Want to Save the World?

Let's save A.I., the innovation economy, big-tech and all of us from our worst enemy: ourselves.

Our inner institutional inertia, incurious ignorant indifference, and the world conspire to feed the **Tree of Knowledge-faking**, or "**ToK**". Eating its fruit dumbs down to forget.

We save ourselves by following real quests to find real answers that develop all mental wealth of all nations and of ourselves. Thus, we grow "**ToL**", the **Tree of Life-giving choices** to avoid **overreaching overcomplicating oversimplifying "orcs"**.

To do so, we need to work with, not against the general 4-phase engine of innovation that is an integral part of the structure of all real-life worlds. As in the natural growth sequence

- seed** → (vs over-relying on chance)
- feed** → (vs oversimplifying)
- grow** → (vs overcomplicating)
- reap** → (vs overreaching),

we must respect all 4 phases in their order: Reality judges our success, and the scientific method of loving our enemies by listening to them is the narrow path to life – as taught by Jesus, Socrates, the Torah, the Quran, and countless others to cover the manifold areas of life.

Easing Parity-protecting Insights: Epiocracy, the rule of **epieikeia***

***Epieikeia**, Ancient Greek, is **gentle kind reasonableness** as defined by Aristotle and implemented by Jesus through Real Quests for Real Answers to follow Reality wherever it goes.

- Where do you want to go, People of Earth? You Choose:**
- 0.** Death by BABL's millstone in default circles? **Do nothing new**
 - 1.** Life in ZION by proper Jubilee-innovations? **Aid ResearchCity**

Done right, the green circle works as a 4-phase engine that drives progress up the narrow path towards long-term stability for all. It does this by inspiring reality-based

- Zoning** → (to **seed**)
- Investigating** → (to **feed**)
- Organizing** → (to **grow**)
- Navigating** → (to **reap**).

This enables innovations to reach the quality required for implementing proper 50-year Jubilees in the ZION epiocracy of Reality.

But hasty innovation kills well-rounded integration. Then this same 4x engine drives down-hill to feed the Four Horsemen of the Apocalypse. These build towers of BABL, castles in the sky, ... until their "orcs" self-destruct what they built. Ignoring orcs in BABL so far started nuclear roulette. If we don't flee its mind-virus, it will fry US by default in accidental nuclear winter.

To escape BABL, who wants to help build a ResearchCity to support ZION's *gentle kind reasonable* epiocracy?
Choose to Save the World?
