Evacuation Map: Invert BABL's Millstone to get a Compass to ZION

Reap FEAR Aim: End the Going in Circles in Data Deserts for Human Cultures **Seed EDGE**

Why is history walking in circles in the desert?

Peace, War, Peace, War, ... Some say, history shows: people don't learn from history, not even in 2023. Each conflict is different, too different for useful predictions? Analyses show with certainty:

War needs no God but is impossible without a devil. (1)

Guarding Heaven is impossible without the eternal memory of an IDEAL FLAMES HELL (2)

Else Heaven would go in deserting circles, as this millstone of BABL, which has no hope of using lessons learned beyond its next overreach. Such is BABL's power of BAAL, ASHERAH, & MOLOCH, a death-trifecta algorithm, set to destroy humanity in a 7DUI[1] Armageddon. To avert it, all humanity has to work together to:

ZION for Zoning Investigating Organizing Navigating

Systemic reasons force *all-or-none* dynamics. So, anyone who wants to make it, must support all others too, including those who can't yet see it that way. Typical logics of competing & coveting, friend & foe guard what misleads at Armageddon.

This millstone defines gradients of behaviors, ranging from heavenly (at 000) to hellish (at 666). If no insights motivate better efforts, inertia of data in changing worlds will cause beings to slide downhill to deadly cliffs. For human, AI, & others: BABL's complexity-traps snap long before victims notice. See Titanic, 1912. Yet, how we apply historic lessons if the real points of decision are invisible and people can't read the 'signs of the time' on BABL's millstone clock?

No world peace without peace among religions. The BABL defined here is no religion: it's a set of complex hidden bugs that targets *all* complex worlds. BABL must fall if humanity is to survive AI turbocharging of this death-trifecta algorithm.

This figure aims to invite the global review and explaining required to overcome BABL's 666 by ZION's 888 model for stabilizing innovations.
