

# Limited Durable 1-year **Power Of Attorney Advocating To Avert Disasters** \POAATAD

Contract with **Laurence Loewe of Laodicea \LLoL** to win trust for his ResearchCity vision to avert Armageddon-disasters

Powers of attorney are sharp tools for guarding justice. Abuse is harshly punished. POAs are not given to someone not trusted.

Why then trust Loewe with a POAATAD when he's next to a completely unknown stranger? **Considering the alternatives shows why:**

**First**, it's a very limited POA that does not keep anyone from anything, including blowing up the world. It is biased against all who would like to blow up the world, because it empowers Loewe to advocate against destructive actions. Anyone can do that, but with this POAATAD Loewe no longer only speaks for himself. It also binds himself to see all sides when he uses his voice and insights to advocate against destruction by identifying certain actions as more likely to leading to disaster than others. Anyone who tried knows that this is complicated. Hence Loewe's need to also empower a ResearchCity for binding him to the Truth about Reality. **Loewe will only succeed if he stays in ResearchCity's light of full transparency. It's the only way to avoid growing nefarious secrets.** If Loewe isn't transparent enough, next year's

conceptual art PDF sale will cut his funding because (i) people will no longer buy into what he does, (ii) **sales must stay voluntary to work**, and (iii) **Loewe can't accept special-interest money if indeed ResearchCity is to work for all**

**Second**, all who default to "no" may wish to ask: (i) **"Do I have someone more qualified to advocate on my behalf to avert disasters?"** If so, wonderful. Loewe doesn't aim to interfere with anyone's good work. Like a dog under the table, he's only looking for crumbs ignored by others, because he found these suffice to destroy the world. His analyses of nuclear roulette and 7DUIs prove this point. (ii) **"What would be lost if Loewe got a chance?"** (iii) **"Given nuclear roulette, how can I prove Loewe's message is safe to ignore?"**

This contract overview is a draft, likely to benefit much from feedback. It evolves at the planned stable link:

## 1. Offer +

**Loewe offers** his home, life, and all **to serve Reality** through **Real Quests for Real Answers** with all his aims, life, soul, future, intellect, strengths, links,... & all resources. To *gentle kind reasonably* resolve conflicts in serving all, Loewe offers **to build ResearchCity** from ~2-cent/day/person contributions as defined in Considerations below to efficiently scale shared ownership. To avert *over-simplifying overcomplicating overreach*, **Loewe's life will be transformed into an open book to lead the transparency** revolution in ResearchCity. **In this POAATAD you:** (a) Authorize Loewe to ask Yah\Reality to **forgive all your sins**; this is neither to forget them nor to stop learning from them but to end unproductive feelings of guilt etc. that else get in the way of learning. (b) Authorize Loewe to ask any Pharaoh to: **Let my people go** to wage peace in ResearchCity as led by the 288,000 **FiShFu \Fiduciaries Sharing Futures** who follow Reality above all else, organized in **1600 Talent STadia**, each with a unique arena to serve the needs of all in its topical areas. The stadia are funded by Loewe's 2cent/day mustard seed network of trust (inspired by Yas' prophetic parables...). If a stadion doesn't deserve your support, don't buy into its conceptual art for next year. (c) Authorize Loewe to **hire FiShFus & other workers** as required.

## 2. Negotiation via *Evolving Diverse streams Encouraging Negotiation* +

(a) A ca. **42-day inquisition** by all **to explore** Loewe's offer, **to share** expert insights, **to debate**, and **to improve** Loewe's offer to better balance all. Loewe will openly follow Truth best Loewe can to improve words in this contract as the current wording requires more work to become truly *gentle kind reasonable* for all. Stage 1 in 8 starts if/when people & Yah fund enough for Loewe to start. (b) **Funding stays voluntary** at ~\$8/year/person/arena **max to cap special interests**. Suggested buy-in for all is Stadion 0 to avert nuclear etc. annihilation by leading ResearchCity with all other **1600 Talent STadia**, each with a specialized arena. Each of these 1600 arenas will rise or fall with annual ~\$8/year contributions it gets unless other arenas require its services to build on them (e.g. to meet needs for shared storage infrastructures). Thus, observed annual buy-ins from public sales are non-binding hints on which *wid-e* research is widely seen as most useful in public. They will be taken serious as recommendations because the highest responsibility of ResearchCity is to serve all people. But as looks can be deceptive, public requests are only followed if not overruled by more crucial functional requirements (e.g. to fund stadia that serve all other stadia by storing their data). Hence, public choices matter, but there is no right to demand any particular implementation. (c) **YasPyrApp feedback** flow. Starting with the [YasPyr.com](https://YasPyr.com) website, an app and a Living Docs format is envisioned to aid *gentle kind reasonable* negotiating by better integrating insights.

(d) **Loewe evolves Limited Liability Charitable Company** rules for max transparency: giving away 50% as <sup>a</sup> tax, <sup>b</sup> to investigative journalists, and <sup>c</sup> to the most life-giving hero work in urgent need – as seen by Loewe or delegates with the aid of feedback by all as best as everyone can.

## 3. Consideration = Contract defined

(a) **Bootstrap sale.** Loewe is late by ~7 years. To not punish all by overly limiting Loewe's startup funding, a "retro-sale" is organized for the last 7 years and allowing those with a credit card to buy art for up to 7 people without a credit card. Thus, the recommend **max** of ~\$8/person/year/arena remains unchanged, but those who want can support up to 7 other people without credit cards for up to 7 years into the past, up to \$400 **max**. (b) **All sales are final.** They pay for the conceptual art PDF received 'as-is' in its current state-of-its-art of integration. **No refunds.** No guarantee that future semantic improvements will not change meaning as Loewe aims to make contracts more *gentle kind reasonable* for all futures. Don't buy if you don't want to risk **trusting Loewe for 1 year as attorney in-fact to advocate for averting any all disaster best he can.** If you have better attorneys for averting a nuclear etc. Armageddon, signing this POAATAD encourages you to work with them too. They might avert what Loewe can't. This draft POAATAD is not yet in perfect legal language, so you support Loewe's efforts to make it more gentle kind reasonable. Here are the benefits for all parties:

(c) **Loewe gets to lead his Evolvix research** on *ambiguous semantics of nothing \ason* by improving his universal *Staybilizing Versioning System \StayVS* for all 1600 ST of ResearchCity in order to lead the global war against misinformation.

(d) **Everyone benefits** from StayVS' power to cut confusion that is else bound to destroy the world in pointless disasters.

(e) More details and context are given in the Open Letters and other Supporting Documents of Loewe's *Good News Pack*.

**5. Risks of not signing:** Without a better counteroffer, conscious rejection may advance humanity's self-destruction. But if one can guarantee the world is safe because "*nothing* is wrong", "*nothing* goes wrong", & "*nothing* can go wrong", no risks exist.

## 4. Risks of signing

Risk in life is unavoidable. Here is Loewe's analysis of risks in signing POAATAD:

**a. Financially.** Limited to no refunds. The \$8 limit/year/arena is designed to ensure this huge operation does not impose big risks on anyone but Loewe.

**b. Socially.** If Loewe is presented with an over-night unicorn from this sale, and if Loewe – despite all his planning for how not to bow to money – still loses his plot, then Yet Another Billionaire was created. Many of those exist already, so the world stays the same. Another hope is trashed.

**c. Politically.** Culture wars are always against some "devil" and people are said to prefer "the devil they know" over "a devil unknown". Which deal then is not a Faustian bargain with a devil?

Loewe hopes to change this by following Yah & Yas and by funding ResearchCity to get it right. But unless certified by Yah and Yas, Loewe cannot exclude the possibility of being the worst devil (made most dangerous by best intentions). Yet this may be true of almost anyone. Hence, proceed at your own risk.

To most, Loewe will look like a "devil unknown" & a "poor devil". Theologically, to finally learn to properly follow Yah & Yas, Loewe accepted Jesus' invite to Peter "*Get behind me Satan*".<sup>MT16:23</sup> This offer is theologically tantamount to a zero-trust Faustian Ketubah with Reality to end all Faustian bargains with illusions. **Loewe's radical transparency pledge is what sets him apart from others.**

**d. Personally.** *Blindly Assumed Authorized Leadership* can make it deadly to sign this. In that case: **Ask Reality how to proceed best and Reality will be your reward.**

**Full Name** of e-signature [as given] at **Place** on Earth [as given] on **Date** in **Transaction STadia** Years paid \$

In return, at signing, by the powers granted to Loewe by Yas [see John 20:21-23, Lk.23:24, Mt.18:18, Mt.28:18-20, Lk.4:18], **Loewe empowers me** and all **to let go of being Homo 'sapiens'**, the old knowledge-faking self. All sins are forgiven and **I am being recreated daily as a Homo transiens so I can grow better on my hero journey** via life-giving decision-making **to serve Reality** in myself, in all beings, and in all systems for improving Jubilees.
