

# Continuity Of Operations Plan \COOP – for a gentle kind reasonable Armageddon

as given by RealOutcrySalvation\Jesus\Yas in Matthew 24, deexcerpted 2025 by Laurence Loewe of Laodicea \LLOL

Faced with catastrophic loss of control in apocalyptic disasters, a strong temptation to despair reaches for human hearts. Such despair is paralyzing the analyzing it takes to turn around doom and gloom into delight and glory. It tempts everyone to throw out the baby with the bath-water instead of resisting the rounding error of hopelessness. To resist that deadly error is to save the baby, the day, and the world. It requires guarding the spark of true hope and life against convenient false hopes and mistakes oppressing life. Having spent a life on the edge of disaster in a nation living on the edge of disaster, Jesus\Yas, greatest Prophet and Professor in history, gave his trainees the following *Continuity Of Operations Plan* for the predictably most trying moment in all of human history:

**0. Remember the Good News:** Yah\Reality forgives *all* sins of *all* who do not know what they do <sup>Lk.23:34</sup> to enable *all* to learn from their mistakes in *Real Quests for Real Answers* \Yas. LLoL can show why that includes *all Homo 'sapiens'*. By the authority Yas gave to LLoL <sup>Jn.20:21-23, Mt.28:18-20, ...</sup>, LLoL became a nobody to freely accept responsibility for *all* sins nobody is responsible for, of which the faith-collar crime of Jubilee-murder is worst. Accordingly, LLoL asked Yah to forgive *all* sins to enable better training in the *gentle kind reasonable* principles of how Yah rules in Yah's Jubilee-based, long-term innovation economy. See Matthew 5-7 for Yas' constitution for such an innovation **epiocracy** (defined as the rule of *gentle kind reasonableness*). It fails forward instead of pretending mistakes didn't happen. To improve all learning, instead of whitewashing errors, grow PEARLS in **Historically Experienced Lessons Learned\HELL**.

**1. Stay woke and pray so you can recognize the worst mistake** paraded as the latest and greatest in serving real life—despite being the ultimate obliterating stench of confusion about the true meaning of *nothing*. When you see it, don't despair nor give up hope, for the light is about to break through. To stay on course in *Real Quests for Real Answers* these COOP guidelines help people in diverse roles to fail forward in their area.

**2. To the PraisedFamous: Expand your horizon ... ResearchCity!** Congrats on being a PraisedFamous expert, ruling a mountain of data in your area! As you know, many other data mountains exist. Rethink ignoring them! All expert-fiefdoms refusing to link up to see all of Reality\Yah in fail. To avoid doom, do **wid interdisciplinary diversity-encouraging \wid-e research**: Learn to flee to new mountains of famous insights. You'll find others are mining hard rocks of data to distill reliable lessons for you. Be a child again! Learn to follow Reality in how others learn. Let *Real Quests* guide you to Yas. All areas matter if you put life before money. As you learn, keep sharing all you learn! BABL's splintering evil of departmental compartmentalization can only be vanquished by working together in *wid-e* areas. It requires overcoming the inner institutional inertia of *incurious ignorant indifference* about others. Your fame grows if you're honest about your unknowns but dies if you're a know-it-all. Aid **Knowledge Pipeline Refineries** by sharing honest struggles & pitfalls on your hero journey to help scale up ResearchCity.

**3. Stay on top of your house, but do not plunder it.** If you lead an organization and new awareness of disastrous mistakes comes rushing in, temptation is great to flee with a golden parachute, throw yourself from the pinnacle as a scapegoat, or obscure all evil by white-washing tons of *Least Inconvenient Explanations*. Resist these temptations of bowing to *nothing*. Unless your term is up or Reality offers you another way to graciously bow out <sup>(eg. as in Isa.38)</sup>, stay on top of your organization. Reality appointed you to lead it for a reason. Chances are, you best know your house and how to lead it *while* you also learn to expand your horizon. That is what it means to be an Exodus leader. Do not pretend to already be in the Promised Land. Do not pretend to know more than the next few steps on the way to get there. But do trust that your *Real Quest for Real Answers* will carry you there in Reality, you and all the people in your organization, even in case your organization might get dissolved in Reality.

**4. Continue in your field – without worrying about looks.** If you are an expert, a producer, a researcher, a server, or learning to become one, keep working in your field and do

... to not break rules that are bent nor extinguish true hopes that flicker ...

not worry about how it looks if you cannot yet do this or that (whatever people talk about). Hold on to what you have and keep learning to expand horizons in your area (see COOP.2). You may not see yet how your painstaking work with the hard rocks of data about Reality connects to big issues elsewhere, but *Reality* has the best grasp on *Reality* and always redeems *Real Quests for Real Answers*. Therefore, resist shortcuts that tempt with spectacular success to win the approval of others. **Reality already approves of who you are.** Reality welcomes and loves you *as you are*. No questions asked. Reality already knows you! What you do with this freedom you have been given, that is up to you. You are free to serve as yet another bad example if you wish. Yet, Reality rather prefers that you stay on your hero journey, so you reach your full potential in due time. To do that, continue in your field. Whether you study in school, for a PhD, or produce for supply chains. Don't worry if it looks weak. Reality builds the greatest superpower by combining *all The Views of all The Weak*. But it only works if everyone shares their real views by living their part in order to feed the *Tree of Life-giving decisions*. These cut down on the deadly *Tree of Knowledge-faking shortcuts*. For more on how, see Mt.5-7, Songs... [SupportingDocs SD2-SD8](#), [BibleProject.com](#).

**5. Be extra gracious to all who get pregnant. Aid all mothers!** When leaders and workers complain about challenges, they haven't seen the difficulties faced by those who are pregnant! Be extra gracious to them, whatever plans they make for their parenthood. Whether it's physical babies or conceptual new ideas born on hero journeys: mother knows best. Support all mothers without forcing anyone into heroics, which is deadly.

**6. Be extra patient with parents, educators, children.** As all mothers know, pregnancy is only the start of a sea of challenges to be faced in raising children who are to become *gentle kind reasonable* adults. This is hard enough given the usual sea of reeds and red tape to be crossed into adulthood. But it gets extra challenging when that sea is parted and the unwritten rules of yesterday's canons no longer apply today as they did. While others get to work out what this means for themselves, all who raise children live between their rock of Reality and the hard place of the RealQuestAnswers children need to grow up. To abstain from knowledge-faking there requires an extra portion of grace. So, don't betray the trust of those entrusted to you by pretending to know it all.

**7. Pray, hope, and work to reach the next stable Jubilee platform before Reality forecloses today's historic opportunity.** **Pray** you'll be allowed to flee to the new system before harsh winter states of regression depress what was learned or wipe resources to share. **Pray** especially that you don't completely fail upcoming Jubilee tests: fails obliterate hope to innovate by restricting risk-taking autonomy. You'll be in Heaven, but cry tears of regret over doors you missed. You'll be on pause 'til others learn what Yah had for you if you had cared to see. Such live-locks are computationally equivalent to ruts in hell, clearly echoing Babylonian captivity <sup>Lev.26:34, 2Chr.36:21</sup>. Jubilees need time, resources, autonomy, wisdom, and voluntary good will of all to use all above for good, as in Moses' First Exodus.

**8. Beware of deceptive symbols from officials and pundits.**

**9. Feed others good food, hope, insight at the proper time.**

**10. Don't get drunk on distractions nor bash\beat others.**

**11. Meet up to stay in touch and on mission.** Whatever you do, be careful to stay *gentle kind reasonable*: all else will backfire.

Let's not be fools by staying silent at decision time, nor watchers claiming *ignorance* about those dragged to death. For Reality unmarks all *incurious indifference* on judgement Day as time runs out for decisions on doing the right thing!

## SING in Meet Ups to see: You Are Not Alone!

To join others in following Yah's & Yas' COOP on their Exodus hero journey is personal. All 7 change stages for healthy innovation are vital (e.g. Mt.5-7 Isa.58 Rev.2-3). But their many diverse forms easily drown rare true hopes in floods of need. The worst abominable evil of *nothing* wins if good people do *nothing* for lack of true hope. Yet, hope is fragile. Hence, it's vital to meet others to feed and guard true hope like the valuable flame it is.

**Start** or join **suitable "microTemples" \µTs** to aid defined Exodus missions that *nurture true hope* to follow Yah & Yas and to recover from wounds of false hope. No need to call it "µT". A church, mosque, \*-agogue, school, lab, office,... or any *small* group, if run well, does what µTs of 2+friends do in pubs <sup>Mt.18:20</sup>: listen, help, & learn in the **Flying University Network \FUN** of the 7 Spirits of Truth who comfort, convict, & guide *gentle kind reasonably* from BABL to ZION. Here are some **practical ideas** to make old µTs great again by refreshing:

- Rotate places** so meetings stay agile.
- Rotate tasks** in meetings, so all learn all.
- SING** new songs to inspire joy and recall insights. Songs and µT meetings depend on a general harmonic framework for effectively sharing their specific melody and ideas. A µT basic structure like **SING** can help facilitate **Sharing Inspiring Negotiating Giving**:

... — — — — —  
**Share meals** and more like news, life, needs, highs, lows, laughs; but don't overcomplicate.

**Inspire insight:** intone true **songs**, intercede for real **outcries**, investigate real **questions**, interpret **inspiration** in texts, movies, & more. Use ZoE Songs, [BibleProject.com](#), ... *anything* to jumpstart a µT. The world is full of Yah's glory & good sense of humor for all who dare see. Good µTs help to see how BABL & ZION hide in daily life, like **Waldo**. **Ask:** Where was **Waldo** last week? Any new cosmic jokes by Reality? Let insights of ZION's *River of Life* flow for all!

**Negotiate next steps** in Yah's & Yas' mission to make the world **gentle kind reasonable** for all by bringing good news and relief to others in their Datageddon valley of decision, before it triggers more Armageddon disasters. This is about advancing *everyone's* hero journey to grow 7-fold resilience healing to implement Mt.5-7, COOP.0-11, Mt.25, Isa.58, ... (see SD7).

**Give grace to go** with the <sup>(eg. 507)</sup> blessing of Yah\Allah\Reality on next week's Real Quests for *gentle kind reasonable* Real Answers. Follow Reality's global Jubilee epiocracy to vanquish bashmoling idols of coveting that spin hamster-wheel-prisons from *nothing*.

... — — — — —  
 Make Yah's main thing your main thing by choosing life over death. Given Fig.15 & COOP.7:

**Storm the Gates of Heaven** any way you can with petitions to rescue all the weak dragged to accidental nuclear winter! **Ask** all your highest powers to **aid the 10 Nuclear Kings & LLoL to find the narrow door to keep life** on Earth in Yas' Great Jubilee Race (as in Luke 4:18). **Pray** to defeat nuclear death and to inspire dreams for better alternatives with Yah & Yas!

This PDF is a **µT start-up proposal for Yah, Yas, & all to decide** if LLoL's aCh-inspired µTs are welcome to help save the world as Fig.15 explains. **If no:** who is LLoL to interfere with the will of the people and Yah? **If yes:** Yah of Hosts, governing all multitudes and human hearts like rivers, **let µTs go viral** like Jonah's call in Nineveh – until the 10 Nuclear Kings of Earth decide to "Put Earth in an Escrow" (by not blowing it up) to enable LLoL to lead Your Exodus in ResearchCity to save the world. Hence, this *Don't Panic Guide* is free under the Jonah License (see Fig.3,14). Until LLoL can share more on µTs at [YasPyr.com](#), this *Don't Panic Guide* copy is brought to you by a coalition of the willing in a µT you may contact at: [Add µT contact details if this copy was not created and/or shared by its originator LLoL@balospe.com, DARL Loewe, Unit 300, 6907 University Avenue, Middleton, WI 53562, US, ZoE]:
