

Potential Contexts: How Yah may Bind Strongmen to the Greatest Law of Love via its Economic Equivalent, the Greatest Law of Innovation:

- A** The purpose in people's vocation to work is to innovate for sharing the good of creation in order to keep improving how **full, proper, regularly-scheduled 50-year Jubilees** are implemented, because without working together on this, the bashmoling death-trifecta from the ever-winding worm in *nothing* will destroy all fruits of innovation through *inactive incurious ignorant indifference*, i.e. by doing *nothing*. This inevitably triggers
- B** **OverSimplifying** by **BAAL** \Blindly Assuming Aggravating Leadership, growing Least Inconvenient Explanations \LIEs that grow
OverComplicating by **ASHERA** \Automatic Stereotyping Habits Erroneously Rounding Against Hope, growing Structurally Inconsistent Notions \SINs that grow
OverReach by **MOLOCH** \Mistakes Oppressing Life Ordering Cruel Habits, growing Driven Evaluations Antagonizing Thoughtful Hypothesizing.
- C** Countless Analyses have shown that such DEATH in overcomplicated datageddon decisions always precedes destruction in a systems local Armageddon. Ultimately, the collapse is inevitably triggered by not refusing to **Include Self-Magnifying Ruining \ISMR** from the **Tree of Knowledge-faking \ToK** at an earlier time. When Paul preached in Rome, did he quote Lucan (59 CE) who put this in a nutshell as *in se magna ruunt* (Pharsalia 1:81)? Isaiah 28:14-21 called it a Covenant with DEATH. My analyses have shown that it is a self-assembling doomsday device, which is activated by "simply doing *nothing*", and unless we find a way out, we doom ourselves!
- D** To help, Yah gave Moses ^{Lev. 25} a razor sharp analysis of how to start escaping this death-spiral: improve Jubilees, starting with some basics about land ownership. Yet, nearly 70x50 ≈ 3500 years later, and after starting a few world religions to try a different angle, Yah is still wondering if Earth will ever produce such a fruit of Justice. We now reached the end of the road in our Age of Laodicea, the Age of Conspiracies marked by busy-slumber that ignores what matters most: catching up on over 3 millennia of lack of practice before humanity's final exam, which requires sufficient innovation to stop the 7 Death Urn Incinerators of Rev.16. Here are the remaining options as outlined by Jesus in Mt.24:
- E** **Worst: Flee BABL on Sabbath**
That would be when Yah explains to all in Heaven what we easily could have done but didn't because we were careless. See LLoL's Jonah experience on why this is most frightful. Yah would have to go back to starting with "stones in the desert" to raise worthy children for Abraham as John the Baptizer said. Mt 3:8-10
- F** **Harsh: Flee BABL in Winter**
We finally realize while still on Earth what all this was about, but because we missed our window of opportunity from misreading the signs of the times, there is nothing much we can do about it other than recording the disaster in the hope that someone later can decrypt the record of what really happened and hopefully enter the Promised Land in time. Proper Jubilee conditions require
1. Something worth redistributing, and
2. Enough wisdom and experience to make smart decisions on mechanisms for how to do it.
- G** **Challenging: Flee BABL in great Tribulation**
If - and what a great if - someone happened to learn how to read the signs of the times, and studied enough of history to see how the previous attempts were derailed, and the time is right, and Yah helped in overcoming all challenges posed by all of the 7 churches of Revelation, such that there exists a nucleation point for crystalizing how this might work (like when salt crystals grow): Then someone like this could help serve everybody by pointing to the path of how to combine as in Rev.3:14-22:
1. A hot heart of love for God and neighbors, like Jesus had;
2. A cool mind for the systemic math and computing analyses required to solve the challenges posed by any Jubilee.
Yet, walking this path is a great scary desert, which Jesus for good reason described as "great tribulation".
- H** **What will we do?**
Solomon maybe could have ...
Laodicea looked like it could have ...
I know that I could have spoken up, but only if I really cared as much as I thought. If Paul thought he was "the greatest of all sinners", I think I can prove that I'm even worse without intending. What will I do with this? I decided to ask Yah to put me into the Isa.59 gap - and train me with what ever I may need so I can give Yah whatever Yah needs so that our world does not have to be destroyed. It appears Yah completely rewrote my eschatology as a response. But am I correct or did I somehow "bashmol myself"? That is a boolean logic query way too complex for me to decide. Hence, I was called to "put my research on the Altar in Moriah". This is what I'm doing. I hope Yah replies to rescue me and humanity; I can't myself.
