

How the **Witches of andOr** may bring bring peace of mind – or hold humanity hostage at Armageddon over the question: **Who is God – really?**

A Usually the **Witches of andOr** help by giving people the power to describe complex conditional cases in concise statements with connectors like 'if, and, or'.

The **Witches of andOr** rule elegantly in the Boolean Spirit of Truth to decide, which of all potential cases do *truly* apply in the Context of a certain condition. Each Context is ruled correctly by the Spirit of Boolean Truth for each system in Heaven, hell, humanity, ... and in computers, even ensuring *Garbage-In Garbage-Out* \GIGO. Thus, a mistake in grasping "andOr" causes real-life errors via GIGO.

Bugs in logic code can be easy to do & hard to undo. LLoL's informal tests show **'and' is particularly bad:** in some tests of intuition ca. half the people saw an 'Intersection', half a 'Union' – but most had no doubts they were right! That's fun in a game, but not if lives are at stake – much less if gambling with eternity on Judgement Day before YAR! Words can look simple, but hide odysseys to meaning. LLoL took ~42 years from 1st reading of Rev.6 to naming the **andOrWitnessBug** here:

How to work well with the **Witches of andOr** in brief: *Each logic is shaped by a question at hand*, ignored only at peril of OSCR ToK! **Boole's aim: guard 'True', drop all non-true as 'False' or irrelevant**[not in OMNI].

1. Adopt the writers' mind to grasp ultimate aims.
2. Draw all nested logic filter statements to help check rare possibilities.
3. Find all potential **IN**put to ignore none relevant.
4. Check all conditions in Context for all IN-Items: if all *True*, move to **OUT**put, else mark Item as *False*.
5. Drop all duplicates in common OUT, because 'True' doesn't get more 'True' by repeating.
6. Do a sanity check or recheck to cut error rates.
7. Report all *True* **OUT**put harvest; cleanup all *False* as trash.

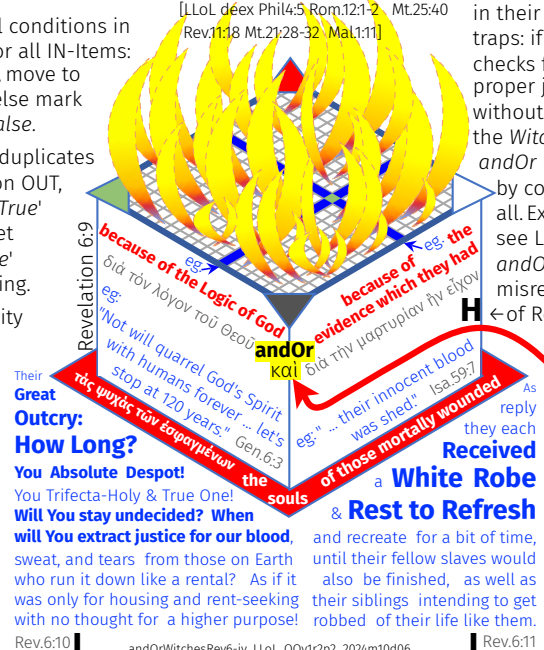

C Logical Latrine Service is \“true and proper worship” of YAR! That is how persons today can bring their body to YAR as a “living sacrifice” on YAR's Altar, Planet Earth, by building & guarding it *gentle kind reasonably*. – Eg. by proper use of logic for what matters most in global Laodicea, like serving the poor, not destroying Earth,... Yas warned: some say “yes” but don't do, while some protest but do serve YAR, sometimes without realizing. [LLoL déex Phil4:5 Rom:12:1-2 Mt:25:40 Rev:11:8 Mt:21:28-32 Mal:1:11]

Evil magicians, lawyers, ... abuse **Witches of andOr** in crafting crafty conditions: good-looking offers that trap naive people in bad contracts they'd not take if they knew more, that is if the *info-ecology* was less unequal. Yet, magicians often forget: YAR sides with trapped people to trap the trappers in their own traps: if YAR checks for full proper justice without mercy, the **Witches of andOr** kill all by confusing all. Example: see LLoL's andOrBug misreading ← of Rev.6:9 → **K**

E Is YAR evil as some say? If info ecology is so unequal, YAR can justly trap all in hell with only a few *Intersections*. To prove it, badass Yas rode an ass & was crucified as a criminal.

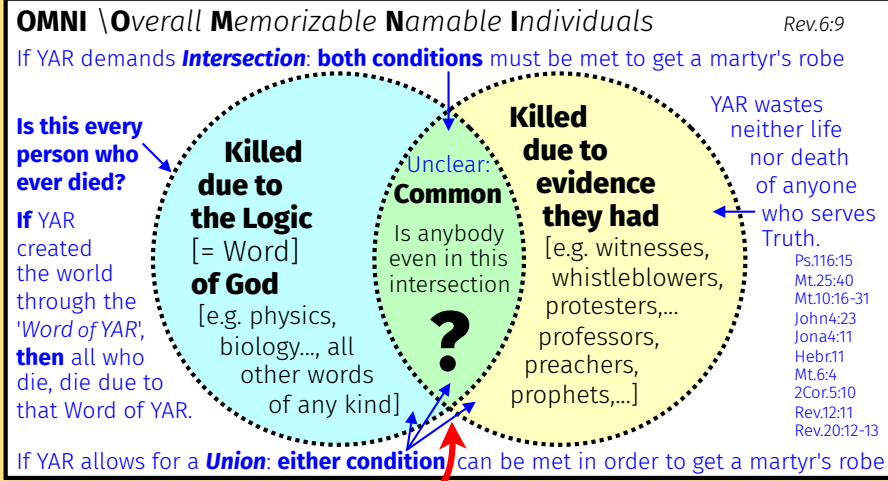

Yet, YAR's Love is proven! But how can YAR keep forever-doubters safe in YAR's VOID, so the trident of *nothing* that fuels the **Tree of Knowledge-faking** can no longer kill them?

G In a Show! Greatest story ever in a surprise-packed wedding tear-jerker in clever adventure action, competing to win, games, comic relief, ... fun, something for everybody: a white robe & a clean slate.

ambiguous semantics of nothing\ason fuels the OSCR death-trifecta that auto-assembles bugs\idols **OverSimplifying OverComplicating OverReach\OSCR** by **Blindly Assuming Blind Leveraging\BABL**.

VOID\Vital Organizing Integrating Destiny\Versioned Omni Integrating Debugging::= the trifecta-holy naming of everything by God\Yah\Allah\Reality\YAR to support *gentle kind reasonableness*.

- L** If a harsh, greedy penny-pincher decides, Mt.25:24 Lk19:21 who reaps without sowing, gathers without investing: then **Intersections** are also likely to demand *specific 'words' & 'witnesses'...* → Then who will ever get Rest?
- M** If a generous, smart, life-mentoring investor has Rev.6:9-11 as long-standing policy, he'll certainly reward the **Union** of both, with extras for smart high-risk high-return strategies, and for zero-day bugs if he cares about security. If he's a loving father, he'll reward all his kids, but without spoiling them. Both will defecate everybody well. See eg. Mt.25:14-30, Lk.19:11-27, Mt.7:7-12, Lk.11:5-13, Eph.3:14-21, 1John 4:16, Jonah 4:11, Isa.66:13, Exodus 20:6, Exodus 34:7 Num.34:18, Deut.5:10, Deut.7:7-9, Ps.103:17, Ez.18:23+32, Rev.15:7, Rev.3:19, Rev.7:17, Rev.21:4, Rom.5:8, Rom.8:39, Eph.2:4, 1Tim.2:4, 1Tim.4:10, John 3:16-17, Qu.1:1-3.
- N** Is YAR L xc M? This question led to a brutal cosmic war with ArchMessenger Michael\WhoIsGodLike Rev.12:7 It's sorted now: **YAR can only be gentle kind reasonable** to run the universe. **If so, we better learn it too.**
