

POAATAD is a Power Of Attorney to enable ResearchCity as led by **Laurence Loewe of Laodicea\LLoL** as attorney in-fact: POAATAD authorizes work for 1 year and is limited to gentle kind reasonably Advocating To Avert Disasters of any kind. ResearchCity aims to gentle kind reasonably avert worst disasters first by balancing diverse and dynamic requirements. ResearchCity builds on its best available work by refining **wide interdisciplinary diversity-encouraging \wid-e** research. To stay gentle kind reasonable, ResearchCity keeps improving by following the life-trifecta hallmarks of any epiocracy: epiocracy is defined by the trifecta-rule of gentle kind reasonable balancing. It implies the easing and explaining of parity-preserving insight-information for every party, integrating the views of each party (to cut bias by aggregating).

Under the epiocracy rules of gentle kind reasonableness, in this POAATAD power of attorney in-fact **I herewith empower Loewe and whom Loewe empowers through ResearchCity in order to ...**

- (1) ... **advocate** anywhere on my behalf to avert avoidable disasters, starting with the worst;
- (2) ... **scale up** gentle kind reasonably a sufficiently large ResearchCity, evolving in 7-8 stages (each ~1+6+1 month long) in order to effectively and efficiently avert nuclear winter by dismantling 7DUIs;
- (3) ... **solve** existential disaster challenges from local to global scales, by supporting free access to solutions from the insight-**Tree of Life-giving decision-support \ToL**, and by supporting ToL growth;
- (4) ... **negotiate** with Earth's "**10 Nuclear Kings**", the UN Security Council, and all relevant experts to "Put Earth in an Escrow" to avert nuclear winter until ResearchCity gets a chance to work;
- (5) ... **engage** with challenging cultural, social, political, economic, ... and spiritual questions or preferences to aid communication across old barriers to improve global healing resilience;
- (6) ... **start** building **AIPTO** into the global **Atlantic Indian Pacific Treaty Organization** that will assume responsibility for balancing *all* global security requirements – via advanced soft-war Work-Logic Cascades that no longer need nuclear weapons nor their brutal hard-war WoLCs;
- (7) ... **explore potential offers by extra-terrestrials** to aid humanity survive its Great Filter by helping to fight coveting mind-viruses; this includes especially **Jesus\Isa\YhowShua\Yas**, who also is an oppressed refugee academic from the Middle-East, hoping to lead a Jubilee-based self-stabilizing innovation economy before humanity self-destructs; because Yas defined and passed the hardest trifecta-vetting imaginable for extra-terrestrials, I expect Loewe to submit ResearchCity to Yas' leadership in any form Yas\RealQuestAnswer may return.

As I execute this POAATAD transaction, each unit of **~\$8/year/person/stadion** I transfer goes via Loewe and Loewe's subsidiaries to a 'mustard-seed network of trust'. It builds, guards, and runs ResearchCity to shield the world from accidental Armageddon disasters – by averting 'datageddon' confusion from misaligned data that triggers respective disasters if not resolved.

I trust Reality in Real Quests for Real Answers to guide Loewe and thereby ResearchCity towards the most gentle kind reasonable solution accessible in any given context.

Thus, I understand that Loewe must resist Blindly Authorizing and Auto-Stereotyping Habits to avert Mistakes Oppressing Life Qmitting Crucial Help, even if it can be hard to avoid common oversimplifications. I understand Loewe can only win through the scientific method of Jesus (to love all enemies by listening to all grains of truth they share). I understand that Loewe is not my enemy, even if Loewe talks to my traditional adversaries in open searches for global solutions. Loewe is bound to make mistakes. Hence, I support Loewe in documenting them as best as possible in his **Peer Evaluation Analysis Reviews Library**, to be shared in ResearchCity's global **Historically Experienced Lessons Library \HELL** as a public PEARL to reduce related mistakes.

I understand: (a) **All this is and stays voluntary.** (b) **I can afford to risk trusting Loewe for 1 year.** (c) **If I follow advice, I still carry all risks of (not) signing.** (d) **No refunds: I enable Loewe for 1 year.**

Nuclear roulette only ends if *all* work together to solve the worst existential "super-wicked" problems. These self-organize conflicts so evil, nukes seem desirable. Loewe identifies them as humanity's **7 Death Urn Incinerators** see Rev16 & science, only a ResearchCity can peacefully solve all these **7DUI** challenges:

- (1) evolving pandemic pathogens, chemical mutagen cancers, decay of health-care: all due to slow-motion exploding data disasters;
 - (2) overfishing, seaspiracy, and/or pollution kill ocean ecology: shared global conditionals die;
 - (3) water wars, soil erosion burn all wells: grass-roots initiatives die;
 - (4) global heating feeds storms;
 - (5) tongue-biting caused by beastly mindless job tasks;
 - (6) growth by extraction dies;
 - (7) extinction by AI, nukes, etc.
- So-called '**Armageddon**' thus technically is "flooding by any of too many 7DUI-disasters to avert them by traditional means without globally growing a **7Capstone in Uniting States**". To survive, a '**7Cap**' must be the highest law in a global epiocracy constitution, where Reality's life-trifecta governs to:
- (1) form a more perfect union;
 - (2) improve general justice;
 - (3) grow domestic peace;
 - (4) provide common defenses;
 - (5) promote general welfare;
 - (6) secure all blessings of liberty;
 - (7) preserve posterity for all by waging peace in ResearchCity to support all **Fiduciaries Sharing Futures\FiShFus**.
