

① **Will Your Excellency join my Coalition of the Willing ?** Let's call on Earth's Titanic Command-Bridge to allow a ResearchCity to replace the fate of accidental nuclear winter (... or worse) with a destiny of growing Jubilee-based innovation economies !

To authenticate his mission Moses got 3 signs for Pharaoh, but he hesitated using them. To authenticate my message to officials I got the same 3 signs, abstracted for today's big data society, and an extra one because I am late.

I am here to avert accidental nuclear winter, and to succeed I must explain to officials the signs I was given, so they understand them.

They may believe it or leave it. My Job is to speak Truth to power with compassion. My silence is ultimate violence. Your Excellency can only ignore me at Your Excellency's risk.

To simplify explaining my 4 signs, I prepared Posters Po.E-Po.H in my Flying Scroll Exhibit. These require my extra explaining to clarify.

Web structure of Good News Pack\GNP MMv2
Folder in GNP/MMv2: Content of folder:
good-news-sample = into supplement for letters for leaders
open-letters-pack = 11 Open Letters for world leaders
supporting-docs-pack = SD1-SD3 of 10 are in gn-sample printout
about/loewe-bizcard = 4-page BizCard distillate of my Jonah call
flying-scroll-exhibit = Posters I need to explain my mission.
dont-panic-guide = 13 songs for calm in existential crises
extra-good-news = Book of Life, IronRod, Ketubah, ... deep.
dust-of-deep-data = more of my work on shoulders of giants

② To find better ways to distribute risks and work loads, I build work-logic cascades for Reality's ResearchCity. I found a methodology to keep it all gentle kind reasonable for ONLY ~\$8 /year /person (max for each Talent Stadion to limit influence shopping by rich special interests).

But outside of movies, who will care to save the world gentle kind reasonably if it's all based on ONLY ~2 cent/day ?

⑤ What I printed out is a small appetizer only – yet it already likely overwhelms.

To not get lost, I must explain my data. I can answer many questions in person

but can't predict Your Excellency's focus in writing. My calculations forecast that if I can't reach Earth's Titanic Command Bridge in time, the world self-destructs.

Will Your Excellency let me explain how to avert accidental nuclear winter?

GNP content shared here is FYI, for convenience, backup, preview,... and to comply with my best Transparency Pledge (in SD9). For now this CAN NOT REPLACE MEETING me IN PERSON. The Flying Scroll Exhibit so far needs me in person to explain ResearchCity, how it works, & why it is so crucial to scale it up well. My 11 Open Letters explain why this matters to different audiences. My Good News Sample printout shows: the problem is real and I am serious in calling for open global review of my call for a UN Mandate here.

Therefore, please get senior leadership to call me, so I can explain my Flying Scroll, its 4 authentication signs, & more.

③ Saving the world from today's mix of confusion requires a deep crystallizing point that is wide enough for all. Here I offer my crystallizing core, sketched out in my Flying Scroll Poster Exhibit. It drafts in super-condensed form my vision to scale up a global ResearchCity for Reality with a wid-e UN Mandate to find best ways to save the world. It integrates everyone's Truth with a gentle kind reasonable logic for big-data innovation – without fear or favor for friends and foes.

⑥ **Warning: Do not try to introduce Your Excellency's self to my Flying Scroll Exhibit without me at hand to orient and answer questions on the spot.**

To do so will likely confuse and may destroy my chance to save the world by gentle kind reasonably explaining in person how the vision works. Hence:

Me + Flying Scroll = a working vision to save the world. Splitting up kills it all.

Transformation happens when everyone encourages visions to:
1. Get people together, for everyone has something real to offer.
2. Remind all of the strength of their roots in the Truth in each.
3. Listen to everyone's insight into the Truth they see in Reality.
4. Join everyone to LinkSpaces that help in connecting the dots in broader contexts, to grow logics gentle kind reasonably in Reality, to nurture Jubilee-based innovation, to form a more perfect union.
5. Encourage use of gentle kind reasonable work-logic cascades to leverage ResearchCity's efficiencies of scale to serve everyone. Then Reality leads all, each on their own hero journey into Truth. Take a ride with me on my Flying Scroll Exhibit, to find out how.
