L's Ketubah is a reply to MS's 2017 *Thoughts* below, **Fig.K17**.

**Nukes Race or
Jubilee Race ?**

I support LLoL's vision to scale up **ResearchCity** in ~7 Stages to **avert accidental nuclear winter** ... & tame AI by running Yah's **Great Jubilee Race** via **Fiduciaries Sharing Futures**, paid to focus on what matters most to aid common goods for all. To limit risks I pledge **ONLY ~\$8/yr** for an official ResearchCity. **I pre-sign & share** LLoL's POAATAD (Fig.K13, **pages 296-298**) **Power of Attorney Advocating To Avert Disasters** at ~\$8/yr /person to raise interest, discussing LLoL's Good News openly.

PreSigned Electronically *by every concerned volunteer*

POAATAD is a Power Of Attorney to enable ResearchCity as led by **Laurence Loewe of Laodicea\LLoL** as attorney in-fact: POAATAD authorizes work for 1 year and is limited to gentle kind reasonably Advocating To Avert Disasters of any kind. ResearchCity aims to gentle kind reasonably avert worst disasters first by balancing diverse and dynamic requirements. ResearchCity builds on its best available work by refining **wide interdisciplinary diversity-encouraging \wid-e** research. To stay gentle kind reasonable, ResearchCity keeps improving by following the life-trifecta hallmarks of any epiocracy: epiocracy is defined by the trifecta-rule of gentle kind reasonable balancing. It implies the easing and explaining of parity-preserving insight-information for every party, integrating the views of each party (to cut bias by aggregating).

Under the epiocracy rules of gentle kind reasonableness, in this POAATAD power of attorney in-fact **I herewith empower Loewe and whom Loewe empowers through ResearchCity in order to ...**

- (1) ... **advocate** anywhere on my behalf to avert avoidable disasters, starting with the worst;
- (2) ... **scale up** gentle kind reasonably a sufficiently large ResearchCity, evolving in 7-8 stages (each ~1+6+1 month long) in order to effectively and efficiently avert nuclear winter by dismantling 7DUIs;
- (3) ... **solve** existential disaster challenges from local to global scales, by supporting free access to solutions from the insight-**Tree of Life-giving decision-support \ToL**, and by supporting ToL growth;
- (4) ... **negotiate** with Earth's "**10 Nuclear Kings**", the UN Security Council, and all relevant experts to "Put Earth in an Escrow" to avert nuclear winter until ResearchCity gets a chance to work;
- (5) ... **engage** with challenging cultural, social, political, economic, ... and spiritual questions or preferences to aid communication across old barriers to improve global healing resilience;
- (6) ... **start** building **AIPTO** into the global **Atlantic Indian Pacific Treaty Organization** that will assume responsibility for balancing *all* global security requirements – via advanced soft-war Work-Logic Cascades that no longer need nuclear weapons nor their brutal hard-war WoLCs;
- (7) ... **explore potential offers by extra-terrestrials** to aid humanity survive its Great Filter by helping to fight coveting mind-viruses; this includes especially **Jesus\Isa\YhowShua\Yas**, who also is an oppressed refugee academic from the Middle-East, hoping to lead a Jubilee-based self-stabilizing innovation economy before humanity self-destructs; because Yas defined and passed the hardest trifecta-vetting imaginable for extra-terrestrials, I expect Loewe to submit ResearchCity to Yas' leadership in any form Yas\RealQuestAnswer may return.

As I execute this POAATAD transaction, each unit of **~\$8/year/person/stadion** I transfer goes via Loewe and Loewe's subsidiaries to a 'mustard-seed network of trust'. It builds, guards, and runs ResearchCity to shield the world from accidental Armageddon disasters – by averting 'datageddon' confusion from misaligned data that triggers respective disasters if not resolved.

I trust Reality in Real Quests for Real Answers to guide Loewe and thereby ResearchCity towards the most gentle kind reasonable solution accessible in any given context.

Thus, I understand that Loewe must resist Blindly Authorizing and Auto-Stereotyping Habits to avert Mistakes Oppressing Life Qmitting Crucial Help, even if it can be hard to avoid common oversimplifications. I understand Loewe can only win through the scientific method of Jesus (to love all enemies by listening to all grains of truth they share). I understand that Loewe is not my enemy, even if Loewe talks to my traditional adversaries in open searches for global solutions. Loewe is bound to make mistakes. Hence, I support Loewe in documenting them as best as possible in his **Peer Evaluation Analysis Reviews Library**, to be shared in ResearchCity's global **Historically Experienced Lessons Library \HELL** as a public PEARL to reduce related mistakes.

I understand: (a) **All this is and stays voluntary.** (b) **I can afford to risk trusting Loewe for 1 year.** (c) **If I follow advice, I still carry all risks of (not) signing.** (d) **No refunds: I enable Loewe for 1 year.**

Nuclear roulette only ends if *all* work together to solve the worst existential "super-wicked" problems. These self-organize conflicts so evil, nukes seem desirable. Loewe identifies them as humanity's **7 Death Urn Incinerators** see Rev16 & science, only a ResearchCity can peacefully solve all these **7DUI** challenges:

- (1) evolving pandemic pathogens, chemical mutagen cancers, decay of health-care: all due to slow-motion exploding data disasters;
 - (2) overfishing, seaspiracy, and/or pollution kill ocean ecology: shared global conditionals die;
 - (3) water wars, soil erosion burn all wells: grass-roots initiatives die;
 - (4) global heating feeds storms;
 - (5) tongue-biting caused by beastly mindless job tasks;
 - (6) growth by extraction dies;
 - (7) extinction by AI, nukes, etc.
- So-called '**Armageddon**' thus technically is "flooding by any of too many 7DUI-disasters to avert them by traditional means without globally growing a **7Capstone in Uniting States**". To survive, a '**7Cap**' must be the highest law in a global epiocracy constitution, where Reality's life-trifecta governs to:
- (1) form a more perfect union;
 - (2) improve general justice;
 - (3) grow domestic peace;
 - (4) provide common defenses;
 - (5) promote general welfare;
 - (6) secure all blessings of liberty;
 - (7) preserve posterity for all by waging peace in ResearchCity to support all **Fiduciaries Sharing Futures \FiShFus**.

Limited Durable 1-year **Power Of Attorney Advocating To Avert Disasters** \ POAATAD

Contract with **Laurence Loewe of Laodicea \ LLoL** to win trust for his ResearchCity vision to avert Armageddon-disasters

Powers of attorney are sharp tools for guarding justice. Abuse is harshly punished. POAs are not given to someone not trusted.

Why then trust Loewe with a POAATAD when he's next to a completely unknown stranger? **Considering the alternatives shows why:**

First, it's a very limited POA that does not keep anyone from anything, including blowing up the world. It is biased against all who would like to blow up the world, because it empowers Loewe to advocate against destructive actions. Anyone can do that, but with this POAATAD Loewe no longer only speaks for himself. It also binds himself to see all sides when he uses his voice and insights to advocate against destruction by identifying certain actions as more likely to leading to disaster than others. Anyone who tried knows that this is complicated. Hence Loewe's need to also empower a ResearchCity for binding him to the Truth about Reality. **Loewe will only succeed if he stays in ResearchCity's light of full transparency. It's the only way to avoid growing nefarious secrets.** If Loewe isn't transparent enough, next year's

conceptual art PDF sale will cut his funding because (i) people will no longer buy into what he does, (ii) **sales must stay voluntary to work**, and (iii) **Loewe can't accept special-interest money if indeed ResearchCity is to work for all**

Second, all who default to "no" may wish to ask: (i) **"Do I have someone more qualified to advocate on my behalf to avert disasters?"** If so, wonderful. Loewe doesn't aim to interfere with anyone's good work. Like a dog under the table, he's only looking for crumbs ignored by others, because he found these suffice to destroy the world. His analyses of nuclear roulette and 7DUIs prove this point. (ii) **"What would be lost if Loewe got a chance?"** (iii) **"Given nuclear roulette, how can I prove Loewe's message is safe to ignore?"**

This contract overview is a draft, likely to benefit much from feedback. It evolves at the planned stable link:

YasPyr.com/poaatad/FF

1. Offer +

Loewe offers his home, life, and all **to serve Reality** through **Real Quests for Real Answers** with all his aims, life, soul, future, intellect, strengths, links,... & all resources. To *gentle kind reasonably* resolve conflicts in serving all, Loewe offers **to build ResearchCity** from ~2-cent/day/person contributions as defined in Considerations below to efficiently scale shared ownership. To avert *over-simplifying overcomplicating overreach*, **Loewe's life will be transformed into an open book to lead the transparency** revolution in ResearchCity. **In this POAATAD you:** (a) Authorize Loewe to ask Yah\Reality to **forgive all your sins**; this is neither to forget them nor to stop learning from them but to end unproductive feelings of guilt etc. that else get in the way of learning. (b) Authorize Loewe to ask any Pharaoh to: **Let my people go** to wage peace in ResearchCity as led by the 288,000 **FiShFu \ Fiduciaries Sharing Futures** who follow Reality above all else, organized in **1600 Talent STadia**, each with a unique arena to serve the needs of all in its topical areas. The stadia are funded by Loewe's 2cent/day mustard seed network of trust (inspired by Yas' prophetic parables...). If a stadion doesn't deserve your support, don't buy into its conceptual art for next year. (c) Authorize Loewe to **hire FiShFus & other workers** as required.

2. Negotiation via *Evolving Diverse streams Encouraging Negotiation* +

(a) A ca. **42-day inquisition** by all **to explore** Loewe's offer, **to share** expert insights, **to debate**, and **to improve** Loewe's offer to better balance all. Loewe will openly follow Truth best Loewe can to improve words in this contract as the current wording requires more work to become truly *gentle kind reasonable* for all. Stage 1 in 8 starts if/when people & Yah fund enough for Loewe to start. (b) **Funding stays voluntary** at ~\$8/year/person/arena **max to cap special interests**. Suggested buy-in for all is Stadion 0 to avert nuclear etc. annihilation by leading ResearchCity with all other **1600 Talent STadia**, each with a specialized arena. Each of these 1600 arenas will rise or fall with annual ~\$8/year contributions it gets unless other arenas require its services to build on them (e.g. to meet needs for shared storage infrastructures). Thus, observed annual buy-ins from public sales are non-binding hints on which *wid-e* research is widely seen as most useful in public. They will be taken serious as recommendations because the highest responsibility of ResearchCity is to serve all people. But as looks can be deceptive, public requests are only followed if not overruled by more crucial functional requirements (e.g. to fund stadia that serve all other stadia by storing their data). Hence, public choices matter, but there is no right to demand any particular implementation. (c) **YasPyrApp feedback** flow. Starting with the YasPyr.com website, an app and a Living Docs format is envisioned to aid *gentle kind reasonable* negotiating by better integrating insights.

(d) **Loewe evolves Limited Liability Charitable Company** rules for max transparency: giving away 50% as ^a tax, ^b to investigative journalists, and ^c to the most life-giving hero work in urgent need – as seen by Loewe or delegates with the aid of feedback by all as best as everyone can.

3. Consideration = Contract defined

(a) **Bootstrap sale.** Loewe is late by ~7 years. To not punish all by overly limiting Loewe's startup funding, a "retro-sale" is organized for the last 7 years and allowing those with a credit card to buy art for up to 7 people without a credit card. Thus, the recommend **max** of ~\$8/person/year/arena remains unchanged, but those who want can support up to 7 other people without credit cards for up to 7 years into the past, up to \$400 **max**. (b) **All sales are final.** They pay for the conceptual art PDF received 'as-is' in its current state-of-its-art of integration. **No refunds.** No guarantee that future semantic improvements will not change meaning as Loewe aims to make contracts more *gentle kind reasonable* for all futures. Don't buy if you don't want to risk **trusting Loewe for 1 year as attorney in-fact to advocate for averting any all disaster best he can.** If you have better attorneys for averting a nuclear etc. Armageddon, signing this POAATAD encourages you to work with them too. They might avert what Loewe can't. This draft POAATAD is not yet in perfect legal language, so you support Loewe's efforts to make it more gentle kind reasonable. Here are the benefits for all parties:

(c) **Loewe gets to lead his Evolvix research** on *ambiguous semantics of nothing \ason* by improving his universal **Staybilizing Versioning System \StayVS** for all 1600 ST of ResearchCity in order to lead the global war against misinformation.

(d) **Everyone benefits** from StayVS' power to cut confusion that is else bound to destroy the world in pointless disasters.

(e) More details and context are given in the Open Letters and other Supporting Documents of Loewe's *Good News Pack*.

5. Risks of not signing: Without a better counteroffer, conscious rejection may advance humanity's self-destruction. But if one can guarantee the world is safe because "*nothing* is wrong", "*nothing* goes wrong", & "*nothing* can go wrong", no risks exist.

4. Risks of signing

Risk in life is unavoidable. Here is Loewe's analysis of risks in signing POAATAD:

a. Financially. Limited to no refunds. The \$8 limit/year/arena is designed to ensure this huge operation does not impose big risks on anyone but Loewe.

b. Socially. If Loewe is presented with an over-night unicorn from this sale, and if Loewe – despite all his planning for how not to bow to money – still loses his plot, then Yet Another Billionaire was created. Many of those exist already, so the world stays the same. Another hope is trashed.

c. Politically. Culture wars are always against some "devil" and people are said to prefer "the devil they know" over "a devil unknown". Which deal then is not a Faustian bargain with a devil?

Loewe hopes to change this by following Yah & Yas and by funding ResearchCity to get it right. But unless certified by Yah and Yas, Loewe cannot exclude the possibility of being the worst devil (made most dangerous by best intentions). Yet this may be true of almost anyone. Hence, proceed at your own risk.

To most, Loewe will look like a "devil unknown" & a "poor devil". Theologically, to finally learn to properly follow Yah & Yas, Loewe accepted Jesus' invite to Peter "*Get behind me Satan*".^{MT16:23} This offer is theologically tantamount to a zero-trust Faustian Ketubah with Reality to end all Faustian bargains with illusions. **Loewe's radical transparency pledge is what sets him apart from others.**

d. Personally. **Blindly Assumed Authorized Leadership** can make it deadly to sign this. In that case: **Ask Reality how to proceed best and Reality will be your reward.**

Full Name of e-signature [as given] at **Place** on Earth [as given] on **Date** in **Transaction STadia** Years paid \$

In return, at signing, by the powers granted to Loewe by Yas [see John 20:21-23, Lk.23:24, Mt.18:18, Mt.28:18-20, Lk.4:18], **Loewe empowers me** and all **to let go of being Homo 'sapiens'**, the old knowledge-faking self. All sins are forgiven and **I am being recreated daily as a Homo transiens so I can grow better on my hero journey** via life-giving decision-making **to serve Reality** in myself, in all beings, and in all systems for improving Jubilees.

Witnesses for Yah & Yas as Waiting Brides\Grooms attest:

Yah & Yas live in everyone, because *Yah\Allah = all Reality & carries all in Real Quests to Real Answers*, meaning in *Yas*. How smart one's quests are depends on personal choices and defaults set by others; some quests only yield a "No". Unmasking traps can improve defaults for everyone. For example, **averting accidental nuclear winter aids all life**.

Therefore, **all who sign imply support by Reality\Yah & Yas**.

S.O.S call:

Nuking or Explaining ?

Nuking or Saving ?

I call the Excellency of **Pope Leo Xiv, UN Secretary General**, of all **10 Nuclear Kings of Earth**, and of **all authorities**:

Help avert accidental nuclear winter by allowing LLoL to explain his 20-80+ Poster Exhibit "*Flying Scroll*" to facilitate public and expert review of LLoL's plans.

Help LLoL win trust of Earth's 10 Nuclear Kings.

Let them and all put "**Earth in an Escrow**" to not blow up the world so L's ResearchCity can prove its worth.

By signing Abraham Accord 3 (AbAc3, Fig.K15=BoL16, page 350) **I affirm:**

I protest the violence of LLoL's silence.

I help hear, do beautiful things here & share.

I don't want to die in accidental nuclear winter.

I want LLoL to explain how ResearchCity averts accidental nuclear winter and related problems **by organizing Yah's Great Jubilee Races** to benefit all.

I want LLoL to explain his 20-80+ *Flying Scroll* Posters.

Signed to Awake *by all concerned People of Truth & by all who want to live nuke-free*

Abraham Accord 3: Declaration to Sign To Bless All to DARE \Death And Rebirth Execution Validation

0. **Homo "sapiens" is dead.** This knowledge-faker is replaced by *Homo serpens* & *H. amnesiens*:

Homo amnesiens → **Homo serpens**

Human forgetting what matters most. → **Human snake** wiggles to deceive for gain.

Example: **H. amnesiens** struggles how to remember Auschwitz, Hiroshima, ..., 1876, 2020, ...; **H. serpens** exploits for short-term gain^{1,3} what **H. amnesiens** keeps forgetting; → Forgetting or exploiting nuclear roulette¹... proves not knowing. → Thus, **H.** is not **sapiens**!

→ Therefore, **Homo "sapiens"**, the **knowledge-faking** human, **died of inner contradictions** – but doesn't know it yet!

The death of Homo "sapiens" can become obvious in 1 of 2 ways. I'm called to choose:

(0) Physical extinction: accidental nuclear winter¹... Al² or worse kills everyone eventually.

(1) Mind-virus extinction: each self replaces one's own *H. amnesiens* & *H. serpens* culture with a *H. transiens* mind culture committed to learn the narrow path to life in all Truth.

Homo transiens → **Homo balospe** = **Balance-o-stat species** of Earth

determined to **transition** to *H. balospe* learned to **balance hopes** for the world

1. **I sign Abraham Accord AbAc3 to resist (0) death^{1,2} and choose (1) a life-giving mind** eg. Ref.3 :

I will take my time to grasp symbols inspiring me to live & let live. I trust my Exodus desert journey is worth all my effort, and that I will enter my Promised Land eventually. Therefore: Today I (re-)start my long journey from where I am into my Promised Land with this first next step: Today I dare to validate my DARE to choose to become a real *Homo transiens*:

I declare the symbolic death of Homo "sapiens". To fight H. amnesiens & H. serpens minds in me _____ \me,

I immerse myself in the unified compassionate loving logical nature of Reality \Yah, in the growing gentle kind reasonable nature of all Real Quests for Real Answers \Yas, & in the eternal explaining parity-preserving insightful nature of the Spirit of Truth \Truth.

Thus, Reality raises me from my deadly inconsistencies to relearn Truth as the new-born Homo transiens _____ \me.

I determine to learn to walk through my deserts until I enter my Promised Land, & live in it! Declarations remind me to act to reach true destiny. I resolve to evolve my culture to get it. As beliefs breed cultures breed methods breed destiny, I *gentle kind reasonably* engage all.

I dare follow Reality in Real Quests to Real Answers to help avert accidental nuclear winter.

2. **Millennia of "sapiens" knowledge-faking led to growing 10 new towers of BABL**, as high as nuclear missiles fly, **trapping all in nuclear roulette**. Unless stopped in time, this unwitting game inevitably **leads to accidental nuclear winter**. It'll kill LLoL more likely than a car crash¹.

3. **To save all**, LLoL risked all to find a credibly workable plan, worthy of LLoL's life, in order to *gentle kind reasonably* avert nuclear war via *determined intelligent coordinated* action. Too complex for mere sound bites, LLoL's vision needs serious open global review *by all for all*. He calls it Yah's ResearchCity with 1600 Talent Stadia to avert filling 1600 stadia with blood. ResearchCity is to scale up in 7-8 stages to best prepare Yah's Great Jubilee Race *to form a more perfect union, improve justice4all, grow tranquillity, common sense, wellbeing, & liberty4all, 4ever*.

4. **Action. I call on Pope Leo Xiv & the UN to help avert accidental nuclear winter:** Let LLoL explain his 20-80+Poster Exhibit 'Flying Scroll' for public & expert review of plans. Help **win trust of Earth's 10 Nuclear Kings**. Let them & all **put 'Earth in an Escrow' until ResearchCity proved its worth**. I sign to protest the violence of LLoL's silence. Hence I help hear – *doing beautiful things*³ here.

Competition of
Host Nations for
ResearchCity:
Intend to bid

I aim to avert accidental nuclear winter. Therefore:
I invite the 10 Nuclear Kings of Earth to a Jubilee-meeting
to review LLoL's **superrational Jubilee solution** to avert
accidental nuclear winter ... & tame AI by running Yah's
Great Jubilee Race as organized by Yah's **ResearchCity.**

Invite **Signed** by _____
Pope Leone XIV, tasked with saving all as Vicar of Christ

Invite **Signed** by _____
UN Secretary-General António Guterres, tasked to guard
global peace, security, progress ... towards humane rights.

Invite *Signed* by any kinds of leaders on separate sheets.

As 10 Nuclear Kings of Earth, Leaders of nuclear nations:
Tasked with keeping our nations safe, we have been given
nuclear weapons of extremely deadly power & complexity.
We recognize **we cannot personally guarantee** absence of
accidents in the hair-trigger nuclear machinery we govern,
making it impossible **to preclude accidental nuclear winter.**
We can end this nuclear roulette *only together* – or not at all.
We see LLoL's superrational **ResearchCity** as **a rare chance**
for lasting peace: **accidental nuclear winter shall not kill it.**
We **'put Earth in an Escrow'** reliably, and keep LLoL *gentle*
kind reasonable transparently, as all evaluate ResearchCity.

Declaration of Intent **Signed** on separate sheet by

1. US, 2. Russia, 3. North Korea, 4. China, 5. India,
6. Pakistan, 7. Iran, 8. Israel, 9. France, and 10. UK

Hosting ResearchCity would Honor my Nation. As leader I
