

PandemicSociety101, Scenario 2: The Next Defense

The pandemic's future is still wide open. Most of it depends on the option chosen:

A: Half 0: go 'back to normal', no cuts to virus drop or catch, DT 4.8d (Scenario 1)

B: Half 1: 50% lower probability of dropping *or* catching the virus, brings big benefits

C: Half 2: 50% lower probability of *both* dropping *and* catching viruses. **It all stops.**

If facemasks aid C, can we **ignite a culture of inventing fashionable facemasks?**
