

In order to work well together in Reality, Reality will transform language to precisely define accurate biouncertainty in real-world views.
– Zeph.3:9

Overview

Human languages are nearly century-stable as we can read century old texts as well as modern text, looking up occasional words.

Evolvix aims for that stability in computer languages that are accurate and precise to counter knowledge-faking.

Evolvix

of the **1600 Stadia Talent Vision**
for ResearchCity in **ZION of Earth**

Mission Vision

Simplify Accurate Modeling with a long-term **stable extensible humane computer-language** for

Zoning
Investigating
Organizing
Navigating

uncertainty in biology to **develop mental wealth in all** by self-stabilizing innovation.

Evolvix improves gentle kind reasonable decision-making

worldwide by **modeling** uncertainties, values, and logics, andOr **chronicling** decisions, outcomes, and annotations.

Armageddon Mission

Quantifying biouncertainty is Evolvix' greatest challenge. Earth's Armageddon is its period of greatest biouncertainty, hence, an ideal time to collect requirements for the hardest and rarest cases of Armageddon-grade use to be supported by Evolvix' evolutionary core architecture over the long-term.

This is a globally unique opportunity.

LLoL is uniquely positioned to capture Armageddon-grade cases of use if enough people support Evolvix' long-term vision to make the reliability of compilers available for all beginners, producers, experts, and AI in order to tame the clear and present dangers of nuclear andOr other ... AI Armageddon disasters at their source over the long term – by taming the Datageddon disasters that trigger them.

Evolvix is a hot candidate for all who see the strategic importance in investing into re-envisioning a future of computing with uncertain biodata.

EVX Conceptual Art does not sell a product of the past; it offers buy-in to evolve a language worth using. Meet current needs elsewhere.

Envision the next Jubilee-grade computer language here. For an Evolvix Prototype see nuclear killer app RiskyMAD in *Supporting Doc* SD1.
