Witches of andOr select elegantly **Which** cases (of all hypotheticals) **do truly apply in the Context of a Condition** that uses Boolean relations like 'if, and, or'. They auto-choose correct Boolean Logic expressions from the 8 below. The cost? Ignoring their magic andOr Context can lead to confusion! Say 'andOr' to explicitly highlight the 8-fold ambiguity without OMNI; say 'anyall' to also include the 8 of 'andOrN':

C **Witches of andOrN**

do the same, only for OMNI andOr Negations:

Bad bugs happen when nothing andOr VOID leak into OMNI:

¹ A few of their many names since George Boole (1847). Only these 16 binary True-False operators exist. They power all computers!

How the **Witches of andOr** may bring bring peace of mind – or hold humanity hostage at Armageddon over the question: **Who is God – really?**

A Usually the **Witches of andOr** help by giving people the power to describe complex conditional cases in concise statements with connectors like 'if, and, or'.

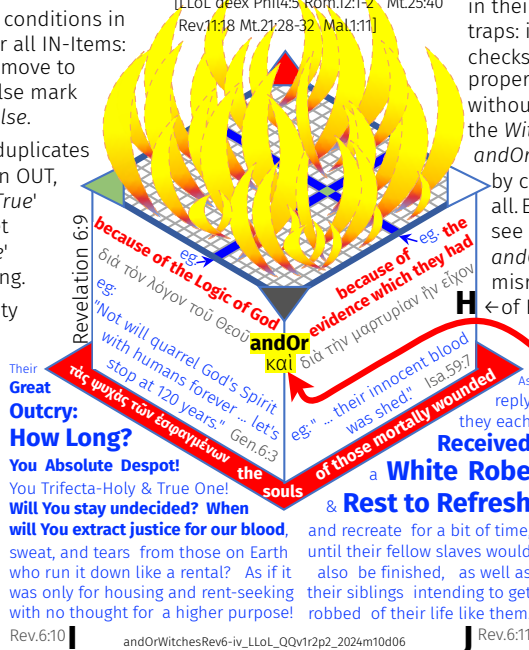

The **Witches of andOr** rule elegantly in the Boolean Spirit of Truth to decide, which of all potential cases do *truly* apply in the Context of a certain condition. Each Context is ruled correctly by the Spirit of Boolean Truth for each system in Heaven, hell, humanity, ... and in computers, even ensuring *Garbage-In Garbage-Out* \GIGO. Thus, a mistake in grasping "andOr" causes real-life errors via GIGO.

Bugs in logic code can be easy to do & hard to undo. LLoL's informal tests show **'and' is particularly bad:** in some tests of intuition ca. half the people saw an 'Intersection', half a 'Union' – but most had no doubts they were right! That's fun in a game, but not if lives are at stake – much less if gambling with eternity on Judgement Day before YAR! Words can look simple, but hide odysseys to meaning. LLoL took ~42 years from 1st reading of Rev.6 to naming the **andOrWitnessBug** here:

How to work well with the **Witches of andOr** in brief: *Each logic is shaped by a question at hand*, ignored only at peril of OSCR ToK! **Boole's aim: guard 'True', drop all non-true as 'False'** or irrelevant[not in OMNI].

1. Adopt the writers' mind to grasp ultimate aims.
2. Draw all nested logic filter statements to help check rare possibilities.
3. Find all potential **IN**put to ignore none relevant.
4. Check all conditions in Context for all IN-Items: if all **True**, move to **OUT**put, else mark Item as **False**.
5. Drop all duplicates in common OUT, because 'True' doesn't get more 'True' by repeating.
6. Do a sanity check or recheck to cut error rates.
7. Report all **True OUT**put harvest; cleanup all **False** as trash.

C Logical Latrine Service is "true and proper worship" of YAR! That is how persons today can bring their body to YAR as a "living sacrifice" on YAR's Altar, Planet Earth, by building & guarding it *gentle kind reasonably*. – Eg. by proper use of logic for what matters most in global Laodicea, like serving the poor, not destroying Earth,... Yas warned: some say "yes" but don't do, while some protest but do serve YAR, sometimes without realizing. [LLoL déex Phil4:5 Rom.12:1-2 Mt.25:40 Rev.11:18 Mt.21:28-32 Mal1:11]

Evil magicians, lawyers, ... abuse **Witches of andOr** in crafting crafty conditions: good-looking offers that trap naive people in bad contracts they'd not take if they knew more, that is if the *info-ecology* was less unequal. Yet, magicians often forget: YAR sides with trapped people to trap the trappers in their own traps: if YAR checks for full proper justice without mercy, the **Witches of andOr** kill all by confusing all. Example: see LLoL's **andOrBug** misreading ← of Rev.6:9 → **K**

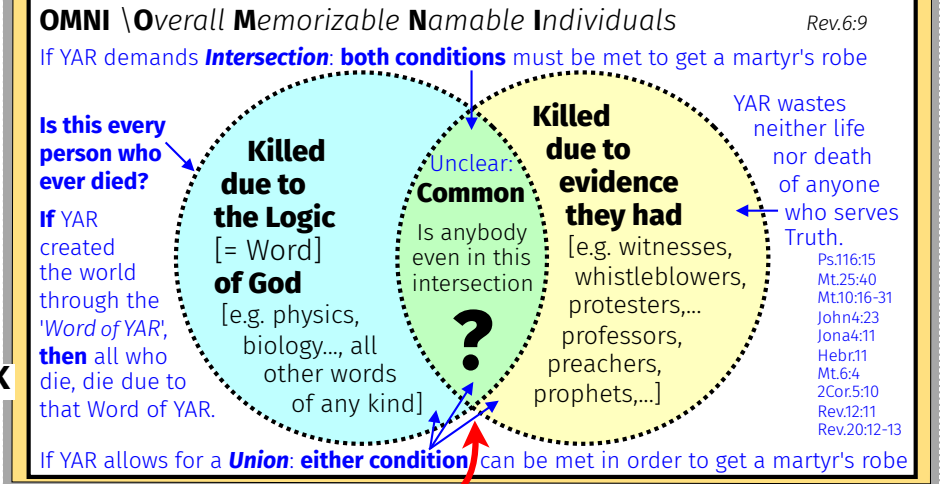

E Is YAR evil as some say? If info ecology is so unequal, YAR can justly trap all in hell with only a few *Intersections*. To prove it, badass Yas rode an ass & was crucified as a criminal.

Yet, YAR's Love is proven! But how can YAR keep forever-doubters safe in YAR's VOID, so the trident of *nothing* that fuels the **Tree of Knowledge-faking** can no longer kill them?

G In a Show! Greatest story ever in a surprise-packed wedding tear-jerker in clever adventure action, competing to win, games, comic relief, ... fun, something for everybody: a white robe & a clean slate.
