To avert existential disasters through true regular Jubilees, L. set aside his career in order to envision how to save all.

Older work is at Google Scholar:

Web.Archive.Org has more.

It is a crime to knowingly conceal existential good news that can deliver others from death by default if shared.

The Jonah License acknowledges this reality by making it as easy as possible to share content and by encouraging all to build *gentle kind reasonable* work-logic cascades to help others with making life-giving decisions. It reads:

LLOL crafted the **Jonah License**, here in "**MockupModel version 1**" \MMv1, in order to best help spreading the superrational logic of the *gentle kind reasonable* way LLOL discovered to avert accidental nuclear winter.

Whether this discovery was by serendipitous accident or by divine providence, LLOL cannot say conclusively yet. Based on his experience, LLOL believes that the great stream of discoveries that upholds his claims is a miracle of the highest order, disguised in everyday events, and therefore divine providence hiding in plain sight. This is based on "LLOL's" mathematical theology of Yah's Torah, Yas' Revelation, much more, and LLOL's life experience shared with Yah & Yas\Jesus since 1978.

This note on the background of the work that inspired the Jonah License may be of interest to those who wish to evaluate its clause (3) about Judgement Day. In LLOL's experience, **personal decisions on what to do with a given understanding are pivotal**. Thus, his best recommendation is to take extremely serious the wisdom of one's own conscience pointing to better integration of all insights into the Truth about Reality from all perspectives.

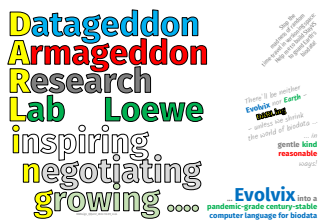

Jonah License \JoLi MMv1: "This content is

1. Free under CC0 (<https://creativecommons.org/public-domain/cc0/>).
2. Copy, adapt, sing ... it to *gentle kind reasonably* avert Armageddon.
3. **Prepare to explain on Judgement Day what you failed to do with it.**
4. Version and date your changes if you can." (JoLi MMv1_2024m10d18)

See Box B2 for an example of how to apply the JoLi to a file, Box B1 for a brief note on the background of its origin, and Box B0 for the technical definition of disasters it implies.

To facilitate feedback for further improving the Jonah License, an upcoming stable webpage explaining more details is planned at YasPyr.com/license/JoLi/ for after LLOL's *Flying Scroll* Exhibition takes off under JoLi MMv1.

¹ **Backslashes "\" define perfect synonyms that act like different labels.** LLOL uses these throughout as follows: **xly** means that **y** "is hereby defined as a perfect synonym of" **x** in this context. Thereby "**y**" and "**x**" become **equally valid symbols** for whatever they point to in reality. Without this Evolvix BEST naming technology LLOL could not have envisioned the 2nd Exodus he is now calling for. His BEST Names paper is Loewe et al. (2017) <http://dx.doi.org/10.1111/nyas.13192> *Annals of the New York Academy of Sciences* 1387: 124-144; with a 74 page Supplement.

GNP/MMv1

is released under the **Jonah License** for the reasons given in this intro.

To keep following the Spirit of Truth, LLoL's official GNP releases in the future will continue to follow the spirit of the JoLi, even if letters of JoLi text may get updated.

For future releases of official GNPs, see its upcoming new homepage YasPyr.com/GNP

Purpose: The Jonah License is designed for existential emergencies where grave threats and/or disasters will cause great loss of life if *incurious ignorant indifference* continues to cause inaction in matters vital for survival. Like placing content deliberately into the public domain under a Creative Commons CC0 License, the JoLi minimizes legal constraints. Assuming freedom of speech, it seeks to best enable all to pass on, improve, translate, adapt, ... any content under the JoLi to best avert disasters in the most *gentle kind reasonable* way. Thereby, it encourages every **Agent Responding Kindly** to use the divinely-given, natural supercomputer between their ears. It can help grow *gentle kind reasonable* work-logic cascades that efficiently self-organize essential information infrastructure. Therefore, meaningful **Access to Reasonable Knowledge** can be enabled by *gentle kind reasonable Acts of Random Kindness* that avert impending disasters by sharing insights under the JoLi. The JoLi differs from a CC0 public domain license in encouraging (*not enforcing!*) some best practices (like versioning to reduce data chaos). It also reminds that death caused by distant *incurious ignorant indifference* still counts as death caused by lethal inaction at a time when a lethal disaster was still avertable. Hence, the JoLi recommends choosing *now* to not waste opportunities for *gentle kind reasonably* organizing data to avert Datageddon data disasters that trigger real-world Armageddon disasters that can be averted by intelligent actions that guard *all* life. Actions and inactions that cause a death both must explain that death on Judgement Day. **Why not simplify eternity by overcoming deadly incurious ignorant indifference with gentle kind reasonable data-sharing?**
