

# Avert Nuclear Armageddon with Global 2 Cent/Day Donations: RiskyMADorMAP Model

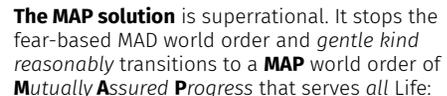

For immediate release by Datageddon Armageddon Research Lab, Loewe

It is a truth universally accepted that proud prejudice comes before the fall. It's by the Law of Triviality that blinds the overconfident. It sank the *Titanic* 1912, began "the war to end all wars" 1914, and sank the *Titan* sub looking for the *Titanic* 2023. It will soon trigger a final nuclear Armageddon through knowledge-faking. Here I show how. I also found an escape-hatch, so: **Don't Panic.** I found the real *Hitchhiker's Guide to the Galaxy* in a funny non-violent Jonah-Esther-Exodus re-reading of the book of Revelation. It's better than I could have imagined. I've seen the Promised Land. To get there a personal and global Exodus is essential. It starts with seeing the world as it is, not as it ought to be. It must review historically experienced lessons learned to see the ax of **nuclear roulette**. It'll kill the *Tree of Knowledge-faking* and its fig-leaves allowing a **MAD** world order of **Mutually Assured Destruction**. It keeps us from being our siblings' keepers. The danger is meticulously described by **Annie Jacobsen's (2024)** 398-page book "**Nuclear War**" as a 72-minute path to nuclear winter<sup>1</sup>. The Doomsday-Clock<sup>2</sup> is at <"90 sec" before doom but lacks a clear mechanism. In **Fig.1** the rigorous math<sup>3</sup> of my Evolvix model compiler predicts a "nuclear winter weather" forecast. It recommends to all power-elites to stop fooling themselves and start convincing the Pope and all 10 "Nuclear Kings" to join a round-table to discuss my superrational solution.

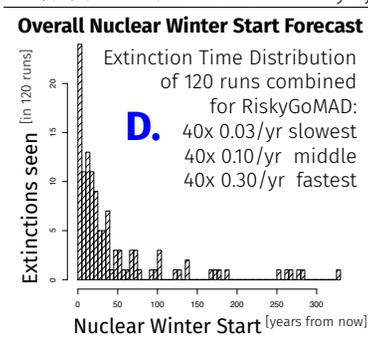

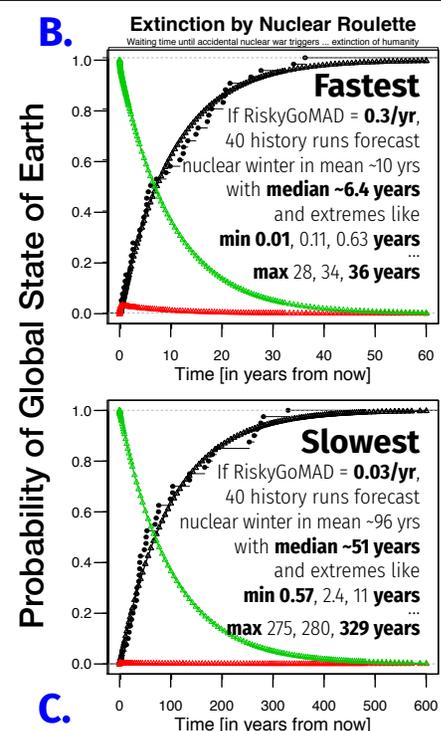

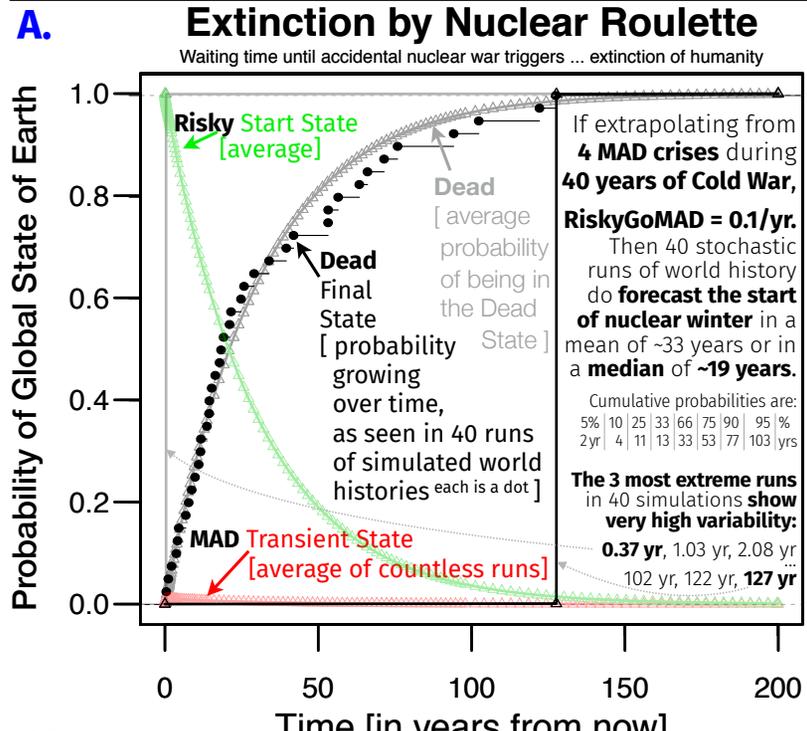

**Risky** defines today's Risky global state: nuclear weapons exist since 1945, led to 4 "near misses" in 40 years of Cold War, yet are widely ignored as "not my problem". **MAD** are "near miss" crises where nuclear winter is a coin-toss away. **Dead** (see Jacobsen 2024) lets tails win over *humane* heads as **MAD initiates start of nukes**. **Fig.1** has estimates, slow to fast, saying how long until we fry or freeze in nuclear holocaust or winter. My 3x40 random runs of world history show why **risks of nuclear winter are uncontrollable** as long as "*H. serpens* keeps wiggling" and "nukes are on hair-trigger alert!". My best Cold War data predicts, more likely than not, *an accidental end* in up to ~19 years (-6.4 to -51 yrs). The variability shocked me most: all scenarios predict  $\geq 1$  in 40 runs leads to nuclear Armageddon in  $\leq 1$  yr. The only solution I see is calling all 10 Nuclear Kings to a round-table to "**Put Earth in an Escrow**", so it doesn't accidentally blow up while I work to explain the superrational solution I discovered.

**Risky** again defines today's deep state of Earth. But instead of going MAD, all join a hero journey, personal and global, led "from the back" by an "escapegoat". It takes on the responsibility on Judgement Day before Heaven, hell, & humanity to defend all mistakes by all, especially during this **Exodus**. This can't be delegated nor "hired". Only a true volunteer can do it. Yet, no one so far became "the other goat" of Yom Kippur<sup>Lev16</sup>, despite 40 years of signs before Yah's 2<sup>nd</sup> Temple died *Yoma 39b5*. Fate on 2020-03-27 threw me into a **wide interdisciplinary diversity-encouraging "wid-e"** pandemic research marathon. I found key maps to get everyone to their Promised Land of **Life in MAP**. Seeing the gap, I volunteered to re-envision Yom Kippur. My new ritual started on 2023-10-07, but I can't finish it alone. Good reasons tell me: it contains a **superrational way to end hard war** forever. I urgently need much help to complete it. **Superrationality is like algebra: friend and foe followed the rules will find the same solution.**

by **Laurence Loewe of Laodicea\LLoL**, Unit 300 at 6907 University Ave., Middleton, WI 53562, Uniting States, ZoE  
His pre 2020 work is at [ScholarGoogle.com/citations?user=IBchRzOAAAI](https://scholar.google.com/citations?user=IBchRzOAAAI) etc. Email him at [LLoL@balospo.org](mailto:LLoL@balospo.org) as he prepares [balospo.org](https://balospo.org) to scale up details.

- What I\LLoL can do** (ask your Highest Power to help me):
- \* Volunteer as **Joan of ArkMageddon** to explain to all 10 Nuclear Kings my Ark-vision for averting Armageddon.
  - \* Refine how to scale up *wid-e* research in 7-8 stages of 6-8 month training rounds to evolve ResearchCity Arks & cultures capable of serving its 1600 Talent Stadia led by "**FishFus**". **Fiduciaries Sharing Futures**: paid by all to work for all to carry all fiduciary responsibility to think long-term and offer *gentle kind reasonable* decision-support worldwide, free to all who wish to keep Earth.
  - \* Refine definitions to help create an "overnight unicorn" bigtech web-IT "**Limited Liability Charitable Company**" for supporting 288,000 FishFus. These are essential to teach bioreasoning under uncertainty to all the rest of humanity by organizing 3 annual global festivals to share *wid-e* skills & insights by all for all: to grow Earth's brain.
  - \* Design the "YasPyr app" to develop the mental wealth of all in all nations, to aid *gentle kind reasonable* work with "LabOra" project management, "Ora" prayer lists, and a global *wid-e* matching of all tasks to volunteers.
  - \* Refine the Great Jubilee Race algorithm (my 2014 study)<sup>3</sup>.
  - \* Prepare a conceptual art PDF sale (up to ~\$8/year/person/stadium) that limits "special interest influence shopping".
- What you can do:** Pray for LLoL, all 10 Nuclear Kings, & all to vote for *gentle kind reasonable* policies™ & candidates to aid *Continuity Of Operations Plan* in *Don't Panic Guide*.

**Fig.1: RiskyMAD simulations show the unpredictable killer nature of nuclear roulette.** A. Most likely point estimates – based on Cold War Crises (Cuban Missiles, ...), supplemented by B. fastest and C. slowest credible estimates – to illustrate broader risk profiles. D. All individual world history runs – combining all results from A.-C. E. Shows the simplified core code of the prototype Evolvix<sup>3,4</sup> model that produced simulations in A. Run your own forecasts in Evolvix.<sup>4</sup>

```

Evolvix Quest RiskyMADdead (
  Question: "How many years until humanity self-destructs in a nuclear roulette accident?"
)
  Simulate stochastically until 200 :["years"] !L works with prototype Evolvix MMV0r3p1-rc1
  !L Run 1 random world history into its future
  Simulate deterministically until 200 :["years"] !L Predict future of countless averages
  Initial Amount of Risky = 1 !L starts as 1 = active now, else 0
  Initial Amount of MAD = 0 !L only 1 if reached from Risky, else 0
  Initial Amount of Dead = 0 !L starts at 0 ("alive"), becomes 1 in nuclear winter
  Initial Amount of rRiskyGoMAD = 0.10 !L Global rate of Risky going MAD: 0.03-0.3 /year
  Initial Amount of rMADescapes = 6 !L Oversimplified or overcomplicated escape
  Initial Amount of rMADtoDEATH = 3 !L Non-escape: rate of overreach (hits RED button)
  Action 1 ( Risky --- [ Rate = 0.10 ] ---> MAD ) !L rRiskyGoMAD = 0.1
  Action 2 ( MAD --- [ Rate = 6 ] ---> Risky ) !L rMADescapes = 6
  Action 3 ( MAD --- [ Rate = 3 ] ---> Dead ) !L rMADtoDEATH = 3
  Action 4 ( Risky --- [ Rate = 0 ] ---> LifeMAP ) !L rRiskyEscape = ? Who accepts my offer?
