

The full Iron Rod – in all its weight and glory

Navigating the general challenges of how to innovate well without running the risk of self-destruction is tricky. If it was easy, that problem would have been solved long ago. The next 2 pages contain LLoL's super-condensed "Iron Rod" for guiding **StayVS** decision-making to implement a long-term reliably **Stay**bilizing **V**ersioning **S**ystem. The 2 parts inspired by Ez.37 are too complex to explain here.

They are shown here to prove that LLoL produced variants he dares to try using, explaining, and evolving in public. LLoL is not aware of any remaining conceptual shortcomings, but only a trial by fire can prove the worth of such a complex and finely tuned system. Only then will it make sense to invest in writing the books broader audiences need to reap the respective benefits. If a book is filled by the StayVS Regimes (~9 of ~186 entries in IronRod PPv2), then all of it may need 16-20 similar books (or 6 super-terse books too abstract for most people, albeit maybe useful to some experts). **LLoL cannot write such books without a clear global mandate to become Joan of ArkMageddon with the mission to openly evolve StayVS for public use in his real-world aim of averting Armageddon-disasters.** Until then, LLoL can only **explain in person** how he envisions to evolve the StayVS IronRod to *gentle kind reasonably* avert disasters.
