

Dear Chief of Staff,

Thank you for taking a closer look at my Open Letter and for considering to allow me to **meet Your Excellency**, so that I can explain the relevance of my findings directly. This **may introduce Your Excellency faster to my Flying Scroll Exhibit**, as I can then better link Your Excellency's questions to logic explained on my **Core Posters**.

I hope to win Your Excellency's support for my request that my *Flying Scroll* Exhibit be **reviewed openly globally** by everyone with an interest in averting accidental nuclear winter and other existential disasters. After finding a *gentle kind reasonable* strategy to avert the worst, I owe it to all to allow everyone to decide how to proceed.

I invite Your Excellency to consider how to best share my Good News Pack, with or without coordinating with me and other open letter recipients. I hope to organize a memorable introduction for my *Flying Scroll* to aid its cause. I'm grateful for Your Excellency's patience and support in this.

Faithfully Your's, Laurence Loewe of Laodicea \LLoL

Dear Public Relations Coordinator,

To honor Truth and avoid selling false hope I did all I could to refine and test my vision. This included my best good-faith attempt to contact known world leaders with a request to review before going public. Yet, my Open Letters OL0-OL6, sent to bring peace to Earth on Christmas 2025, did so far not yield invitations to review.

The feedback I did get from traveling to Washington DC to ease pre-review was that nobody will pay attention to my work unless I go public. Hence, I'm now uploading a slightly better variant of what I submitted for review in 2025.

I asked Earth's Titanic Command Bridge first to approve my *Flying Scroll* Exhibit for public consumption. Given how deadly the problem is, I can not afford to delay release on the web. If Your Excellency wishes to work with me to help clarify my call in today's noise, please **call me to coordinate**. I hope people of Earth will sway their Titanic Bridge in time.

Faithfully Your's, Laurence Loewe of Laodicea \LLoL

Dear Influencers,

As you know, sharing *a message for the world* on the WWW is hard: more languages, subcultures, & web standards demand work too complex for any *one*. Therefore, I focused my *Good News Pack* on essential, universal functionality – hoping others will join me later in the huge task to translate globally. **If you can read this, you may wish to help me share the Good News on how to avert accidental nuclear winter and worse.** To make it easy to share my materials, I uploaded them online to **<https://Balospe.com/GNP>** as MMv2 "MockupModel version 2" of my "Good News Pack" under my public domain (CC0) "Jonah License". It aims to help early adopters in translating the GNP's functional core for diverse audiences. In time I hope to support, integrate, and share all such translation work to improve future variants of the *Good News Pack* for the benefit of all. Please don't hesitate to ask questions. Thank you for your patience as I work to scale up responsibly. *Faithfully Your's, LLoL*

Washington, DC
New York City, UN
Rome, Vatican
Jerusalem, Moriah
and beyond ...

To keep Earth's Titanic from hitting that evil iceberg ahead:

It is **better to convince the Command Bridge to act** than to start a "passenger movement". But the Great Filter *requires* that all **learn to work together!** To **rebuild trust** in institutions it likely helps Command Bridges to know if **passengers really care** more **about a safe journey** than about "extra AI speed".

To best reach me please use the FeedbackFlow FF System set up at Balospe.com/FF for detailed comments or at [Balospe.com/contact](mailto:press@balospe.com) for broader aims to help presort FF emails. Members of the press can email press@balospe.com - my personal email is LLoL@balospe.com. Text to call me at +1(608)556-5594
