Problem

How can a smart & loving God like Yah grant the Devil Free Speech in Paradise and be surprised that human AI fails the simple test of resisting its mis-information?

Answer

Because all sufficiently smart and empathic beings will overcome their *inner institutional inertia* to safeguard EDEN with a Jubilee-based self-stabilizing versioning system. Such a system has only now become available.

History

Time-traveling errors in versioning spaces kept humanity so far from any reliable long-term memory of any **VILE Villains Internationally Leveraging Evil**.

Solution

LLoL here sketches basics of **StayVS**, a **Stay**bilizing **V**ersioning **S**ystem that integrates the 4 Abrahamic Faiths into long-term reliable 'IronRod' Regimes to **Lead Investigative Versioning Evaluation**.
