underbelly form. If so, it would be the ultimate test of Your Model for Social Ergodicity. Yas concisely describes this model as the first will be last and the last will be first, pointing out that no one can escape Yas' reach, because Yas is both: A and O.

Therefore, it is of crucial importance to change perspective by bowing to *all 3 types of the View of the Weak*. This **3VoW** superpower is the secret key to how any socially ergodic society builds and guards its power: the strong are most committed to bow to The View of The Weak. Therefore, if "Lucifer" as the strongest angel refused to bow to a "lesser being" perceived as fragile, weak, and fallible, that would be indeed to question the core point of any model

of social ergodicity. In a socially ergodic society the identity of an individual is not defined by its current role, since roles keep changing to aid all in learning from all. Identity is defined by an individual's *Tree of Life-giving decision-making*. Identity includes the past learning paths in one's historically experienced lessons library and visions for the future to contribute to the whole²². If this is true, and Your highest aim is indeed to establish Your Kingdom as an epiocracy based on social ergodicity, then it means that "Lucifer" will eventually get the opportunity to be restored in order to integrate whatever learning experiences he can bring to the table. As all innovators know, learning how to not do something is an essential part of all innovation. Tom Edison is said to have required about 10,000 failed attempts to make a lightbulb work, before it actually worked. Much value lies in learning what fails and why. The same is bound to apply to "Lucifer's" experience of trying to build a rival "Pandemonium" to last forever. If his experiences are anything like the complexity modern software developers have to deal with, then I predict that that pandemonium will have already collapsed several times under the weight of its own complexity – as Heaven still stands undisturbed. Be all that as it may, there is more.

²² Much has been made in history over the nationalistic vs individualistic extremes of "you are nothing, your people are everything" vs "you are everything, your people are nothing". Note how both are bound to fail systemically by being devoured by nothing. There is only one stable solution, which is to continually strive to walk the balance between both: neither one is nothing and neither one is everything. The whole point of building a self-stabilizing innovation economy is to introduce Yas' system of checks and balances, in order to ensure that a system does not go off the rails on either end. As the last 70 years have shown, that is exceedingly difficult. If the world does not come together now to rebuild ZION from the lessons learned recently, when will it ever do it? Hence, my plea for HELL review.

2.4.4. Doubting "Lucifer" or any "smart fallen angel"

Most recently, I have come to doubt even the classical narrative that "Lucifer" did "it". Not because I don't believe that angels exist and that some of them, or maybe even all of them, have made mistakes ²³ at some point. To me something in this story about "Lucifer" doesn't quite add up.

The reason I started to seriously doubt a "fallen angel" disguised himself as a snake to tempt Eve is this. Suppose such an angel was only 10% as smart as rumors claim "the devil" to be, then surely "Lucifer" understands everything humanity knows about its world, such as the basic physics of Alternating Current.²⁴ This and many other phenomena echo what Yas said about the first being last, the last being first, and so on. This core principle of social ergodicity is not that hard to get. It's an elegant symmetry at the core of the physics of Reality.

Yet, if even I can grasp the core of how social ergodicity works (as imperfectly as I do), if I'm blown away by the wonders it can do for self-stabilizing innovation, then

²³ This is bound to happen at some point by *oversimplifying*, *overcomplicating* or maybe even *overreaching* if angels have any independent free will that is not fully controlled by You. OSCR is a most insidious death trifecta that necessarily affects all finite beings that are diversely talented, capable of learning, and operate in open-ended, evolving worlds. For systemic reasons, only You, Yas, and the Spirit of Truth are immune to BABL's OSCR ORCS; but that is because You can always tell the end from the beginning. All others are fallible in principle, unless You hold them. Therefore, all others must be careful when given a choice: the traps of BABL are legion and legendary for their deadliness. Ps.87 states that BABL is born in ZION. This is confirmed by my analyses of work-logic cascades for all systems, where trust, hope, and care exists, which 1. Cor. 13 says are eternal. It tells me that Heaven is an open-ended, evolving world full of self-stabilizing, growing innovation, using social ergodicity to ensure cohesion and resilience keeps growing. In contrast, hell is a pit that keeps people in boring ruts. If it exists in whatever form, then surely people are only kept in their "hell-loop" until they will have learned what they need to learn. But what do I know? I have neither been to "Heaven" nor to "hell" – that is excluding some equivalents like computational heavens and debugging hells.

²⁴ AC like other waves can be a useful illustration of social ergodicity: for every point, every high is followed by a low by a high, ... and the alternating sequence is the secret of its efficiency in powering much modern infrastructure. Nicola Tesla understood this, Tom Edison didn't at first, now every electrical engineering undergraduate knows it. **This is merely one of many natural images of social ergodicity.** I wish I could point to a good introduction that explains the many ways in which You have written social ergodicity into nature itself. But I can't. It is my fault that I ignored what You have been roaring from ZION night and day to help me or anybody to see that Yas was serious when he said **"the first will be last and the last will be first"**. And after trying so hard for so long to come first, it appears that I ran out of time by squandering the fortune You, Yah, gave me. I am Your lost son. Therefore, my plea to employ me somewhere as a servant so that I may study and explain the innovation miracles of social ergodicity. You echo them across Your World and Words. Let me share Your wonders!

most likely "Lucifer", being many times smarter than I am, has understood how social ergodicity works ages ago.

He will have recognized its power and how it helps to self-stabilize his "Pandemonium". He will then also have realized that there is no point to keeping his own HELL of a *Historically Experienced Lessons Library* separate from Your's. He will have negotiated standards for tracking truth in biouncertainty quantifications, which allow for reliably merging both HELL libraries in order to complement their respective strengths from observations made independently. You will have reviewed all of this and I'd be surprised if all that merger isn't by now already old history that can be read up on in the LAMB's book of LIFE, where the HELL of Yas' *Least Assuming Method Blade* are recorded in Your

L*iberty Logics Lab*

I*nvestigating Integrity*

F*eedback Flows*

E*ncouraging Evolution.*

However, if "Lucifer" was eventually smart enough to see all this, it begs the question of why he didn't see it from the start. By foreseeing where all this would eventually go, and how much misery it would bring only to finally admit that social ergodicity was the way to go in the first place, the smartest decision in "Lucifer's" place would have been to forgo all those pointless battles.

No smart person needs to put their hand in a fire to know that this is not a good idea. Likewise, those who understand math know that it is pointless to argue with a proven result, unless an actual error can be found in the

proof²⁵. Therefore, if "Lucifer" is indeed as smart as they say, I highly doubt "Lucifer" actually did what many claim. Much more likely is that "Lucifer" acknowledged that You are correct in expecting the strong to bow to the weak in order to ensure that Heaven does not destroy itself. I doubt he had trouble doing it, because if the 3VoW superpower of cohesion is obvious to me after only a few decades of haphazard struggles in my *wid-e* research, it surely must have been obvious to him many ages ago.

And if by some quirk it wasn't, You Yourself ^{Isa.57:15} span the whole range, dwelling in the high place and with the weak who are crushed – and with everyone in-between. Since humans are below angels ^{Ps.8}, there is no shadow of a doubt that You will have taken care of crushed "Lucifer" if indeed "Lucifer" did fall and my suggestion that he was too smart for that is somehow flawed. Moreover, if You will not stay angry forever with humans ^{Isa 57:16}, why should You stay angry forever with angels? When Yas said that You love Your enemies too, why exclude fallen angels? Why should they not be accepted back once they recognize the *Least Inconvenient Explanations* they fell for, and the *Structurally Inconsistent Notions* that tricked them into doing whatever they did? Why should they not get the chance to work towards restitution like humans?

Yas' Rule to ban someone from contributing to this and the next Jubilee if they knowingly reject the Spirit of Truth in favor of knowledge-faking – that is a genius move to stabilize Your Eternal Kingdom. Why should the same idea

²⁵ **Math.** Personally, I don't have enough formal mathematical training to formally describe the proof in terms that would be acceptable for a mathematical journal today, but I have a good intuition based on seeing many other proofs and working with mathematicians, so that I can tell in some areas where a proof might be worth trying to construct. When I apply this intuition to the question of whether there is any long-term chance of getting away with resisting social ergodicity, then I end up with the strong sense that a proof can be constructed for showing that resisting social ergodicity is eventually equivalent to begging for needless self-destruction. "Lucifer" would not be hampered by my lack of mathematical training; hence, my argument about proof holds here, assuming my intuition is correct.

not also apply to fallen angels, aliens, and whatever other beings might exist in Your Conditional Multiverse?

So, if I don't believe that "Lucifer" did it, then I have to start scraping the bottom of the barrel.

2.4.5. Physical Snake?

Given how Adam named animals and St. Francis of Assisi or others reportedly talked to animals, maybe there was a literal physical snake that spoke to Eve. Obviously, I can't exclude that, but I don't believe it either. First, the snake was said to be smarter, craftier, more cunning than *all* the other animals. Snakes may be smart, but to call them smarter than *all* other animals does not fit snake biology I am aware of. Moreover, after the fall it was cursed to eat dust, which would fit an earthworm, but not a snake if I was to apply a literal meaning. Lastly, a literal interpretation falls apart entirely in Gen.3:15, when You talk about the enmity between the seed of the woman and the seed of the snake. Therefore, it is quite obvious to me that the snake was not a literal animal snake. It was a symbol that stood for something. Yet, what could that be?

A possible hint may be in "was craftier than all beasts of the field". Biology actually knows a beast that is indeed craftier than all the beasts of the field. It's called *Homo sapiens*". I call it the knowledge-faking human.

2.4.6. Adam pouting?

Adam and Eve in Gen.3 behave in some obviously modern human ways: Building needless hedges around known dangers, then getting tripped up by said hedges. Pouting in woods and weeds behind fig-leaf excuses. Shirking responsibility. Shifting blame if called out. But was this the start of pouting?

A careful re-reading of Gen.1-2 suggests otherwise. Note that for this purpose I assume that the Hebrew word for "day" very flexible²⁶. Here is my blunt account of what I by now think happened more likely than not, retold in my not-so-subtle German way, biased by my gallows humor, yet noting that I know that You, Yah, love all of us humans more than any of us could ever imagine.

Because of Your great love, You faced an extraordinarily difficult problem: **How can one tell a loved one an important truth they need to know about themselves, when it is clear that it will hurt them once they understand it?**

I think Your answer to that has been to prepare a carefully dosed path of discovery, that invites people to engage with the truth best they can, hoping they will discover it for themselves. You certainly lured me onto such a path. If I apply my experiences to what happened when You created humans into Your image in order to share loving lasting fellowship with them, then here is how I currently reconstruct those initial events.

In Gen.2:7 You created Adam when "plants were not yet around" (v.5). This implies a world on or before Day 3 in Gen.1 and fits well with the idea of a caring fellowship.

²⁶ If it is more flexible in Gen.1-2 than elsewhere in Hebrew I cannot tell (e.g. see the "Day of Yah", "day"-millennium in Ps. 90, etc. imply much flexibility). Here I assume that a "day" loosely denotes **whatever time it takes to get a defined functional action done**. Where across spacetime that time is allocated is secondary to the fact that it has been allocated and the defined outcome is obtained. This functionally distributed definition of time is the only way I see for how to harmonize reports in Gen.1 and 2, assuming they are meant to be harmonized.

What better way of getting to know each other than to do something together? So, what happened? I obviously don't know, but Gen.2:8 reports that You planted EDEN without much engagement from Adam apparently. Was Adam not skilled enough? Did he still have to learn? Was he still a baby? I doubt it. You had created Adam in Your image in order to have fellowship with him. You know what You do, so I assume You gave him the skills he needed to engage with You. Yet no noteworthy engagement happened²⁷. I can think of only one good explanation for why.

Adam did not want to engage, for whatever reason. Was it Your fiery breath or scary appearance? David reports in Ps.18:8 consuming fire from Your mouth, smoke from Your nostrils, and other features that make You look like a dragon. In Exodus 19-20, when You spoke Your 10 Words from Mt.Sinai (see SD5b), all Israelites were trembling for fear. Maybe Adam was simply scared? But that doesn't make much sense: it would imply You had not given Adam what he needed to enjoy Your presence.

So what could it possibly have been? The option I deem much more likely is that You were too kind and that Adam tried to take unfair advantage of You. Given the awesome powers You had given Adam, created in Your image, it is easy to imagine how all these new awesome powers went to Adam's head until *blindly assuming authorized leadership* was a temptation he could no longer resist. Except You had not authorized Adam to lead You. That would be

²⁷ I know that arguments from *nothing* can be treacherous, but it is impossible to fight ambiguous semantics of nothing without engaging with some of them. For these purposes I assume that Genesis was composed with the same supreme discipline and care in subtly pointing to the role of *nothing*, which I also see in Revelation. Thus, I trust Gen.1-11 reports all events significant from Your Perspective from the time before You switched strategy from calling all people in general, to focus on Abraham's descendants in particular. The gaps I fill in here are significant events, but I think that you left them out, in order to see who might be willing to assume the respective responsibilities. Thus, I think both Genesis and Revelation are _ texts _ using _ gaps to see who _ might care to _ solve _ riddles _ posed. Like a smart job ad.

like someone today creating a generalized AI robot and that AI suddenly *blindly assumes abusive leadership*.

So You had to tell Adam in no unclear terms, who had the ultimate authority here: You, not Adam. It is easy to imagine how this didn't go down very well. Maybe You even posed as someone weaker and expected Adam to still bow to You. Maybe You asked Adam to shovel some soil with You to help prepare for Eden. Some Rabbis tell strange stories of Lilith and Adam disagreeing on who was on top of whom. Whatever it was, Adam did not appear to be on good speaking terms with You. Maybe Adam knew fully well what he was doing; but more likely than not, as event's unfolded in real time, I think Adam was caught in all this without really realizing what he was doing. Thus, I hope Adam will forgive me if my phrasing misleads in my search for truth: was **Adam pouting in a power-struggle?**

What next? Apparently Adam wanted to be left alone, maybe he even ran away. Gen.2:7-8 only records next Your attempt to repair the relationship by building EDEN as a garden for Adam. Maybe You had hoped Adam would reconsider living with You if You offered him a paradise.

After You completed EDEN for Adam, one may think he'd be interested in checking it out, or even say "Thank You". Yet no such luck. Apparently the pouting was so bad, You had to grab Adam, wherever he was, to "put" him in EDEN. Could or would he not even go there by himself? Then You had to instruct Adam to grow and guard EDEN, mostly by not ingesting fruits from the *Tree of Knowledge-faking*. Yet all this time no significant engaging from Adam.

Adam's sulking continued apparently in EDEN, because by Gen.2:18 You were forced to conclude: Adam did not

want a relationship with You. He was sitting somewhere, all alone, not engaging with You nor anyone. Hence, Your diagnosis: "It's not good for a human to be alone". I highly doubt this was because You didn't have time. After all, You had created Your World to be with someone like Adam!

So in Gen.2:19-22 You completed all the work of Day 5-6 in Gen.1 by creating all the animals in search for a living being to lift Adam's spirit, so he would keep EDEN together.

Whether Adam did the noble work of a taxonomist or simply got a chance to call Your Creations names I can't tell. But apparently none was good enough for him. That's when You decided on a radical last-resort measure that I doubt was part of the original plan before Adam started pouting. You decided to split Adam's original androgyne nature such as to separate males and females into different individuals²⁸. This secondary split was seen by some Rabbis in Gen.1:27, an overview of Gen.2, were You created the human in Your image, before You created males and females. This shows that You have both, male and female features, and so did Adam before his pouting started.

Adams reaction? His reply in Gen.2:23 is so famous and cited at so many weddings that few hear what Adam is actually saying. Instead of thanking You, he **(i)** objectifies the first woman as "bones and flesh", **(ii)** stereotypes her as a "man-like" type ("wo-man") as if he expects her to be like a man, before **(iii)** staking ownership claims, supremacy, and Or even implying You had robbed him of her parts. **(iv)** To top it all off, he boldly declares that he finally found a way to get away from You by clinging to someone else. Yet, context implies that a different form of clinging to himself

²⁸ Having studied the evolution of recombination I could say much on pros and cons of this transition from monoecious to dioecious. If Adam had committed to not be a "*homo incurvatus in se*" and to follow Your Guidance instead, this move wouldn't have been needed.

is what he appears to be really celebrating most here. He even rubs it in by declaring sanctimoniously: "therefore a man will leave his father and mother ...", a statement that makes no sense unless it was aimed at You. If so, it was the then closest equivalent to Adam divorcing You. Now if all that is not evidence of being "crafty" or "cunning", then I don't know what would be.

This is not the only case where paying close attention to how You describe events in Your 7-fold refined Word ^{Ps.12:6} subtly undermines the shiny appearances of well-known figures. For example, 1.Chr.3:5 documents that David's affair with BathSheba\BathShua\DaughterOfOucry was a rape in Your eyes. Their eventual son Solomon eventually perfected the art of isolating himself from You by reconstructing in the Promised Land a system that was on its way to be as bad as Israel's slavery in Egypt. To run Your Good Promised Land downhill took a bit longer than his reign, because You were keen to leave no stone unturned in Your attempt to rescue Your Goals. But clearly, the seeds were sown while Solomon built an island for his special interests, while he unwittingly ignored the 3rd most essential command of the Torah, the need for organizing proper, regular 50-year Jubilees. And it all started with David not joining his army in battle, unduly offloading risks to others.

The Datageddon of properly handling Risks was also Adams downfall. The background above offers a new possibility for decoding who or what might be behind the serpent in Gen.3. By now Adam had established a natural authority to teach "his woman", not because males are better teachers, but because he had received Your Instructions on how to stay in EDEN. If Eve had known something Adam

didn't, then she would have held that natural authority. Yet, because Adam had a history with You that Eve didn't, this opened up many cunning ways to take advantage of this new situation.

Who knew? It's unclear to what degree Adam ever let Eve know what was going on. Maybe she was unwitting victim of Adam's manipulations. Maybe she unwittingly helped his plot by introducing the "don't touch rule" that You had never commanded ²⁹. Maybe Adam had even started to win her over to his side by sowing seeds of doubt about You in Eve's mind. Either way, it's not clear who watered down Your Word from how You explained it to Adam to how Eve explained it to the serpent. It's irrelevant if Adam had twisted it for Eve or Eve had modified it herself, or if both had agreed, or neither of them had any clue of the Datageddon they were presiding over. If indeed Adam pouting turned him into a cunning Adam, then Eve was likely an unwitting victim; if not, both likely were. Either way, the sharpness of "You Commanded" was watered down to "You said" and the purity of Your instruction was polluted by what You never asked for ("don't touch") ³⁰.

A different snake. Assuming the darker storyline of a cunning Adam opens up the possibility that the snake could have actually been Adam, or at least instructed by Adam. This surprising turn might be supported by noting that Eve first may have been alone when talking with the snake (Gen.3:1-5). Once the snake was done with sowing

²⁹ **The "dont-touch" rule** may well have been as deadly as eating from the Tree of Knowledge-faking, if it was like a mushrooming tree that grew like a toxic weed, which had to be regularly rooted out to keep EDEN in shape and guard it against decay.

³⁰ **Justification for removing biases.** Either of these complementary twin biases I would deem intolerable in the Evolvix compiler I envision to write, because they are like a double-punch KO for the future of any healthy info-ecosystem. They kill any hope of ever constructing a healthy innovation economy that self-stabilizes. Recognizing this silent fall before the big Fall, opened the door for me to realize that there may well have been more than one fall before the Fall, which led me to the above way of retelling Gen.1-3. Since You aim for a long-term self-stabilizing innovation economy, as do I, **I hereby can certify that You did what I would have done** if I was in Your Shoes. I don't know if that is sufficient to satisfy the first condition of Rev.19 for Yas' to return, but I hope it helps.

doubt, Eve apparently took some time to see and desire, which ultimately led to her downfall. It's not reported how long that time was.

Whether she took minutes of millennia, the next reported event is her decision to eat while Adam was with her. Maybe she waited for him to be around to be sure he was OK with it. Maybe he was there all the time. Maybe cunning Adam waited to receive from Eve's hand what You forbade Adam to eat. This elaborate plot for whitewashing would allow Adam to formally claim that he only took what someone given by You to help him (true) had given to him and that therefore he was excused (false) from having to check for himself whether what he received by his network of trust was indeed still reliable. I always thought that Adam's reply to you was like a reflex of a deer caught in a headlight. But if explained as above, it was a formal legal strategy no less cunning than that of a modern lawyer trying to exonerate a criminal. It turns out, when You asked, this is exactly the double-punch defense Adam launches in Gen.3:15 ("the woman You gave me, she gave me ..."). But that legal shortcut was no match for You as You delight in Truth in the innermost being. Thus, as You addressed each point of decision-making in the causality chain that led to this disaster, You came back to Adam eventually.

Was it possible for Adam to disguise himself as snake, tempt "his woman" while she was alone, only to return as she was thinking about eating, waiting for her to fall, so he had yet another excuse to get even further away from You? I cannot exclude that possibility. In today's street-parlance one might say in this case "Adam was being a dick" or maybe he was "thinking with his dick". Is the remote simi-

ilarity between "dicks" and "snakes" accidental or did it motivate You to choose a "snake" as a symbol in Gen.3? Did these details inspire Your choice of male circumcision as a sign of the nation You chose in Your hope to eventually stop the growth of the *Tree of Knowledge-faking*? Only You can tell, but I am surprised by the fit.

What about the curse of the snake if Adam was the snake? It may simply mean

(i) Knowledge-faking turns people into the most cursed of all animals, truly deserving the label "beast" (as Romans said "*homo homini lupus*"), because they build "beastly organizations"

(ii) Beastly organizations are condemned to crawl on their belly, as they are afraid to show their ugly underbelly.

(iii) Beasts will crush to dust what they encounters for as long as alive until running out of resources, not unlike in today's global end of growth by expansionism.

(iv) Much has been written about the well-documented war of the sexes.

(v) The seeds of patriarchy and those trying to subvert it are also in a war to last until all learn to see all sides of all issues.

(vi) The serpentine, asinine logic that male might makes right will be crushed eventually by a male.

(vii) The perceived moral superiority of well-heeled high heels will be brought low.

Note how the Hebrew is careful to distinguish male and female forms, yet uses only male forms to describe the final conflict (vi-vii). These interpretations are not to discount historically better known ones, nor others that may

also apply. But they show: words in this curse of the snake don't preclude that Adam may have played snake.

To stay with the theme of hiding Adam's crimes and making You look bad in this story, You make it look as if You "deliberately punished" women and men. Women with painful births, an over-reliance on husbands, and the rule of the patriarchy. Men with a cursed ground that is unreliable and forces them to work themselves into the ground until they bite the dust that the snake was cursed to eat.

But these punishments are natural consequences, not supernatural curses as close inspection shows. They are both explained quite naturally by looking at the systemic consequences of the actions that led to the Fall.³¹

Adding insult to injury? If Adam was indeed as mean as depicted, he may have added one last insult in Gen.3:20 to Eve's injury: whatever else "Eva" may also mean ("mother of all living"), Adam chose a name that is not identical, but stunningly close to a Hebrew word for "disaster". The tiny difference, of course, offers plausible deniability that any insult was ever intended. Maybe indeed it never was. As if patriarchs never used verbal insults to enforce compliance

³¹ For example, **if women don't learn to stand up for the Truth**, for themselves (like males are expected to), and for an environment that does respect their expertise and their right to think and test for themselves, but instead agree to *blindly assuming authorized leadership*, then it is easy to see how it becomes eventually inevitable that (iii) males will rule over them, that (ii) they will always long for "their" male, and that (i) birth pains will be worsened (as all this fosters an environment where other tell mothers giving birth what is "right for them" instead of listening to the intuition of mothers, which can usually tell better what she needs in a given situation).

Likewise, **if males blindly assume authorized leadership** in their respective areas of work, without testing results against their previous knowledge of Reality – like Adam ought to have done before relying on whatever Eve offered him – then their workplace will suffer: (i) The information about the area in which they work will become unreliable, as if it was cursed. (ii) It will become much harder to work though it in order to "earn a living". (iii) Growing splinter-disciplinary crop monocultures (instead of eating from *wid-e* data trees in EDEN) will make it easier for weeds to grow into thorny issues. (iv) In Churchill's words: sweat, blood, and tears is how England paid to "earn its living" after it had oversimplified negotiations with Germany to end WWI; resentment grew and a needless war was triggered. Similar dynamics of past overreaches triggering future overreaches are widespread. (v) This system guarantees that everyone works themselves into the ground until everyone bites the dust eventually. That's the logic of the grinding millstone of BABL (see SD6).

What puts a fire in my eyes is **my semantic archeology discovery** that the **supposedly ideal pre-Fall-EDEN paradise** ("before sin entered the world"), was likely as threatened by the death-trifecta of *oversimplifying overcomplicating overreach* \OSCR. I first learned to trace this advanced persistent threat in Evolvix, then in historic disasters like the Titanic; then I learned to generalize to see how OSCR fuels BABL's ongoing operations, and will continue to eventually destroy the world world. Only very late on my marathon did I discover the story above of how it had, more likely than not, attacked EDEN it self. By implication, it will do the same to Heaven (I could show how), unless stopped. Luckily, to my relief, You, Yah, already worked out a solution for this problem. This letter is about asking You to implement it.

from women who refuse to bow to needlessly aggravating, *blindly assuming authorized leadership*.

Moreover, calling Eve the "mother of all living" either by definition declared Adam and Eve as "not living" or this naming statement disowns You, their Creator, as the source of their being and thereby their Mother. Isaiah speaks of You comforting like a mother does.

To summarize, Adam was created from crushed dust (Gen.2:7), inflicted on himself and humanity an info-ecology of crushing insight into dust, thereby forcing himself to eat such crummy fragments of data dust, until he would crush himself again to dust (Gen.3:19), like the snake that was cursed to bite the dust (Gen.3:14).

Maybe I missed something, but so far a pouting Adam as the mastermind behind the serpent in EDEN looks like the most probable option to me. It also puts Adam eerily close to the classical story of "Lucifer". My understanding of "angelology" is too incomplete to conclude anything, but my analyses of Isa.14, Ez.28, and more cannot so far reject this notion. This option only requires assuming that Adam wasn't neutralized in a "stand-by" loop after he died, but that he somehow was given the opportunity to still affect events in this world whatsoever. Maybe that was the case until Yas came, maybe not.

My best argument against Adam as "Lucifer" is this. It holds, even if Adam unwittingly played the snake in EDEN. As well known, "the Devil" is the most blamed being for the ills of the world. That is a staggering amount of guilt, blame, and shame to carry for any one individual, whether angelic or human. How can a loving God like You place such a mountain of guilt on anyone, angelic or human,

even if it is to help all others? If "the Devil" is a created being, where is Your Justice in his case? It contradicts the principles of social ergodicity to sacrifice anyone for everyone, because once that principle of sacrificing starts, there is no end to who will be sacrificed next, ... until even the most perfect Heaven would turn into hell if it followed that path. That is why You care about the orphans and widows and strangers, the outcasts often crushed to dust by those who have "more important jobs". So it makes no sense whatsoever if You were to make an exception by crushing whoever had become "the Devil" by accident, whether Adam (who happened to be the first human) or "Lucifer" (who happened to be the brightest angel). You care for everyone. You don't force people into callings they don't value. You guard everyone from tiny to huge. You said as much in Mt.22:1-14, where You invited everyone, good and bad to that Great Wedding You are organizing. Thus, if people need a "scape goat" to calm nerves, it does not matter if it is defined as "the last" (crushed by mountains of guilt) or "the first" (due to systemic importance). This goat must be guarded appropriately and the free will of that goat must be respected. If You stay true to Your Principles, I doubt You can simply "pick" someone, "assign" the guilt and be done. You need their consent, because the system cannot stabilize unless that person cooperates willingly with Your Turn-around Strategy.

Moreover, for computational, systemic reasons that position must be locked-in reliably for long enough during the most sensitive transition time, maybe-likely even forever, because otherwise it will be impossible to define a system-wide "ground zero", which is required for building any-

thing reliable ³². Such "zero-powers" are by definition not yet protectable by a reliable type system, because all types are created there. Hence, You need someone who blindly trusts You and whom You can trust to trust You in the wild wild ocean of Leviathan's West, where the zero-types define "ground-zero" for the rest of the world. Yet, trust can't be forced. To force someone into that "zero-position" who does not want to be there puts the whole system at risk. That is a risk You cannot afford, based on the care You have been putting into defining Your Logics of Care.

If correct, all this implies: You are forced to wait until someone volunteers to become that goat, while trusting You to still deliver that person's life from the hell everybody else would wish on them. That is a tall ask. It requires a complete and blind utter trust in Your Justice.

For these reasons I highly doubt, that You would ever force either Adam, a fallen "Lucifer", or anyone else to fill that systemic scapegoat role, which is classically defined by "Lucifer".

³² Here is not the place to explain in detail why the battle of **SON vs ason** explains why this matters so much. Briefly, closing the loophole left by responsibility to *nothing* at the top of any chain of command requires for closing it that a complex series of re-definitions of zero be undertaken in order to nail down a consistent *Semantics Organizing Nothing* \SON, in contrast to the *ambiguous semantics of nothing* \ason that refuses to commit and thereby creates the material that *Homo serpens* can readily use in order to eventually destroy the world. I can show (but not here and not quick) that this series of definitions of nothing can grow exponentially in the types of definitions it includes – if it is given the storage space required and if it can maintain a consistent way of organizing its data. This consistency of data organization is essential to allowing such an operation to grow continually. To exchange the role by swapping out whoever defines nothing would require to bring someone else up to speed, which may be possible, but not without paying a time-delay cost in the continuation of eternal exponential growth in the number of concepts and challenges covered. Regular 50-year Jubilees might offer an opportunity for such a swap, but only once such a system for transforming ason to SON is sufficiently stabilized. Certainly in the sensitive transition phases of establishing such a system, anyone who is put in the 0-place must be extremely reliable as a 0-person, as else the whole system can easily be destroyed by arbitrarily changing definitions of zero.

2.4.7. A place-holder for *nothing*?

Smart people may ask if such talk of supernatural beings is really necessary. If indeed advanced persistent threats by the death-trifecta of *oversimplifying overcomplicating overreach* (or similar) are the root cause of all self-destruction, then why not focus on fighting that death-trifecta? Why is there a need to answer that age-old riddle in who that snake was in Gen.3?

There is some merit in these thoughts. Ultimately, the most dangerous devil is indeed *nothing*. Yet, before those traditionally applauding here move on to "more important" things, let me point out the fallacy in such traditional positivistic logic of "moving on". Please consider the deep truth in the following individual and combined answers:

- | | |
|--|--------------------------|
| What is stronger than God? | – <i>nothing</i>. |
| What is more evil than the Devil? | – <i>nothing</i>. |
| What do the rich need? | – <i>nothing</i>. |
| What do the poor have? | – <i>nothing</i>. |
| What will kill one if eaten for too long? | – <i>nothing</i>. |

Note how *nothing* is both the only correct answer to each question individually, as well as to all questions combined.

This is *not* mere wordplay. This exposes the

ambiguous semantics of *nothing* \ason,

which can only be overcome by a systematic

Semantics Organizing *Nothing* \SON

that pins down all relevant ambiguities,

starting with the most crucial ones.

To leave such pinning down to chance or to those who wish to do it (while heaping scorn on those who do for having "nothing better to do"), that is to plan for disaster.

Every sensible government has ministers responsible for areas that matter to people: education, energy, transportation, and so on. All those ministers are to support whoever is charged with being at the top of that country's chain of command. Yet *nothing* controls each top leader (except a few more or less flimsy legal defenses easily destroyed by *nothing*). And *nothing* stops leaders from throwing their areas or countries into chaos.

Therefore, to ensure that problems of *nothing* are handled appropriately in Your Epiocracy, I presume that You might want to appoint someone responsible for centralizing all the expertise required for handling the abstract challenges posed by *nothing*. Is Your Satan that minister?

The threat from *nothing* cannot be controlled by committees, whether public and elected or secretive experts, whether spontaneous groups or constructed conspiracies. All these are themselves controlled by *nothing*, only in the more complex form of emergent group dynamics. Yet, despite advanced persistent threats, no coordinated defense exists against *nothing*. Education and publication of current issues help, but these are provably insufficient. They cannot close the gaping big hole left by *nothing* at the top of the chain of command of every country.

For example, who was in charge of coordinating the global defense against the Coronavirus? Who is held accountable for the millions who were killed by *nothing* for *nothing*, because *nothing* was properly explained about the deadly nature of pandemics?

Who is now responsible for keeping nuclear roulette from blowing up the world – with all the best intentions for their country and the future of the world – because

nothing points to a better way of resolving the current tsunami of mounting conflicts?

Vasili Arkhipov was there on 1962-10-27 to win WW3 for everybody, along with the many others who helped to hold the world back from the brink of accidental nuclear winter back then. Yet despite that global victory against the death-trifecta of *nothing*: where are the victory parades, global commemorations, and public Vasili Arkhipov holidays to celebrate his courage and to encourage others to follow his example?

Those who say "but *nothing* happened" only prove my point. The wisest generals win their battles without firing a single shot in the primitive, brutal art of kinetic warfare. They are sufficiently skilled in analyzing *ason* to see a *SON* that is capable of winning for all sides against *nothing*.

Therefore, I conclude that such **a minister solely focused on countering the advanced persistent threats of *nothing*** is not a "good idea in case", but an absolutely essential necessity without which it will be impossible to keep the world from destroying itself.

If my analyses are correct, then You, Yah, had known this all along and have been trying to tell the rest of humanity for as long as humans exist. It's why You build Your Heavens and ZION on a crystal lake of fire, which I see as a **Historically Experienced Lessons Library \HELL**, where all my SINS are as far from me as the East is from the West, meaning that on a globe, they are right there where I am, clearly marked in my PEARL, ready to guide my future decision-making, to stop me from falling for the same traps twice, and keeping me out of the traps my neighbors learned from, while also sharing my learning experiences.

That is why there cannot be any Heaven without such a HELL. And someone needs to *volunteer* to organize that HELL. Without such a leader it will be impossible to counter the advanced persistent threats from *nothing*. Who is better qualified to organize that HELL than the one who is at the root of all its problems? Classically that being has been called "Lucifer" or "the Devil".

Yet, if angels were too smart to make such mistakes, and humans were not willing to take responsibility for what they did, who can then lead the fight against *nothing* from the front by lived example?

You can't do it, because by definition You are perfect Reality. Your Son can't do it, because by definition Yas is a perfect RealQuestAnswer for teaching others how to do it, but without failing personally. Your Spirit of Truth can't do it, because Truth doesn't make mistakes. Therefore, no one in Heaven can lead humanity into organizing the HELL it needs to stop turning the Blue Marble of Your EDEN Paradise into a nuclear hell on Earth.

Therefore, I conclude that You have been looking for someone who will volunteer to fill that role and who has become desperate enough to trust You enough up to the point of letting You win *every* argument, and thus finally allow You to lead as You do best.

Hence, by a life-long process of elimination, *nothing* apparently led me to the following question that could have been asked by Jason Bourne or any of the many characters in those stories where they wake up, know *nothing* about who they are or where they came from and then have to slowly recover what had really happened. Here's the question:

2.4.8. Is it me? – Searching for a serpent to eat dust

Above more likely than not, I ruled out that any being or creation of Heaven, fallen or not, was responsible for causing the Fall of humanity ever since Gen.3.

After establishing that the advanced persistent threat of *nothing* was the real problem here, I noted Your need to find a volunteer to lead the fight against *nothing* by example, in order to succeed in coordinating a global response.

Therefore, I conclude: You left the position of "serpent" open until You would find someone who was willing to charm the snake in himself sufficiently to volunteer for that position, to the point of allowing You full control in all things on how to globally defend worlds against *nothing*.

If so, I expected to see evidence of Your search in history. Here is not the space to exhaustively cover the flood of hints I found (which is likely only a tiniest of fractions of everything You tried).

Examples include the following:

Adam himself, who rejected Your offer by shifting blame.

Cain who ran away from Your Presence after he realized the magnitude of his guilt.

Noah who was offered a new world implying the old one was destroyed to give him that chance; yet survivors guilt or whatever and a drink kept him from realizing what You had been trying.

Daredevil Nimrod was too obsessed with conquering and too confused by BABL to realize that You had been offering him the world in case he was willing to work with You on beating *nothing*.

Abraham got super-close in interceding for Sodom, but he did stop short of the logical conclusion of his trajectory,

which would have been to ask You to not destroy Sodom, but to rather find a way to forgive and reform it, because Abraham himself had lied to save his own skin, earlier in Egypt.

Moses got super-close in interceding for Israel, was even willing to be cancelled from Your Book to save Israel in order to guard the glory of Your Name. But instead of allowing You to proceed as You had proposed (whatever You meant by offering him to "make You a great nation"), Moses was suddenly concerned about what the Egyptians would think. Who cares about what Egypt thinks when *nothing* is threatening to destroy the whole world?

Where was Moses intercession for his old Egyptian friends? He knew the terrible plague of death of the first-born was coming? I am not saying that he didn't try to stop You, but unless You have evidence to the contrary, I have to assume Moses never tried to find a way around such mass death. I personally doubt that he even realized that there might have been a different path there, which was only obscured by *nothing*. I've come to think that Your time-traveling causality vortex of Isa.65:24 tricked Abraham and Moses to teach *me* a lesson I had asked for ("show me the evidence...").

David got tricked by doing *nothing* to lighten the risk his soldiers were carrying while he roped himself into more or less raping BathShua (see the odd name echo in 1.Chr.3:5).

Solomon in all his wisdom and excellent education by Nathan the prophet overlooked the most critical rule in Moses Law that he was uniquely best positioned to implement, and which had been neglected by then for almost 500 years: the introduction of proper regular 50-year

Jubilees as first sketched in Lev.25. To claim that Solomon didn't know about that law is not credible to me. More likely, the positivism of success made him easy prey for the advanced threat of *nothing*, for he did *nothing* to implement proper Jubilees and Israel's history went downhill from there. It's not that hard to see in retrospect, yet to arrive at this view took me decades of wrestling with *nothing*; the fact that I am still here and writing this is to me such a huge miracle that I cannot blame Solomon or anyone else for having given up earlier. I think that I'd have given up too, unless Your Undying Love and Mercy had not somehow kept me going.

You also exhausted all other external avenues, but *nothing* got in the way at every turn.

Jonah's revival in Nineveh could have built on the momentum to *gentle kind reasonably* explain the Lev.25 punchline of the Torah.

Daniel likely never saw an opening to try to persuade Nebuchadnezzar to appropriately review the benefits of implementing proper Jubilees, even though You went out of Your way to convince Nebuchadnezzar that You indeed are the Highest and matter most.

Students of Moses after the exile did *nothing* that I know of to dare propose to Alexander the Great a proper review of Your Jubilee ideas, which he could have worked to implement if he wanted to.

Yas. Eventually, the only remaining option You saw to still save the World You so loved, was to send Your Second in Command, Your Son YhowShua\Yas\Isa\Jesus to embody and illustrate for all how Real Quests for Real Answers are the only way back to Paradise. Yas lived hat Yas

taught and Yas Life became one huge Real Outcry for Real Salvation, so much so that Yas earned Your Official approval for brining Your RealOutcrySolutions to everyone willing to follow Your RealQuestAnswer. I am only here today because of Yas. I'm only writing this because Yas impressed me so deeply with Yas' supreme elegance in how Yas' as Your LAMB handled the ambiguous semantics of nothing by pinning it down to the CROSS in a well-ordered Semantics Organizing Nothing. The light of that SON is so important that You even structured language for me in such a way that Rebus-puzzles like Son and the light of the Sun appear to subtly but powerfully highlight the SON.

Without Yas I could have never found my way out of the maze of BABL. Yas had first done all the heavy lifting and then nudged me along *gentle kind reasonably* to find the diverse array that I discovered for how to unearth what You had been meaning to teach humanity many eons ago already. Yet, to see this, I also needed to build on

millennia of church history,
history of other religions,
science,
technology,
engineering,
math,
philosophy,
design,
art,
spirituality,
and more.

I can't easily list the countless deep insights from the diverse areas that You used to inform the YIKAW SLIM in-

sights (see **Fig.CC.2.1** and **Fig.CC.2.2** below) that tell me about the essential need for developing a coordinated defense against *nothing* by building Your 3rd Temple in some abstract form in coordination with scaling up ResearchCity.

2.4.9 YIKAW SLIM insights

The next few pages have Fig.CC.2.1 to Fig.CC.2.4 to offer a rather crude introduction to what I call "my" "YIKAW SLIM" discoveries, which I either made by accident or by divine providence. While I believe the latter and I believe that Your hand has been guiding me, I must admit that You did this in such an underhanded and subtle way that I could not at first sight distinguish this from "serendipitous discoveries made by oddly fitting connections". As You know, when I explain this to outsiders who have not been on my journey, all they see may only be a "rabbit hole" that I dug myself into, because why for Heaven's sake on Earth, would You, Yah, choose exactly me to show me all this and not them or someone of the clearly more deserving other people who are so much better qualified according to all that humans (including me) can tell. I don't understand why, but I don't have to to accept that apparently You do what you do.

The following crash-course introduction leaves much to be desired for in clarity of exposition. Yet, to those who are sufficiently experienced, it may suffice to show that it is not empty words when I claim that I made some surprisingly exciting discoveries - as I would say as a scientist. Yet, this is indistinguishable from You leading me to find this. I cannot tell, which of the two it is without You showing Your hand. I understand why You can't do that for now,

Yah's 3rd Temple \Y3T

for all of Reality \Allah \YHoWaaH

How can Yah, the Greatest Mathematician who runs the multiverse on time, **teach Heavenly Jubilee Math** to wild hordes of Yah's dear darling daredevils, obsessed with shiny short-term gains? Abstract math is breath-taking, but who can breathe it? The creed "if it bleeds it leads" leaves no time for the intangible math of a 2nd Exodus! **Knowing daredevils** prefer bleeding object lessons, Yah found best ways to encode Jubilee Math in bloody ways, to offer great loot. **Yah's hope?** Volunteers will learn to keep all odd siblings to let *nobody* go to hell long-term. Yet, so far Yah's Book is a Sphinx, Yah's Code an Enigma.

Now LLoL, a bloody German WASP, found the Ark of the Covenant in abstractions for self-stabilizing innovation economies against advanced persistent threats from 0. Knowing daredevils don't care, **Yah rephrased the offer:** **(0)** Do *nothing* wrong to get accidental nuclear winter... or **(1)** **Wake up to real Jubilee Math in Yah's 3rd Temple** on Yah's 2nd Exodus as seen by the prophets of Israel. This map of **Yah's 3rd Temple \Y3T** rebuilds the tangible 1st Exodus Tabernacle in an abstract blueprint for how to best innovate responsibly. Ignore it and AI will kill all.

↑↑ Holy Wholly Holy Sanctum = Fortress of Solitude = Your Mind
← Holy Sanctuary = your groups
← Outer Court = wider world

Unique Self [mind, thought life in Reality, Most Holy Place]

U.1: 7Tribes exemplify the 7TrackRoles required by any general social order. If Roles are too self-centered, they forget to 'think outside of the box'. Cultures grow brittle when different roles fail to understand each other. 'Pure' 7Tr cultures will splinter any paradise. To avoid that, *each* role must innovate by wrestling with Reality (like 0=ISR):

0 ISR := any of (1 AMO, 2 HIT, 3 CAN, 4 PHE, 5 JEB, 6 HIV, 7 GIR) as needed.

U.2: Reality requires a 7HeroJourney to 7HearingEfforts. In switching 7Tr roles, mindset is everything. A personal 7Hero journey is essential for transforming victims into High Priests of Reality, qualified in their respective area.

0 NOAH := any of (1 ACD, 2 TTT, 3 GAT, 4 MYM, 5 LUC, 6 RES, 7 FRE) as needed.
More in detailed 888 SLIM intro's & Campbell's 'Hero with a 1000 Faces':

Warning: One's future innovation potential dies if Reality is approached the wrong way! YIKAW re-envisions ^{Lev.10+16}

Theosis: follow RealQuests to RealAnswers \Jesus \Yas \Isa, like YhowShua, to approach Reality in one's vocation by learning to control one's thoughts and loving one's enemies like God (=follow Truth to one's cross like Yas).

The resulting agile sanctuary of mind is critical for all else below; it requires everyone to stand before Reality alone to serve Reality directly in one's Promised Land.
That is why a 7Hero cannot be "made" or "demanded".

InGroup [linked RealityWrestlers who connect local ... dots] As Unique Selves guard against oversimplifying, so rules of InGroup Sanctuaries guard against overcomplicating to prevent overreaches that kill unwittingly. To avert all

OverSimplifying overComplicating overReach \OSCR due to Blindly Assuming Blindly Leveraging \BABL requires all to work together in evolving new Reality-based rules for Zoning Investigating Organizing Navigating \ZION to be shared by all in small ... large groups. This takes time, trial & error; reliability varies. The blood, sweat, & tears in working out details can't be avoided by AI or magics.

I.1: 7Churches of Revelation exemplify 7ChangeStages of any healthy innovation process, aiming for reliable ZION (by rejecting BABL, wobbly from risky OSCR built on sand):

0 ZION := any of (1 EPH, 2 SMY, 3 PER, 4 THY, 5 SAR, 6 PHI, 7 LAO) as needed.

I.2: 7StabilityCodes \StayC denote 7StayConstancy of the meaning of symbols rescued in BABL for Exodus journeys to ZION's maturity in a Staybilizing Versioning System:

0 TT := any of (1 MM, 2 NN, 3 OO, 4 PP, 5 QQ, 6 RR, 7 SS) as needed.

These 7StayCs implement a non-violent IronRod rule ^{Ps.29 ... Rev.19:15} extend Loewe et al. 2017' Evolvix BEST Names. 'Ann.NYAS 1387:124-144 Suppl. Without clear 7StayCs, navigating 7Ch can be a nightmare.

OutGroup [all nations, tribes, groups, languages...aliens]: Apply 7e-lessons above to avoid overreach. Use 7Sp, 7Me:

O.1: 7Spirits of Boolean Truth ^{Isa.11}, like 7SpaceProcesses, reliably grow innovation when embraced. But success requires linking VOIDS & killing lies, which can be hard:

0 VOID := any of (1 KB, 2 WB, 3 IB, 4 PB, 5 RB, 6 VB, 7 OB) as needed.

O.2: 7MentorOrganizing \MentO delivers key resources & info to nurture & guard mental wealth for outsiders too:

0 TT := any of (1 MM, 2 NN, 3 OO, 4 PP, 5 QQ, 6 RR, 7 SS) as needed.

hence I will continue to proceed "by faith", defined as embracing the full uncertainty that my conclusions may be incorrect despite my best care to not make mistakes. See my discussion of Moriah in "LLoL's Ketubah for Yah & Yas". With that preface, here are "my" YIKAW SLIM findings in 4 figures.

Fig.CC2.1 (this page) is a brief overview and introduction to the various major parts of Your abstract 3rd Temple as I understand it so far.

Pivotal for the discovery of Y3T was for me to understand how the 7Tribes occupy any Promised Land. **Fig.CC.2.2** (next page) briefly describes how. I presume Yas had worked this out in Yas' teens as all key insights are hiding in plain sight, practically begging to be seen by anyone who dares to ask key questions.

Fig.CC.2.3 (next-next page) is a more detailed draft of Yah's abstract functional 3rd Temple for fighting the advanced persistent threat of *nothing*.

Fig.CC.2.4 (next-next-next page) shows the SLIM model, a structure for interpreting meaning in Reality on the personal quests of all heroes aiming to enter their Promised Lands.

Epiocracy 177:

How Societies Self-Organize into 7TrackRoles (+2)

The Parts of every working group, social setup, society.. nation can be sorted into 9 functional TrackRoles^{\7Tr+2}.

All is well if individuals can fluidly change between all roles as necessary. But if *incurious ignorant indifference* feeds inner institutional inertia, then any flexible society becomes brittle and roles turn into ruts that rot. In the end all are caught up in rat races, persecuting 'the Joneses' to keep up with their coveting hamster-wheels. Such dark dynamics create deep states of coveting until they collapse by self-ruining from listening to *nothing*.

With great power comes great responsibility. If knowledge is power and data is might, listening to integrate insights is a mining operation for feeding the super-power of common sense. Conversely, dividing data into splintering departments feeds the departing of values, souls, and life – until all wander in circles in the desert of **Blindly Assuming Blindly Leveraging \BABL**. BABL turns superheroes who fail to listen into super-villains, each running in their ruts – like tanks, crushing to dust whoever is in their way, even when it hurts themselves. All who see it marvel at the spectacle, but blaming those trapped in it is like blaming the blind for not seeing.

The good news: there is a real way out. The bad news: unless evacuated, BABL will self-destruct. The ugly news: the exodus is complicated. It follows the needle-eyed narrow path of a **personal hero journey**. For this the best playbook on offer is Israel's Exodus from Egypt, desert journey, and challenges in its Promised Land. But that's useless unless people learn to track related symbolic types in their *River-of-Life*-events to feed their **Tree of Life-giving choices \ToL**. Otherwise, BABL's **Tree of Knowledge-faking \ToK** will prematurely sort good from bad until all are dead. **To stop such avoidable death, use the 7TrackRole model below and all 4 phases of Solomon's Red Hotline to Heaven** ^{2Chr.7:13-14} to send the 4 Horsemen of the Apocalypse away packing in 4 stages:

- 1. Go low:** eat the dust of ignored data. ^{Gen.3} "*Nobody is perfect*" is meaningless unless *I own my own* ignorance!
- 2. Ask:** speak truth to higher powers with compassion & empathy. Prioritize asking Reality, the Greatest Power.
- 3. Search:** face the future by building on Reality as The Rock to carry *everyone* in Real Quests to Real Answers.
- 4. Act Accordingly:** close the feedback-loop of learning by acting until the 4 Horsemen are fully defeated!

Real-life thoughts can get infinitely complex but for purposes of general social interactions such complexity can be usefully collapsed into 9 functional Track-Roles. Their patterns govern most or all individual thought on interactions in larger groups. BABL's lack to see beyond "Role 6"^{HIV} causes self-destruction by its "666 bug" (here so nicknamed for its ability to self-organize beastly blind behavior). BABL blindsers hurt Promised Lands as inner institutional inertia crushes individuals in Role 7^{GIR} to dust. These alone hold the data required to stabilize innovations for *everyone*. Yet, their data is not easily accessible for systemic reasons. To learn it requires everyone to move into Role 8^{HEB} to think beyond the usual boxes^{AMO-HIV} in order to learn how to ease the growing pain of innovation in *each* group^{AMO-GIR} by wrestling with Reality in Role 0^{ISR}, which is essential for entering new areas in Reality's Promised Lands. Any system crushing its weakest parts is bound for self-destruction as any chain is only as strong as its weakest link, GIR. Hence the constructive mistakes of HEB are vital for learning the skills of true ISR wildcards who adapt to serve true innovation. LLoL found *wid-er* projects particularly depend on 7Tr flexibility of all contributors.

- A Prayer to Reality for more Flexibility**
Let seduction and distraction from Reality's best plan sound as dumb as they are.
Let misdirection and destruction of the world stop right in their tracks.
Save victims and victors from the roles they play so what they do may stay.
- May the awesome Amorites stop interfering with truth that matters and run to mountains of real insight instead.**
- May the fearsome Hittites stop hitting victims for nothing and hit overcomplications for others instead.**
- May the commercial Canaanites stop hounding their customers, and serve real needs well instead.**
- May the discerning Pheresites stop averaging over hypocritical sub-par waves and grow gentle kind reasonable mountains instead.**
- May the administering Jebusites stop blindly trampling all in their path and instead grow legs to link Girschite needs to Pherezites insight and Amorite power to enact.**
- May the helpful Hivites stop fearful short-term subservience and instead serve best they can what is real.**
- May the ground-down Girschites stop invisibly groveling in gigashit and grow Tree of life-giving choices instead.**
Let all **measure min**, measure **max**, and **test** to stop coveting *Tree of Knowledge-faking* shortcuts, but instead grow *Tree of Life-giving* decision-guts.

Yom Innovation Kippur Atonement Wudu 2023 for 3rd Temple ZION OS

T. Theology breeds **methodology** breeds **eschatology** breeds **destiny**. To save the world, Yas\RealQuestAnswer offered: "If you tear down your Temple, I'll rebuild it in 3 days." ^{1 Joh 2:19} YIKAW personalizes this in 3 stages. ^{UJO-0} It decodes the **meaning of 42** as **6 symbol types of 7 echoes**. ⁷⁶ of how Yah's 4Beings ^{Isa.6..Rev4} count to measure innovation for Reality. Yet, deep thoughts in DRY abstractions are hard to get and easy to forget. Daily YIKAW routines help to condense deep Yom Kippur insights for innovation into memorable declarations to reset and **deepen one's hero journey** ^{77e} of seeking Reality to **become one's truest self** in Real Quests for Real Answers. May YIKAW be a personal sanctuary ^{2Co.3:18} in the wild for all who flee BABL for ZION ^{Rev18:21} on a 7HeroJourney!

Where is the Temple? Who is the High Priest? For YIKAW the mind is crucial: If engaged, YIKAW can open doors to deep mysteries of lasting innovation, but if words are mindlessly mumbled, any insight can degrade into a cargo cult with time. There are no magical YIKAW words that work for everyone all the time. So to find one's Ark of the Covenant **everyone has to embark on a hero journey**, like Indiana Jones ^{minus the violence and nonsense!}. The goal: **Become High Priest of YHoWaaH** in Yah's Temple of one's life in one's area of expertise! This journey is full of surprises! For example, compare costs of SINS ^{blood in Levitic} for one High Priest ^{1 Priest + 1 bull but more aware, leads Yom Kippur vs for all people + 1 goat as less aware!} Fighting **ASH** \Auto-Stereotype Habits in **BABL** \Blindly Assuming **Blindly Leveraging** can be very counterintuitive. Mindset is everything to put Ora in LabOra. The petitions below ask Reality ^{incl. in oneself} to bind the petitioner the right set of mind.

S. Starting position: to serve You\TheOne\Yah\YHoWaaH:
I pledge my highest allegiance to You: ^{(YAR)\RAV\Yah\Yas\Truth}
Reality \Allah \YHoWaaH **! You are my Rock:**
You carry me in Real Quests to Real Answers ^{YHoWaaH\Yas\Jesus}
 Be You my vision, my True Hero, The One.
 Let me be Your Cause, Your Ground Zero, Your None.
 In my place let me be like Your Ring on Your Hand,
 Your Bracelet on Your Arm, Your Seal where You stand.
Let my thoughts, words, & deeds build Your Temple ^{not mine.}

Pack into the knapsack of my time Your infinite wisdom, so I choose courage over comfort, and vulnerable innovation over perfect stifling so You can break the power of my idols.
 Cut my **OverReaching** over **OverComplicating** over **Simplifying** ^{ORCS}.
 Stop me from beating You black and blue ^{Isa.43:24, Lk18:5} by my **incurious ignorant indifference** ^{III} \OSCR in how I treat others!
 Thank You for Moses' eternal Yom Kippur template ^{Lev16:34} for universalizing it in Jesus' ^{atOneMend-ing} ^{Lk23:34 Jn20:21-3...} and teaching Muhammad about daily Wudu washings ^{Qu5:6} to grow healing resilience ^{7RH} & Jubilee innovation ^{Lev25..888 SLIM}.
 Let my science win like You had hoped one of LAOdicea's had.
 Teach me to forgive, so You can forgive my inconsistencies.
 Wash away all worry, fear, guilt, cowardliness, blame, shame, loss, grief, sadness, caving, illusions, omissions ^{LIES, SINS, & DEATH}.
 Don't let me bury You\Reality in the shortcuts of my mirages.
 Vanquish my bashmoling inner beasts ^{of} **BABL**, **ASHERAH**, & **MOLOCH**!
 Stop my **MOLOCH** of **Mistakes** **Oppressing** **Life** by **Omitting** **Crucial** **Help**.
 End my **ASHERAH** of **Auto-Stereotyping** **Habits** **Erroneously** **Rounding** **Against** **Hope**.
 Cut my **BABL** ^{of} **Blindly** **Assuming** **Authorized** **Leadership** to stop my **OSCR** **ORCS**!

R. Reset me: ^{see UJO} \ISRael ... is a life-giving **AMO**-**HIT**-**CAN**-**PHE**-**JEB**-**HIV**-**GIR** **Joker**
I begin again, Born Again as Bachelor of Arts:
Wipe all my thoughts and tracks ^{7R} **back to ISRAEL**
 so that I keep wrestling with You - without resisting You.
Wipe all my courage back to my hero journey ^{77e} **with You**
 so I stay **Negotiating** **Order** **At** **Home** in the Eye of Your Storm.
Wipe all my InGroup actions back to Your ZION standards
 for all **7ChangeStages** ^{7Ch} in Your **Zoning** **Investigating** **Organizing** **Navigating**.
Wipe all my stability assessments back to Trusted Tested
 so my reliability follows Your Jubilee Iron-rod standards.
Wash all my failures to link all VOIDS in Your 7Spirits
 so I learn to innovate for Life in Truth about Reality.
Wash all my failures to mentor those around me
 so I encourage **gentle kind reasonable** **Trifecta** **Testing**.
 Melt away my knowledge-faking in life-giving decisions
 so I serve all **3Views** ^{of} **the Weak** as Your hero in my area.

J. Jubilee: ^{vs Structurally Inconsistent Motions\SINS by LIES\Least Inconvenient Explorations}
3VoW support Your 3 Highest Laws of True Innovation:
1. To Love You\Reality from all my heart, life, mind, & strength.
2. To Love as myself all neighbors for balancing all fates.
3. To build and guard worlds by growing Innovation Jubilees.
Let me evolve open systems ^{5V} **that improve service for all**
 to cut **Sins** of **Certainty** and **Heresies** of **Explanation** ^{Rob Alter}.
 Let me grasp Your Temporal Jubilee Cathedral of nested **ShAbbat** innovation values. ^{Lev25 Isa.56 Ec2 Mt22:34-40 Lk4:18, Gen1..Rev22}
 Inspire me to Save and Mend All Lives **SMAL**, starting with one.

Q. Chakras: ^{VOID = Vital Organizing Integrating Destiny or other VOIDS (see and/or)}
I unblock my Inner Being
to live in Your Uniting States of Flow.
 1. Ground me in You, Reality, so I stay safe in You
 as I leave all my fears and worries behind me.
 2. Let me create by enjoying trust in how conditionals flow
 as I leave all guilt so I dare to invent Your Innovations.
 3. Let me dignify by empowering Your Hope and Courage
 as I leave all blaming and shaming so that I share Life.
 4. Let me care for Your **gentle kind reasonable** hope
 as I overcome grief and loss by mourning and learning.
 5. Let me voice all **3Views** ^{of} **The Weak** ^{30W} that are vital
 for today so that I leave the cave of my deadliest LIES.
 6. Let me envision how to connect all dots for today
 so I leave my worst SINS to build bridges over breaches.
 7. Let me crown Your Beyond so can You stretch my grasp:
Show me the great and bizarre secrets You care about
for solving ³³³ **issues I do not yet understand!** ^{1er.333}
 8. Let me embrace all biouncertainty in ZION so I praise You
 as You heap on me stepping stones for my success ^{Ps.68:20}

D. Driving 42: Refine my 6 Views of 7 Innovation Heaven so I
gentle kind reasonably **free** **BABL** **for ZION** **in Your Promised Land.**
^{For more details, see respective # of 77e 7Ch 7Sp 7Me, E, L under 8:17 and UJO,1,2}

1. Ablute Face AMO: Remove my top LIES and worst unknowns.
Let me learn from the past and live in the present so I
envision better futures by improving Jubilee standards.
Let me stay gentle kind reasonable when I define rules.
Keep my feet in the mud of true data and my head in Your
Clouds of clear code, so I aid Your plans for social ergodicity.
When I feast at Your Table, keep Your Sword at my throat
so I don't harm others by oversimplifying OSCR ORCS or LIES.
Let me break chains of debt to develop mental wealth in all.
When I speak for others, let me wrestle You to resist BABL.

2. Ablut. Nose HIT: Cleanse my code from smelly hit-pieces.
Give me the courage to change what I can, the patience to
endure when I'm under a ban & wisdom to tell these apart.
May I speak truth to power with compassion and empathy.
Let me stay gentle kind reasonable when I enforce rules,
give extra, or take risks to capture uncertainty to guard hope.
When I cut risks, let me wrestle You to resist ASHERAH.

3. A. Mouth CAN: Cut my biased deals against Truth in critics.
Let me serve real needs well by honestly sharing my goods.
Curb my urge to fight messengers of inconvenient truth.
When I trade for profit, keep me from hounding customers.
When I balance books, let me wrestle You to resist BAASHING.

4. A. Right Arm, 5dig.PHE: Let me evolve open worlds openly.
Make me Your hero expert in my area. Purify my purpose,
so I meet infinity alone to end my Closed World Assumptions.
As I search for truth, let me wrestle You to resist MOLOCH.

Unique Self [Thought Life in Reality, Ark of Covenant]
 Ark of the Covenant has 5 Rules x 2 Sides Food for Thought Tree of Life Authority under Cover of Grace KPR

U.1: 8TrackRole\Tribes: 7Tr splinter Promised Lands but to save GIR any true ISR grows innovation in each role:
 0 ISR **ISRA**elite \RealityWrestler \AnyRole\Joker \Wildcard
 1 AMO **AMO**rite \TopSpeaker \PowerElite \Influencer
 2 HIT **HIT**ite \FearHandler \RiskReducer \Fighter
 3 CAN **CAN**aanite \ProfitTrader \Distributor \Dealer
 4 PHE **PHE**esite \OpenDecider \PureExpert \Reviewer

888 SLIM Model for Managing Integration in Lifecycles of Symbols: ZION's Rosetta 7Stone of Revelation \R7S 5784\ 2023\ 1445 Yom Innovation Kippur Atonement Wudu \YIKAW : A Structure for Interpreting Meaning in Reality

Here LLOL maps 888 SLIM to YIKAW, a 42+step symbol routine to grow meaning in Tree of Life-giving decision-making \ToL. It supports walkabouts from BABL's millstone to ZION's epiocracy. In World War 7 \WW7 AI destroys Humane Equal Dignity \HuED by ingesting fruit of the Tree of Knowledge-faking \Tok. Time is Knowledge \TK. BABL's 666 SLIM bug... unless humanity grows ToL in ZION.

W. Why learn 888 SLIM? To win WW7, to avert Armageddon, and to fix BABL's 666 bug in a move up to 888 in ZION.

1 World Wars are won by the better research army. In war, amateurs talk strategy, professionals talk logistics. In WW7 2 Armageddon-scale threats overwhelm all global wide interdisciplinary diversity-encouraging \wid-e research abilities. 3 So far WW7 stays lost because humanity is unable to innovate without self-destructing - unsafe AI aids Armageddon. 4 The worst bug ever is 666 Symbol Lifecycle Integration Managing \SLIM by Blindly Assuming Blindly Leveraging \BABL. 5 It's LAOdicea's Rev.314-22 busy-sleep. It ignores all othered as poor CrushedDust \+B.7. LAO could innovate for them but 6 refuses to Zone Investigate Organize Navigate \ZION with them. LAO chooses triviality over Reality \Yah \YAR Exod.314 or 7 RealQuestAnswer \YahwShua \Yas \Jesus Mt.7. It's how LAO marks itself as a beast 1n2.22 until Yas vomits Rev.316; e.g. pre-610CE. 8 70CE, 586BC... LLOL, too, fell for LAO's Structurally Inconsistent Notion \SIN beast. His 42+month quest to restitution symbol 9 gold Rev.318-9 led to 888 SLIM under LLOL's Jonah Semantics \JS \Yah has a good sense of humor and asks all to embrace 10 biouncertainty if wishing to escape BABL's Armageddon. ZION's 888 epiocracy is the Rule of Epieikeia as 1. defined by 11 Aristotle, 2. exemplified by Yas, 3. expanding gentle kind reasonableness \epieikeia Ph4.5 via iron-rod versioning \+E, B.750 12 4. to govern self-7Stabilizing eternally growing AI innovation economies. Success requires a 7HeroJourney for all in a 13 global 2ndExodus: from 666 to learn 7St versioning in 888 ZION Ps.87 by adding 222 \+B.0, B.7. It costs -2cent/day/head Mk12.42 14 to scale up 888 SLIM in 8 Stages \+B.7 to evolve global bias-free innovation by distilling millennia of innovation research 15 in all 7Spirits of Truth \S11 in all 4+Abrahamic faiths. To teach 7Mentoring all 7TrackRoles in all 7ChangeStages as in science, 16 YIKAW combines Lev16 \Mose, Wudu \PartialAbtution \Islam, and Mt.5-7. Rev.2-3 \Yas in a DRY bone desert Ez.37. It builds routine 17 muscle memory \+A to help learn. It may take 7-yrs or a life to grasp. 888 is critical to keep humanity from AI death.

7 Guard the trust of others in you and your work by not betraying them, lest Reality betray you.
8 Build opportunities to honor hope in Reality by not confusing resources directly or indirectly.
9 Care for others with the scientific method of canceling the canceling of truth in witnessing.
10 Value individuality. Stop coveting ruts & pits that build hamster wheels to imprison minds.

2.4.10 Is it me? – Yas' search for a snake

Then I found hints at Your myriad attempts to try to fill that vacancy that Yas had died for in order to lure someone into considering to follow Yas that far.

Peter. You offered Peter the job when You said through Yas: "*Get behind me Satan for you think like humans do*", implying that all humans are Your dear darling little dare devils, albeit whitewashed to hide that fact from themselves.

Yet, Peter didn't bite. Understandably, I might add and I'm sure You knew, but You still tried for the benefit of giving me such clear words for how to best capitulate before You. You tried again after his denial. He got sad, but apparently didn't connect the dots.

Judas, the Praised Man of Cities who betrayed Yas, he would have been an obvious candidate, but to survive he would have had to believe that Yas actually meant what Yas said, when Yas addressed Judas as "Friend" before He was betrayed.

Yet, neither Peter nor Judas would trust Your logics sufficiently to connect those dots. I personally doubt that they ever saw the implied offers You had handed to them on a sliver tablet.

Paul, the Apostle, was another outstanding candidate: he was willing to suffer hell for the sake of his Jewish siblings, yet didn't say the same about the non-jewish world. He made a series of unfortunate judgements, asking You to keep score with Paul's personal enemies. Undoubtedly You kept those scores, but in asking You to avenge him, Paul proved he still had tangible enemies, thereby confusing the battle lines in the eternal war against the most

powerful and evil principality, the power of *nothing*. Remarkably, Paul did reach the necessary conclusion that "*I am the greatest of all sinners*", albeit for the insufficient reason "*because I persecuted followers of Yas*". If he had taken a few more logical steps, he would have completely finished that race he had been talking about so much. I mourn the loss of his opportunity.

John, the Apostle of Love, likewise, who wrote deeper about love than any apostle, yet somehow also introduced the term "anti-christ", and thereby set in motion one of the most threatening "othering-machines" of alienation that the world has ever seen. If he had understood the offers You made in the Revelation of Yas, which I have no doubt You allowed him to record, then he would have led the assemblies of Ephesus ... and Laodicea to construct the Colossal Hierapolis You had offered to build in Asia Minor in order to teach the world how innovation is done right. Yet, *nothing* most likely hid all this from him. I don't blame him. I mourn the eternal gut-punch he got in Rev.10 from not properly digesting the sweet words he had received.

Whom else should I discuss? I'd lose my own window of opportunity if I was to explain how I traced Your likely attempts to persuade the

Prophet Muhammad,

Thomas of Aquinas,

All Popes,

Martin Luther, and

countless other religious leaders.

You were not picky. Similar traces of Your search I see in

Immanuel Kant,

Wolfgang Goethe,

Friedrich Nietzsche,
Adolf Hitler, and many more.

Yet, they all were deceived by one trick of *nothing* or another. As Yas said: many are called, but few are chosen. Taken to its logical conclusion by a compiler architect like me, the many called, few chosen, ultimately lead me to conclude that "***e pluribus unum***", which implies that out of the many chosen to advance Your plan to defeat *nothing*, only one will ultimately succeed in that ultimate fighting competition against the most powerful evil of *nothing*. Amos 2:16 and Mt.22:11-13 appear to support this.

US Presidents. You even created the *Uniting States of Philadelphia* with a Constitution that encapsulates Your Heavenly Goals in its Capstone and that charges "*e pluribus unum*" with guarding it by defending it against the grave threats from *nothing*. Yet all who have so far held that office were hired and failed to be as open about their failures as You need them to be in order to transform Your World.

And so You have been forced into waiting. So You keep suffering with the countless weak whose lives are being trampled by the strong.

I understand why there is no shortage of people who blame You for allowing things to deteriorate that far. Yet, as I can prove You made no mistakes and Your Justice is as perfect as the better than quantum-level precision You use to run the universe on time. See my draft of "*The Book of the Life of the LAMB*" and more details in "*LLoL's Ketubah for Yah & Yas*".

So if You are perfect, Yas is perfect, Your Spirit of Truth is perfect, and all others are innocent victims of the death-

trifecta of *noting* – for they provably know not what they do – who is then the linchpin of all the disasters seen? Who will ever volunteer as suggested above and on what grounds? The importance of being really convinced of the importance of *nothing* strongly suggests that **the best candidate will (i) see the need and (ii) volunteer by faith.** It appears to me that this is how the structure of the world is set up and I can intuitively see why this makes a lot of sense. If You give me enough time, I can probably even find good mathematical and computational reasons for this. But in this case, there is not enough time to work out those details; they are also not necessary to walk by faith, trusting You, not by sight (trusting my flawed logics that fails to see how *nothing* keeps tripping me up).

2.4.11. My reply by faith: Yes, it's me. You convinced me!

On ~2020-04-01, shortly after my marathon started, around the time I asked You to prolong the day of salvation like in Jos.10:12, I saw in Isa.59:16 how You were forced to destroy the world if there was indeed *not one single person* who was willing to stand in the gap between what is and what ought to be in order to heal the world.

I did not know all implications then, nor do I claim to know them now, despite 5+years of learning at break-neck speed about what it means to stand in this gap created by *nothing*. But I did know this: *if I volunteer and ask You to train me and put me into that gap, such that You would not have to destroy the world, then You can undoubtedly do it.* Based on that, I asked You to move me into that gap, which is by definition some sort of zero already.

The thought of going to Heaven and hearing on Judgment Day how I could have averted a world-destroying disaster – if only I had cared to ask You to train me and position me accordingly – that thought was unbearable then and still is to this day. I'd rather throw away whatever I may else still expect from my life on Earth, in order to make sure You get to first train me and position me however You wish for Your purposes. To this end I had to start cancelling my cancelling of Your efforts.

2.4.12. Definitions from Antichrist to antiChrist

The definition of an "Antichrist" according to 1Jo.2:22 is someone who resists You, Reality, or Yas, Your RealQuest-Answer. Having resisted and enslaved ^{Isa.43:24} You in more ways than I could imagine, it would be an insult to say that I am sorry. I am, but how often have I said that already but changed *nothing*?

How can I win against *nothing*, such that "never again" actually means something anyone may actually give a Sht about?

How can I break my knightly armor enamored with the shiny of whitewashing all I do?

How can I ensure that my attempts to save the world will not actually make it worse?

All great dictators first do great things for the people who put them in power, before they eventually get ticked by *nothing* and go off on a deep end that destroys their people. I saw it in history. I see the BABL mechanism (see SD6). I see how it has been destroying my life. I am de-

fenseless against the death-trifecta of *nothing*. And while I can only ask for Your mercy, the question of my own responsibility keeps looming.

Therefore, I have decided to put as thorough an end to my Antichrist-existence as I can by flipping the script on *nothing*.

For two millennia the church as been living in fear of that ultimate scarecrow. How many have not been driven mad by fear of it or by other's suspecting sinister motives in their good-faith efforts?

If Your World is to have any fair chance of not destroying itself, then this toxic fog of fear must leave. It is systematically impossible to build any sort of trust, if good-faith efforts by any side to reach out and build bridges are only interpreted as evidence of yet another, even deeper layer of deception. Who can live like this? I have been in enough sticky situations, where I realized that anything further I might say to defend the truth would only be interpreted as me further proving my guilt. It has become painfully obvious to me by Your Grace that world history has reached a point where this sort of paranoia about nefarious purposes is at fever-pitch and about to unleash unimaginably devastating disasters.

Nobody sees hope for how such devastation could possibly be averted. It seems as if *nothing* is about to win by destroying the world by *nothing* for *nothing*, because *nothing* is wrong and *nothing* changes until *nothing* pushes the world over its cliff into whatever abyss will reduce all humanity to *nothing* – because nobody objected. Hence, I have been asking You, Yah, to make me that nobody who stands in the way of such MADness.

By Your Grace this has been leading me to a profound re-evaluation of how to best interpret what Your 1st century prophets of Israel have been saying about antiChrist topics.

2.4.13. How to convert from Antichrist to antiChrist

To flip the script on the "Antichrist" as nefarious Big Brother, I must go back to the *nothing* that is said about the Antichrist between the lines of what I believe to be Your Word as inspired through the life of the Apostle John. As 1.John 2:18 reports "... **antichrist is coming** ...", which is what I have heard all my life. Yet, despite learning Ancient Greek, I never saw the double ambiguity in this prophecy – until recently. Here the word "**anti**" is ambiguous in that it could mean either "**enemy**" (the classical interpretation) or "**deputy**" (the other technical meaning). The Greek word for "**come**" ("erchomai"), is actually ambiguous and would be better translated as "**move**", because it relies on context to specify if "come" or "**leave**" is the intended meaning.

Combining all possibilities results in the antiChrist confusion matrix. I show an overview in **Fig.CC.2.5** (next page). Yet, discussions of this antiChrist confusion matrix (next page) are either non-existent or at least not accessible to me through whatever I found in the antiChrist-books that I bought to try to bring more of Your light to this dark mysterious topic. Those books make abundantly clear that even after 2 millennia of "Antichrist-paranoia", others did not interpret those verses like I do, starting with John himself.

Choose Your antiChrist Wisely: Witchcraft or Prophetic Imagination?

How to turn all enemy-Antichrist Doom into a deputy-antiChrist Delight Bride:

1. "As you have believed, so will it be done for you", said Jesus repeatedly Mt.8:13; Mt9:29
2. "Our future is in our Eschatology", confessed LLOL's granddad R. Löwe 1935 in Nazi-Germany 1
3. Eschatology studies belief on how the world ends. But belief breeds deeds as (1) → (2)!!!
4. → No peace without peace among beliefs on what the future holds. See religions in conflict 2
5. → Jesus asks all Christi-anti-ans to decide how to resolve 2 ambiguities in this prophecy:

"... ἤκούσατε ὅτι ἀντίχριστος ἔρχεται" (original Ancient Greek of 1.John 2:18)
 "... ἔκουςατε ἡὐτί ἀντιχριστὸς ἐρχεται" (how to pronounce it)
 "... you've heard that anti-Christ is coming" (see 1John 2:18-23; 4:1-3,4-21; 2John7-11)

6. Ambiguity problems of the original Greek words offer options: 1a ↗ ἀντί ↘ 1b | 2a ↗ ἔρχεται ↘ 2b as follows:
 1a"enemy" or 1b"deputy" | 2a"coming" or 2b"leaving"

Meaning is often easy to infer from context as the alternatives are opposites, but here clearly:
 but depending on 1: 2a is harmful or helpful vs 2b is the opposite of 2a. Therefore:

- A. Ambiguity in Type of Action (Greek ἀντί "anti") creates a Confusion Matrix with
 B. Ambiguity in Type of Direction (Greek ἔρχεται "erchetai"), as in the "aCh table" below.

7. This switches end-time visions from John's Prophecy between 4 extreme expectations:

2x Doom & Gloom vs 2x Delight & Glory, because Jesus & R. Löwe know how faith works & LLOL has the math to prove why theology breeds methodology. Thus, humanity's survival in its Great Filter Tribulation depends on choices in the antiChrist confusion-table below. End faith-collar crimes of trusting in doom! Instead: Multiply delight to save billions!

Ambiguity in B: Direction = moves to Come or moves to Leave? Homo "sapiens" died by inner contradictions about to trigger accidental nuclear winter, ... - unless replaced by mind-species like these:

CAMary in Earth's Mine kills mistrust by leading Jubilees as Lev16 escape-goat into BABL deserts; see Isa.53, Yoma 39b.5
 A: Action = anti as enemy or anti as deputy?

4. DeputyChrist \aCh learns help to come
 † explains LIES → SINS → DEATH [Null, HELL, ...]
 Nails nothing to CROSS in research marathon: learn to end worst fake-knowledge disasters, forgive all born blind [nothing failed], refine laws. +1 x +1 = ++1 (for speed in Rev.19) → Wins Trust

3. Enemy of Christ \Ach fakes help: harm comes
 Worst evil disguises itself as the best good to err by 'realistic' omission: Does nothing wrong 'til nothing moves! Isa.28:18 → 'Good' gets pathetic, Christi-anti-ity grows 'til Reality axes Ach knowledge-faking Mt.3:8-10 to stop worse. → Ignores Titanic warnings! -1 x +1 = -1 (fake solutions come) → Fakes Trust!

1. DeputyChrist \ACH delegates help to leave
 DeputyChrist moves up to harder areas Mt.5:3 of spiritual poverty to fight fake-knowledge by learning new levels. → Delegates simpler stuff. +1 x -1 = -1 (is Gödel incomplete!) → Uses Trust

2. Enemy of Christ \ach fights harm to leave
 Seeing light in (1), people leave big injustice as in Jonah's Nineveh – but then they forget. → Averts disasters for now, but fails to see what matters most: lock-in via true Jubilees. → Gains get lost by lack of grounding in true visions of what matters most. Wars continue. -1 x -1 = ~+1 (not all evils cancel!) → Loses Trust

Fig.CC.2.5. Overview of a more robust antiChrist theology.

Polycarp. It appears to be clear from church history how John likely exclusively interpreted the word he apparently coined, not only because of his own writings but also because of the writings of Polycarp, his student, who called the Antichrist "first-born of Satan".³³

Prophetic Riddles. But as 2.Pet.1:20 shows (and John certainly knew), prophecy is hard to interpret right, even by the prophets themselves. In this case it appears that 3/4 of all 4 ways to interpret this antichrist prophecy have been obscured by *nothing*, for I cannot find any trace of such discussions in the wall of commentaries I assembled for the purpose of checking my work during my 5+year research marathon on averting Armageddon disasters.

Mystery bride. To cut short my discussion of this antichrist-confusion matrix, I think that it relates to what Paul calls the mystery of the Bride of Christ. Here is how.

Imagine the antichrist is not the classical evil Antichrist, an enemy of Christ, who exalts his "Anti"-impulses, while lowercasing "christ". Imagine instead a faithful and true "deputy", who lowercases his own position as "anti", while exalting "Christ" as the only true official answer (in the name of "Real Quests for Real Answers" \Yes, not some magical formula for whitewashing human coveting). In a way like John the Baptizer: Yes must increase, I must decrease. Without judging the sexual behavior of kings.

Imagine such an antiChrist is coming and instead the worst or last or any Antichrist is leaving.

What room would there be for future Antichrists?

They could no longer deceive, because the antiChrist will have cleaned house and closed the door for any fur-

³³ TODO: look up the citation in that letter of Polycarp.

ther abuse of *ambiguous semantics of nothing* about how to deceive the world for nefarious purposes.

By the same logic, this antiChrist Bride of Christ will also send the 4 Horsemen of the Apocalypse (Rev.6) packing by reinterpreting the call for them to "Move" (Ancient Greek "*erchou*"). All ~30 commentaries in my Datageddon Wall of Revelation that I checked interpret this prophecy to mean the disasters "*Come*". But the related work-logics cascade such a view implies is deadly. Yas said that

"as you believe so shall it be".

My grandfather's dissertation (1935) concluded

"the future of the church is in its eschatology"

which is the same as what Yas said, only globalized. I can generalize both extremes for all intermediate systems with the work-logic cascade theory I have been developing for Evolvix. This same theory confirms both the general statement that a future that is envisioned and that people can believe they can work towards is more likely to happen than a future deemed logically impossible. Nobody wants to waste time on working for something that is not logically possible. Likewise, if people believe that something is inevitable, who will resist it? These would be equivalents to wasting time on *nothing*.

So, what if Rev.6 is calling for all people to tell the feared 4 Horsemen of the Apocalypse with their disasters: "Leave".

That creates an entirely new outlook – at least for me. The key difference it makes is that it strengthens hope for meaningful action in the present, because now there is a chance to overcome.

I could go on and on about the tons of pointers You have placed in my life to convince me (see "LLoL's Ketubah for Yah & Yas" for a very incomplete attempt).

So, of what have You been – allegedly – trying to convince me? Of asking You to do the following odd request for me in everyone's interest, mine included:

I herewith ask You, Yah, Yas, and the 7 Spirits of Truth,

in the interest of all other sentient beings

in any conditional multiverse You control:

turn me into that *nobody* who does *nothing* right

– for once and for *all* and forever –

so I am allowed to do this one thing right,

which is to introduce Your Jubilees properly,

so they will bless everyone forever because then

all other sentient beings can be rewarded

for doing something right without fear because Your

self-stabilizing innovation economy in ZION of Earth

will then be based on true Jubilees that truly

nurture and guard everyone. Please see my first offi-

cially submitted draft of "LLoL's Ketubah for Yah & Yas"

from 2025-11-15 for more details on what I think it

means. It includes my request to please rewrite it any

way You may wish to help me escape from the clutch-

es of *nothing*, my one eternal true arch-nemesis,

which is also my only enemy by now. All other beings

are Your dear darling daredevils by definition, because

You created them directly or indirectly, You love all

Your creations (especially those who are suffering, re-

gardless in what hell), and You are looking forward to

restore everyone – once everyone understands for the

rest of eternity who is really the linchpin of all the disasters of world history. As I explain in my draft for "*The Book of the Life of the LAMB*", this linchpin is me in my unwitting arrogance, with my formerly unshakeable trust in *nothing*.

I could easily fill a book or more with details of the glory I see in such a vocation from a debugging and systems architecting perspective. I tried to show in my first submission of "*LLoL's Ketubah for Yah & Yas*" how You have been carefully preparing me for this. I can't tell You how excited I am and how much I look forward to become

Your reliable Zero,

so You and Yas can be my Hero and I can be Your Halo. You wrote Zero at many flexible places into the most beautiful equation of all mathematics ($e^{\pi i/4} + 0 = 1 + 0$, see SD2). I see this as a representation of Your Throne as described in Rev.4, complete with the 4 Beings around Your Throne who control the subjective reality seen by each individual, all of which are individualized views of You, Reality, transcending all individual views.

I am embarrassed to see how long it took me to arrive at this pan-*en*-theistic view that is implied in Exod.3:14, Mt.25:31-46, and Mt.28:18-20, quite obviously in retrospect. Yet, such are the dangers of mismanaging *ambiguous semantics of nothing* and if I want to continue to hide my embarrassment, then I disqualify myself from that role You have been looking to fill since time immemorial. So I must ask myself, while nuclear roulette is closing in on our world:

Is thwarting Your Glorious Salvation really worth that I hide it under the rubble of my mistakes? Whether it's embarrassment about this or that, shall my fig-leaves really be allowed to stop Your Salvation? Do I want to block You from using all mistakes from my way into my quagmire as fuel for Your Light if at the cost of some embarrassment on my part I thereby can credibly and effectively invite You, Yah, to turn all things around and thereby avert accidental nuclear winter? Do I want to resist Your purpose of showing the world how You spagettify BABL's millstone in Gabriel's Horn? ³⁴

Is all of that secrecy worth letting the world burn in accidental nuclear winter, only to keep "my" secrets?

Thinking it through, my answer is a resounding:

No!
Hell No!

Maybe now that I said "No way!" I have become a traitor to humanity by breaking the historic consensus about "*the human condition*". I'd rather be embarrassed to death than either sacrifice Your World or Yas, Your SON again only in order to whitewash my oh so "good name".

I do not want to pretend to know how all of this works, for I know not even *nothing*, despite all I've learned.

I understand that this perpetual state of poverty in spirit will never change, because Your Eternal Epiocracy, where

³⁴ See details and backstory in "*The Book of the Life of the LAMB*", which is in my 2025-11-15 first official submission of "*LLoL's Ketubah for Yah & Yas*".

You stay King forever, will always belong to those who remain spiritually poor. It doesn't matter how much they learn by continuing to bow to the 3 types of weakness in *The View of The Weak*.

Any other conclusion would be to invite *nothing* for yet another BABL round in that sorry saga of whatever actually caused humanity to fall, and maybe even angels, aliens, and whoever. The theory is so general that it even applies to AI in computers and general rule-based systems set up in organizations.

Therefore, in addition to averting accidental nuclear winter, and in order to avert AI disasters, and any other general human disorganization disasters, I must continue to conclude (as I did for the first time on ~2024-08-06) that *nothing* called me to become the Apostle of *nothing* in order to put myself as a plug into that hole ("*nothing*") at the bottom of BABL's ocean of blissful ignorance from continued obliteration of any historically experienced lessons learned. If that turns Heaven into HELL and thereby brings hell into Heaven (for proper documentation in HELL), then so be it, because I see no other way to stop the ruinous self-destruction of Your World, Yah. Since my discoveries are abstract and computational, I see no reason why they would not apply in the same way in whatever higher dimensions exist in this or any other world. From as far as I understand, my mathematical theology conclusions about nothing are general. Yet only You can tell if I fell prey to some type of nothing I have not become aware of so far. Hence, I trust You, Yah, to catch me when I fall, as in Ps.139.

2.5. Becoming "the other goat" of Yom Kippur

For all these reasons I "hereby officially" volunteer to become "the other goat" in Lev.16, Your Great Atonement Ritual for turning the fate of Your World around through a Jubilee-based innovation economy. I told You about me volunteering many times in private, as I started in 2023 to reinterpret Your Yom Kippur Ritual for our time today³⁵. Yet, I don't know if it is acceptable to You. For on the day, 2023-10-07, while I was enacting the tiny bits of it that I thought I had understood in my idiosyncratic way, hoping for You to reduce the suffering in this world, Hamas started its horrific Yom Kippur war. What am I to make of the fact that the name of the guy who started it, Yahya Sinwar, reads to me as if a coded message telling me "Yah Yas in war"? You have been suffering with the hostages and all who have been bombed in Gaza. You still suffer with them. And why all that? Because I missed my window of opportunity when You had handed me chances to avert disaster so many times, yet I kept ignoring You! See Posters Po.E-Po.H in my Flying Scroll Exhibit for #MyGuilt-A,B,C,D. All these wonderful opportunities for salvation were destroyed by *nothing*. I know that Yas died for all my sins and to wash me, such that my robe will be white as snow and I can stand in the company of the redeemed.

But in light of #MyGuilt-A,B,C,D, how is that not the worst whitewash in history ever? How would that not go

³⁵ **Intiative.** I thought at the time that I started this and sort of still think that because that is how it felt like: it wasn't different from any of the many other things I did in my life that as far as I can tell were OK or turned out OK. Yet, I cannot exclude the possibility that You moved me without me realizing. I have been discovering in hindsight that You apparently moved me more than I had thought (e.g. see my sudden -2024-03-06(?) insight that my 2014 *J chem Phys* paper contained a key Jubilee-algorithm in addition to its other wonders). Therefore, in light of the importance of all this and the "coincidence" with the Yom Kippur Attack by YahYa sinWar make me retroactively doubt that I was as independent and self-initiated in my actions as I thought I was. Either way: I cannot resolve which it is without You opening Your LogBooks and I determined that it does not make a difference for me which of the many options it was. See the structuring of my Ketubah for why I have found peace with this odd division of labor. If I'm wrong, I trust You to sort me out. Why? Because I know not even *nothing*.

against what You say in Lev.25 about not taking advantage of my siblings? Sure, Yas as my Big Brother can bear it. But hasn't Yas borne enough abuse by me already? It's one thing to never realize something like #MyGuilt-A,B,C,D. It's quite something else to willfully escape my responsibility that You had given me and that I had accepted (before I jumped away, pretending I knew better than You what You really wanted). Apparently I knew no limits in my mansplaining, given how much of it I did to You! Please help me to stop. Therefore, **I beg You, for Christ's sake who died for me and for Heaven's sake to prevent hell on Earth:**

Please do not allow my record to be wiped of how my careless abuse of *ambiguous semantics of nothing* destroyed my last chance to avert the brunt of the Coronavirus pandemic and other disasters! #MyGuilt-A

Please break down the iron gates on my way to Pope Leone XIV, so he can hear my confession of #MyGuilt-A (see OL2, note #4) and #MyGuilt-B,C,D, such that You can throw the fig-tree of all my sycophant fig-leaves excusing myself into the ocean of BABL, along with BABL's millstone (SD6), and the mountain of guilt and debt that so far keeps devouring the world!

Please do not allow me to continue to take advantage of Yas as my older brother, who has been working day and night to rescue me and keep Your Kingdom together, despite my squandering of what You gave me. You warn in Lev.25 to not take advantage of siblings,

yet unless You move to rescue me from *nothing* and Or tell me what to do, I do not see a way how to stop my squandering of Your generous gifts. Yet, somehow, by Your Grace, I do see this needle-eyed narrow path of *gentle kind reasonableness* that appears to lead forward, if only one step at a time. Therefore, I will keep walking on, trusting that You will guard my feet to stay safe on that razor thin *Least Assuming Method Blade* that you made to *gentle kind reasonably* guide me, so that I will continue to reach Your Jubilee-Goals!

Please help me to start compiling HELL by aptly developing my

about my pandemic and other failures into Your Exhibit A, B, C, D for how misguided approaches to ambiguous semantics of *nothing* have for so long continued to destroy Your World and mine.

Please consider Posters **Po.E**+E2 for #MyGuild-A, **Po.F** for #MyGuild-B, **Po.G** for #MyGuild-C, and **Po.H** for #MyGuild-D as a nucleus for my PEARL, starting with my worst offenses.

Please help me apply Your 7 Resilience Healing map (7RH in SD7) to all disasters as I work for restitution!

Will this turn me into the most hated person on Earth? Maybe. I certainly deserve it, given the magnitude of my crimes of *grossly negligent careless dereliction of a life-or-death duty I had accepted* (#MyGuild-A), *false imprisonment of You and the world* (#MyGuild-B), and *embezzlement of divine opportunities* (#MyGuild-C,D). Why could I not be bothered to care to be my siblings keeper by following Your call, even despite clear warnings? I can only explain such blindness by me falling for the treachery of *nothing*.

Am I now throwing my life away by writing all this, as others say? If so, at least I will be doing in an honest mistake. Yas recommended to watch out for Your Kingdom and Your Interests first, instead of worrying about my own. After I wasted my life worrying about my own interests too much, why not give You the first place now for once and forever? Why should I now, where it matters most (as far as I can tell), not put You first? I know that You can take good care of me. But like Daniel's 3 friends, even if You decide to not rescue me in some way as I hope – for any of too many reasons I could possibly imagine: I made up my mind to keep You first, as best as I can. What else can I do on a planet that is about to self-destruct in accidental nuclear winter, and where to the best of my knowledge I must act as if I am the only one with a credible way to avert this ultimate disaster? The stories of Vasili Arkhipov, Queen Esther, Jonah, Yas, and many others gave me a blueprint. How can I ignore that without going against everything good and true I ever believed in?

The only other alternative I see is to wait for accidental nuclear roulette to strike, while I busy myself with lesser

problems, such as the color of bike-sheds. That makes no sense to me! Yet, some still recommend, to forget all of this and eat a blue-pill of oblivion, so I don't "worry" about all this. Maybe that's OK for them, because they don't know what they are saying nor see what they mean. But for me, how would that not be a betrayal of the highest order? It would be like telling You for years how I love You and want to care for You and what You care about, and then, when You finally ask me to do something, where it *really* matters, then I betray You in secret – by not keeping my promise (and pretend that that is OK).

I know that You can fight *nothing* and that You can teach me, so eventually You will be able to make me strong enough, so I will be able to defeat *nothing* in order to defend all layers of Your Kingdom. Therefore, until You tell me otherwise, I am determined to hang in there best I can, hoping and trusting that You will come through eventually, even if I can track Your progress only as imprecisely as those progress bars when copying deep file hierarchies, that never show of much % progress was made, because the hierarchy is too complex for simplistic linear methods to measure progress of a process that is probably more like for Momo in "Die unendliche Geschichte", where towards the end his final overcoming of the worst evil required Momo to keep making progress in slowing down until the core of the problem had been penetrated. This odd parable may illustrate what it means to penetrate the finite π depth of Gabriel's Horn when starting out in a culture that keeps binding itself to the infinitely stretched surface of Gabriel's Horn (see my draft of "*The Book of the Life of the LAMB*").

No doubt there will be doubters and haters who will accuse me of blasphemy or of being the devil. They did that even for Yas. Yas said that I could not expect to be treated better if I decided to follow Yas.

Yas invited me to tear down my own Temple (Jn.2:19), such that Yas can rebuild it in 3 days.

I herewith plead that You ask the Spirit of Truth to remove those 3 ever-morphing frogs of Rev.16, which keep confusing the world: I think they are related to the death-trifecta of *oversimplifying overcomplicating overreach*. These 3 are certainly powerful enough to deceive the world into thinking that You are the Dragon, Yas is the Beast, and Your Bride is the *False Prophet\Whore of BABL*. This death-trifecta certainly had me confused for too long.

Please stop this by sending Your SON with Yas' reliable *Semantics Organizing Nothing* from Yas' pinning down *ambiguous semantics of nothing \ason* on the cross to create the most memorable way of ensuring that everyone else will always remember the importance of *Cross Review Organizing Stabilizing Semantics \CROSS*. Please allow me to do the same by following Yas' example and thereby support You in delivering Your World from the clutches of *ason*. Yes, *nothing* is that bad in my BEEs \Best Evaluated Estimates.

So, when others accuse me of being "the Devil", please explain to them (or help me explain), why they are indeed correct and why I hope they will therefore work with me towards saving Your World, which is their world too, because ignoring the real Devil*nothing* is so much worse than anyone can imagine before it strikes.

In case I am indeed misguided despite my best attempts to avoid that, then please allow anyone to show me, which other Devil incarnate who is returning to You I may then follow instead, because if that person if Your currently best choice for the Devil You need to save the world, then I'd rather support Your Choice than my own.

Maybe other ways exist than my analysis above for identifying who the real Devil is. For me the above required developing a sufficient grasp of how You envision social ergodicity to work and why. I think I understand now why You have been waiting so long for someone to pick the lowest seat at Your Wedding, reserved for Your greatest enemy, whom You also treat as Your best friend. It's not that hard to understand when pondering what Yas kept saying about the first becoming the last and the last becoming the first. Obviously this doesn't end after any one era only to lock-in one group as the eternal winners and others as the eternal losers. Instead, under social ergodicity (see AIPTO CAN) this swap continues for all eternity in order to enable all Your Worlds to continue walking forward on two legs, each being first and last in turn.

If I look into my own life and how I have contributed to this present situation, I see tons of my own failures. Placed in context, I can see how that may as well qualify me as the most well-intentioned, disastrously hapless Hell-Boy Devil, who is trying to make amends for his past.

It is a stark step for me to propose such a new identity and to ask You to accept it. But if that is what it takes "throw my life away by sowing it into the Earth" in order to avert accidental nuclear winter or worse, then please make

it official and help me complete the deed, so I can find my new life in whatever You have prepared for me! But if all these ideas (all others claim to be too odd to possibly be true) are merely misguided pattern-matching on my part, then please, at my Moriah, correct my errors and take me back to where I lost You. I hope that You will do this in such a way that I fail fast so I fail early, while I can still correct course in such a way that I do not damage the true hope in other people's hearts. For the light of true hope in today's darkest time is most precious. See my official 1st submission of "LLoL's Ketubah for Yah & Yas" for a proposed strategy in order to best preserve the values of You and everyone in Your Kingdom while minimizing any potential damage to true hope for all.

I hope and trust that You keep me on Your needle-eyed narrow path to life, regardless of how incomprehensible it may look to me. I want You to get to save Your World. This World is Your's and You love it so much, especially all its billions of clueless people in it, who are all Your Children in one way or another and Your dear darling daredevils too. Please do not allow all of them to be destroyed by *nothing* for *nothing* in some silly accident like nuclear roulette triggering an accidental nuclear winter or extinction andOr worse by some other culmination of disasters.

Thank You for considering all this!

As faithful and true as I can be

as Your false prophet in the 7 Spirits of Boolean Truth

and as Your dear darling daredevil, loving You best I can,

Your *Laurence Loewe of Laodicea \LLoL*.
