Datageddon is defined by
data too disorganized to avert
disaster. Each Datageddon therefore
always triggers its Armageddon-disaster –
unless *gentle kind reasonably* resolved in time.
Datageddons self-organize by *incurious ignorant*
indifference. Like accidental nuclear winter ... as I can
prove. Here **I invite Your Excellency to preview my**

Inside (see SD1) is my
probabilistic forecast of

ground-breaking
new solution
to the hard
and urgent
problem of
accidental
nuclear
winter.

Your Excellency can
only ignore me at Your
Excellency's own peril.

Will Your Excellency aid
my Coalition of the Willing
to avert a nuclear Armageddon?
